Introduction

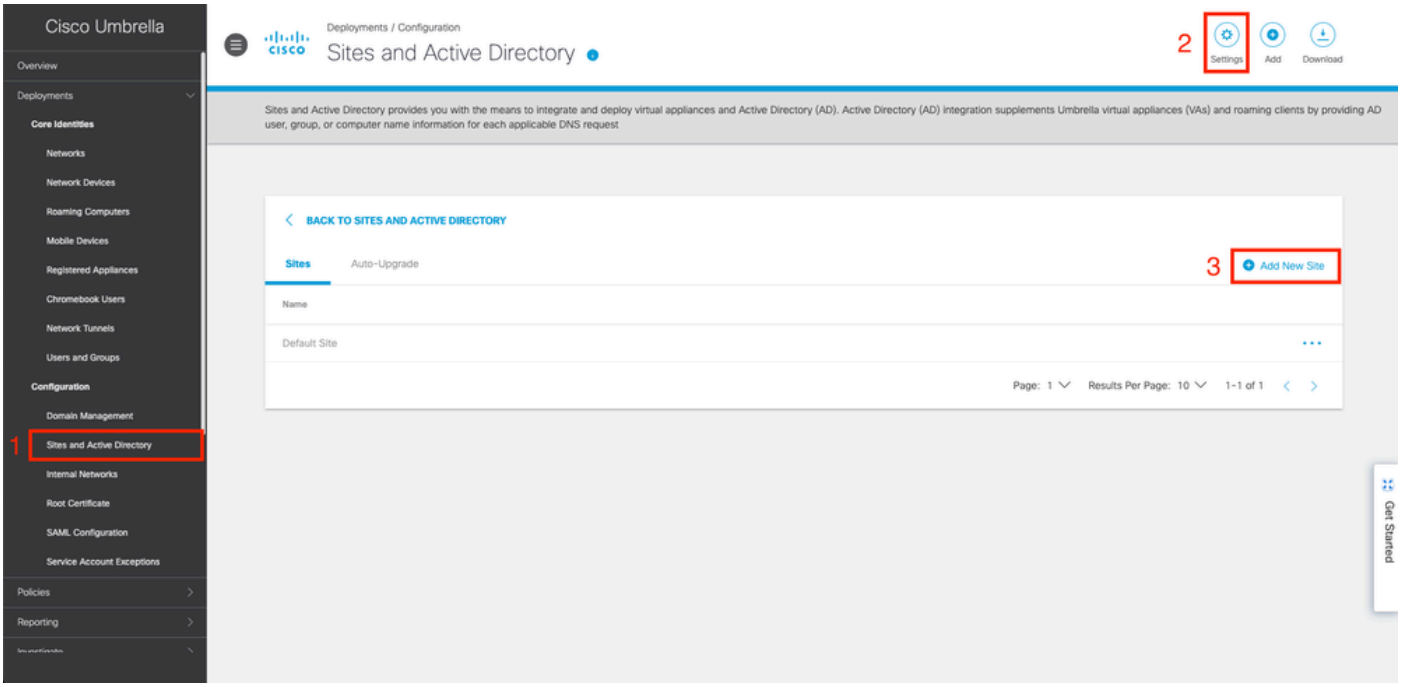

This document describes how to add or remove an Umbrella site.

Background Information

Not sure when to use multiple Sites in Umbrella? Please refer to our docs.

How to Add an Umbrella Site

1. Navigate in the Umbrella Dashboard to**Deployments > Configuration > Sites and Active Directory.**
2. Select the **Settings button in the top-right corner** of the page. This displays a list of all your Sites.
3. Select the **(+) Add New Site** hyperlink and give your new Site a unique name. Click the Save button to finish.
