Cisco® USB-C cables provide flexibility, high-speed data transmission, excellent signal quality, and pleasing aesthetics in any meeting room and workspace, enabling hassle-free USB passthrough, display extension, and content sharing.

Product overview

Cisco USB-C cables can connect a wide range of laptops with a Webex® video collaboration device without having to use multiple dongles or cables. They help to remove the clutter from a home office workstation, a hot desk, or a meeting room with a sleek single-cable design while ensuring high quality and speed of the signal.

Simply connect Webex Desk Series, Board Series, and Room Series devices to your laptop via USB-C to extend your display. You can also use the camera, microphone, and speakers of your video endpoint to join any third-party meeting service, share content on your Webex device, or use touch-redirect capabilities on supported operating systems.

Features and benefits

Cisco offers two USB-C–type cable models delivering powerful resolution capability and high speed to help you easily connect laptops to Webex video devices:

- The Cisco USB-C Cable 1.8m supports powerful USB connectivity and was designed to provide effortless video collaboration over a single USB-C cable, best suited for the Webex Desk Series. Connecting a laptop with USB-C enables you to extend your display; join meetings from third-party meeting providers while leveraging the camera, speaker, and microphone of your Webex device; extend the functionality of your laptop with touch redirect that allows for touch-based PC control; and charge your laptop.
- The Cisco USB-C Optical Cable 9m is an active USB type-C cable using optical fiber that can transmit USB 2.0, USB 3.1 Gen 1, and 2-lane DP 1.4 data with excellent signal quality at high speed, best suited for use with the Webex Board and Webex Room Series. This slim, light, and highly resistant cable provides reliable connection in your mid-to-large meeting rooms. With 9m length, the cable enables you to reach to the far end of medium-to-large meeting spaces while providing single-cable touch-redirect connection, transforming your laptop into a board-size tablet or an immersive room system. Leverage the meetings software of choice while taking advantage of the camera, microphones, and speakers of your video device, extending your display, and charging your laptop while connected.

Cisco Services

Cisco Services make networks, applications, and the people who use them work better together.

Today, the network is a strategic platform in a world that demands better integration among people, information, and ideas. The network works better when services, together with products, create solutions aligned with business needs and opportunities.

The unique Cisco lifecycle approach to services defines the requisite activities at each phase of the network lifecycle to help ensure service excellence. With a collaborative delivery methodology that joins the forces of Cisco, our skilled network of partners, and our customers, we can achieve the best results.

Cisco Capital

Flexible payment options make it easier than ever to get the Cisco technology you need

Cisco Capital® delivers leading-edge payment solutions, allowing you to stay focused on what's most important–your business. We can help you drive business outcomes, accelerate innovation and digital transformation, and adapt to market dynamics faster with flexible payment options tailored to your specific business needs. Reduce the total cost of ownership, conserve capital, and accelerate growth. We help you realize the full benefits of Cisco technology today, and in the future, and pay for it in the way that best suits your business requirements. Whether you are looking for a pay-as-you consume model, or need to bundle Cisco hardware, software, services, subscriptions and third-party solutions, learn more about how Cisco Capital can help.
