# Meraki and Catalyst Center Global Overview

## Product overview

Meraki® and Cisco® Catalyst® Center Global Overview (Global Overview) is an integrated interface in the Meraki dashboard that provides a centralized, global view across Meraki and Catalyst Center networks.

## Who it's for

Global Overview is designed for large enterprises with both cloud and on-premises deployments, helping you lower MTTR by easily understanding what's happening across your hybrid environments at a glance.

# Simplify network management

Managing both cloud and on-premises environments can introduce unnecessary complexity and overhead. Global Overview empowers you to achieve comprehensive visibility and control across your Meraki and Catalyst Center network infrastructure from a single dashboard.

Unlike competing solutions that force IT teams to navigate multiple disconnected dashboards, this integration offers a holistic and intuitive, consistent experience, simplifying network management for hybrid environments.

- **Simplified operations:** gain holistic operational insights and real-time visibility into network health and performance across both cloud and on-premises environments. Reduce tool sprawl and operational overhead by operating from a single entry point.
- **Faster issue resolution:** see aggregated critical alerts and events across Meraki and Catalyst Center networks to proactively resolve issues, optimize incident management, and enhance efficiency across your entire network environment. Troubleshoot seamlessly with secure Single Sign-On (SSO) to easily cross-launch into Catalyst Center.
- **Increased scalability:** Global Overview enables you to seamlessly scale, supporting large enterprises with tens of thousands of devices while maintaining the straightforward and intuitive experience of the Meraki dashboard.
