Axis Communications Devices Managed in Cisco's Unified Cloud Platform

Axis Communications smart devices can now be easily deployed and cloud-managed on the Meraki® dashboard, alongside Cisco® smart cameras. This enables straightforward management of existing Cisco networks and fosters better collaboration between IT and physical security teams.

Cisco + Axis Communications = partnership

We are pleased to announce the integration of Axis Cloud Connect with the Cisco Meraki dashboard. This collaboration brings together Cisco and Axis to deliver a unified approach to network and physical security. Thanks to the deep integration, customers gain access to a wider range of cloud-managed devices and benefit from streamlined management through the Cisco Meraki dashboard.

Unlocking new camera types...

New camera types available on Cisco Meraki dashboard

Type	Benefits
Pan-Tilt-Zoom (PTZ camera)	Allow monitoring for large spaces with a single camera
Modular camera	Interchangeable sensors, adaptable designs, and flexible system for a high level of discretion
Thermal camera	Temperature monitoring and heat-based detection—regardless of visibility

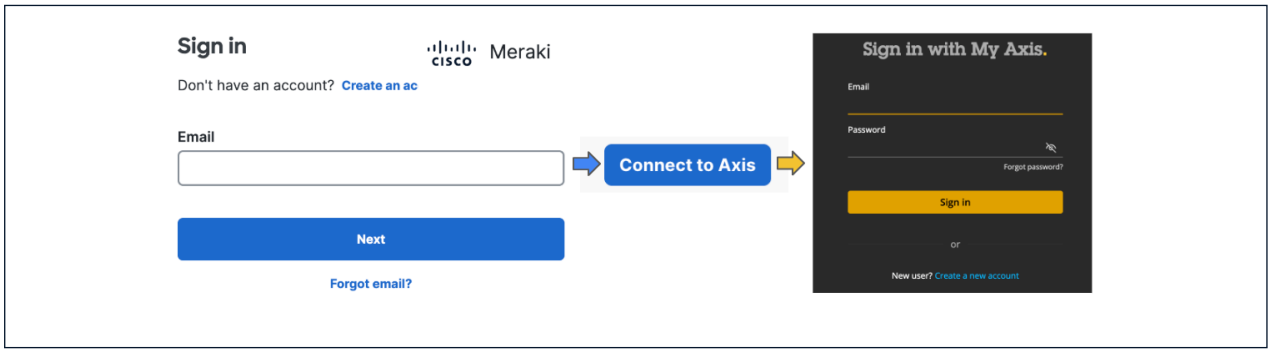

The future of physical security is cloud-managed

On-premises	Cloud-managed
Servers and Network Video Recorders (NVRs) needed	No servers, NVRs, or Video Management Software (VMS) needed
Bandwidth pressures	Store on camera, stream on demand
On-site troubleshooting	Remote troubleshooting
Difficult to scale and manage	Centralized management, scalable, flexible
Manual firmware updates	Automatic firmware updates
No remote access	Access anytime, anywhere

Seamless and secure setup

Integrating your Axis devices onto the Cisco Meraki dashboard is simple and secure. Initiate the connection directly from your Meraki dashboard using a secure OAuth2.0 process. This quickly brings your Axis devices into the Cisco ecosystem, enabling unified management and monitoring without complex setup, so you can easily leverage both platforms' strengths.

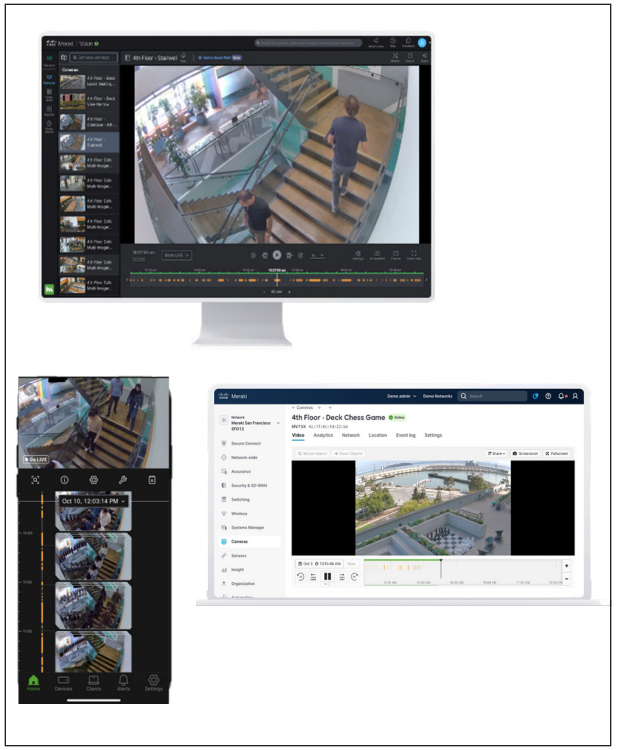

Unified device control

Manage all your Axis devices and Cisco smart cameras from a single, intuitive dashboard. This unified approach streamlines monitoring, configuration, and operational oversight for your entire security infrastructure. Simplify daily tasks, enhance visibility, and ensure consistent performance across your fleet, all from one central platform.

Comprehensive device insights and access anywhere

Experience superior video security with the platforms. Access live and historical footage from your Axis devices, gaining robust physical security and critical operational insights. Manage your fleet of devices and configure settings effortlessly from any web browser, eliminating the need for dedicated applications. Enjoy secure, flexible, and comprehensive monitoring from anywhere.

Key customer benefits

Bandwidth preservation

Minimize cost through reduced on-premises infrastructure with post-processing done directly on the camera or cloud, improving network bandwidth.

Unified dashboard

Manage connectivity and gain wider visibility into both network and physical spaces, protecting your network infrastructure from tampering and preventing downtime.

Low barrier to entry

Easily connect new or existing Axis devices to the Meraki dashboard to gain the benefits of seamless updates, remote viewing, and centralized control.

Fast Incident Management

Accelerate investigations by using visual analytics, automated alerts, and heat maps to instantly pinpoint key events and eliminate manual video scrubbing.

Built with cybersecurity and quality assurance in mind

With the rise of AI, it is crucial to have the most up-to-date infrastructure technology. Our combined advanced device solution directly counteracts aging technology. Recognizing that mitigating cyberthreats is a shared responsibility, we strive to simplify safeguard implementation, enabling you to use our offerings as securely as possible.

About Cisco

Cisco delivers the critical infrastructure to help organizations thrive in the AI era. By fusing networking, physical security, cybersecurity, observability, and collaboration, we power how people and technology work together.

About Axis Communications

Axis provides network solutions in video security, access control, intercom, and audio systems enhanced by intelligent analytics applications and supported by high-quality training. Customers across the world use our solutions to protect people and property and improve business performance.
