Reason for Advisory:

A critical issue has been discovered with the affected software versions that makes Wi-Fi enabled Room Devices vulnerable to KRACK (WPA2 vulnerabilities)

Headline:

Older CE software running on Room Devices with Wi-Fi support are vulnerable to KRACK (WPA2 vulnerabilities)

Description:

Only CE Room Devices that supports Wi-Fi and is running a vulnerable software version is affected. You are not affected if you are running any of the deferred software versions on a Room Device that do not support Wi-Fi. See the list of affected products above.

For a more comprehensive description about this vulnerability, please refer to the:

- Cisco Security Advisory

Disclaimer:

In order to increase availability, Cisco recommends that you upgrade affected images with the suggested replacement software images.

Cisco will discontinue manufacturing shipment of affected images. Any pending order will be substituted by the replacement software images.

The terms and conditions that governed your rights and obligations and those of Cisco, with respect to the deferred software will apply to the replacement software.
