Expired Device Certificate

This alarm is triggered when the certificate used to enroll the monitored device has expired. To clear the alarm, generate a new enrollment certificate, then review and accept it in the UI. To configure this alarm, do the following:

Procedure

Step 1 In the main window, click > **Configure** > **Policies**.
Step 2 Click **Add Policy**.
Step 3 Enter a policy name in the **Name** field.
Step 4 Under **Triggers**, click **Add Rules**.
Step 5 Click **Expired Device Certificate**.
Step 6 Click **Next**.
Step 7 By default, the rule is enabled. Toggle the switch to DISABLED if you do not want to activate the rule yet.
Step 8 Under the **Severity** drop-down list, select the severity level you want defined for this alarm.
Step 9 Make any other necessary interface and endpoint notification configurations, then click **Save**.
