Dossier Collection Failure

This alarm is triggered when there is a failure collecting a dossier from a monitored Cisco IOS XR device. To configure this alarm, do the following:

Procedure

Step 1 In the main window, click > **Configure** > **Policies**.

Step 2 Click **Add Policy**.

Step 3 Enter a policy name in the **Name** field.

Step 4 Under **Triggers**, click **Add Rules**.

Step 5 Click **Dossier Collection Failure**.

Step 6 Click **Next**.

Step 7 By default, the rule is enabled. Toggle the switch to DISABLED if you do not want to activate the rule yet.

Step 8 Under the **Severity** drop-down list, select the severity level you want defined for this alarm.

Step 9 Make any other necessary interface and endpoint notification configurations, then click **Save**.
