FM-1-INIT	1-Alert	Feature Manager subsystem initialization failure	The Feature Manager subsystem failed to initialize. Most likely cause is insufficient memory at init time. Probably either the hardware has failed or this image is being run on a platform it was not intended for.	firmware	"Replace failing hardware or obtain the correct " "IOS image for this platform whichever is " "appropriate."
FM-2-NOMAP	2-Critical	Cannot create Feature Manager data structures for VLAN Map [chars]	The Feature Manager could not allocate the data structures needed to describe a VLAN Map in a form that can be loaded into hardware. Probably caused by lack of free memory.	firmware	LOG_STD_REDUCE_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-2-NOSB	2-Critical	Cannot create subblock for interface [chars]	The Feature Manager was unable to save per-interface information needed for its correct operation. Some per-interface features such as access groups or VLAN maps will not be configured correctly.	firmware	"Use a less complicated configuration that " "requires less memory."
FM-2-NOVLB	2-Critical	Cannot create memory block for VLAN [dec]	The Feature Manager was unable to save per-VLAN information needed for its correct operation. Some per-interface features such as access groups or VLAN maps will not be configured correctly.	firmware	"Use a less complicated configuration that " "requires less memory."
FM-2-NOVMR	2-Critical	Cannot create VMR data structures for access list [chars]	The Feature Manager could not allocate the data structures needed to describe an ACL in a form that can be loaded into hardware. Probably caused by lack of available memory.	firmware	"Use a less complicated configuration that " "requires less memory."
FM-3-AUGMENTFAIL	3-Error	Augmenting of access-map [chars] on [chars] label [dec] failed	The system ran out of CPU memory when attempting to merge internally required elements with the configured access maps.	firmware	LOG_STD_REDUCE_ACTION
FM-3-CONFLICT	3-Error	[chars] [chars] conflicts with [chars]	Port access lists PACLs may not be applied when input router access lists or VLAN maps have been applied and vice versa	firmware	"Remove the conflicting feature or features"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-3-GOTLABEL	3-Error	Got label for [chars]	The Feature Manager has now been able to allocate a hardware label for the interface. The interface had needed a label before but none was available.	-	LOG_STD_NO_ACTION
FM-3-GOTVLABEL	3-Error	Got label for VLAN #[dec]	The Feature Manager has now been able to allocate a hardware label for the VLAN. The VLAN had needed a label before but none was available.	-	LOG_STD_NO_ACTION
FM-3-ILLEGALCOPY	3-Error	Illegal copy of [chars] access group [chars] from [chars] label [dec] to [dec]	An internal software error has occurred	firmware	"show running-config"
FM-3-INITLABEL	3-Error	Special initialization of label [dec] failed	Initialization of the access list hardware failed. Prioritization of routing protocol packets above other kinds of packets may not occur on some VLANs or routed ports.	firmware	LOG_STD_ACTION
FM-3-INSERTFAIL	3-Error	Insert of access-map [chars] #[dec] into [chars] label [dec] failed	The system ran out of CPU memory when trying to merge sections of an access map.	firmware	"Reduce other system activity to ease the memory demands. For example " "remove any ACLs that have been defined but are not now used. Use " "simpler ACLs with fewer access control entries ACEs. Use fewer "

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-3-INTTABLE	3-Error	Not in truth table: VLMAP [dec] RACL [dec] Rtprot [dec] Redir [dec] Mcb [dec] Feat [dec]	An unrecoverable software error occurred while trying to merge the configured input features.	firmware	"show running-config"
FM-3-LABELERROR	3-Error	Incorrect label to [chars] vlan label attribute copy callback srclabel [dec] dstlabel [dec]	The Feature Manager attribute copy callback was called with an incorrect source or destination label.	firmware	"show running-config"
FM-3-MAXRECURSION	3-Error	Too many [dec] levels of recursion while merging [chars] code [dec].	The configuration is too complicated for the platform specific ACL merge code to support. Most likely cause is including too many separate access lists in a single VLAN map or policy map.	-	"Reduce the number IP or MAC access lists" " considered separately in any one VLAN or policy"
FM-3-MERGEFAIL	3-Error	[chars] ACL merge error [dec] [chars] on [chars] label [dec]	The Feature Manager was unable to complete the merge of the configured features into a form suitable for loading into the hardware. Packets potentially affected by this feature will be sent to the CPU for processing instead. The most likely cause is specifying an ACL that is too large or too complex for the system to handle.	firmware	"Try specifying a smaller and less complicated " "configuration."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-3-NOLABEL	3-Error	Cannot allocate [chars] label for interface [chars]	The Feature Manager was unable to allocate a label for the features on this interface. This means that the hardware cannot be programmed to implement the features and packets for this interface will be filtered in software. There is a limit of 256 labels per direction.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
FM-3-NOLABELVL	3-Error	Cannot allocate [chars] label for VLAN [dec]	The Feature Manager was unable to allocate a label for the features on this VLAN. This means that the hardware cannot be programmed to implement the features and packets on this VLAN will be filtered in softtware. There is a limit of 256 labels per direction.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same VLAN Maps on multiple " "VLANs if possible."
FM-3-NOTEMPTY	3-Error	Illegal copy of attribute to non empty [chars] vlan label [dec]	The Feature Manager attribute copy callback was called with a destination label already being used by a VLAN or routed port.	firmware	"show running-config"
FM-3-NOTOBJECT	3-Error	Invalid object VLAN [dec] IDB [hec] used in Feature Manager operation	An internal software error has occurred	firmware	"show running-config"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-3-OUTTTABLE	3-Error	Not in truth table: RACL [dec] VLMAP [dec]	An unrecoverable software error occurred while trying to merge the configured output features.	firmware	"show running-config"
FM-3-QOSTTABLE	3-Error	Not in truth table: ACL [dec] in map action [dec]	A software error occurred while trying to merge a QoS Policy Map	firmware	"show running-config"
FM-3-RELOADED	3-Error	Reloading [chars] label [dec] feature in [chars]	The Feature Manager was able to fit more of the configured features on this label into the hardware. One or more features had previously been unloaded because of lack of space.	-	LOG_STD_NO_ACTION
FM-3-TOSCOST	3-Error	Minimize monetary cost TOS bit unsupported in hardware ignored	This hardware platform supports filtering based on DSCP rather than TOS and precedence. The DSCP field does not include the minimize monetary cost bit from the TOS field so hardware will ignore this bit when checking for a match to an ACE. This can lead to unintended filtering actions.	firmware	"Design filters that do not test for minimum " "monetary cost TOS."
FM-3-UNKNOWNACTION	3-Error	Unknown VMR access group action 0x[hec]	An internal software error has occurred.	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-3-UNLOADING	3-Error	Unloading [chars] label [dec] feature from [chars]	The Feature Manager was unable to fit the complete configuration into the hardware so some features will have to be applied in software. This prevents some or all of the packets from being forwarded in hardware and requires them to be forwarded by the CPU. Multicast packets may be dropped entirely instead of being forwarded.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
FM-3-WRONGLABEL	3-Error	Inconsistent records of label for [chars]: FM has [dec] LM has [dec]	An internal software error has occurred.	firmware	"show running-config"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
FM-4-EXCESSSECONDARY	4-Warning	More than [dec] secondary IP addresses configured on interface [chars]	When secondary IP addresses are configured on an interface the hardware is usually programmed so that the ICMP redirect functionality on the CPU is not notified of packets sent between two subnets configured on the same interface. If many secondary IP addresses are configured on the same interface it becomes impractical to program the hardware in this manner this message is logged and the CPU will be notified of every packet sent between two subnets on this interface. No ICMP redirects will be sent in error but the CPU usage may increase because of the additional notifications. The user may wish to configure \no ip redirects\ on the interface to reduce the CPU load on the system.	firmware	"configure the \"no ip redirects\" command on " "this interface"
FM-7-TRANSDEF	7-Debug	No augmentation function found for VMR	An Internal Error occured. An Access Control List was not interpretted correctly. The Value-Mask Result is incorrect.	firmware	LOG_STD_ACTION

HA-2-CUTOVER_NOTICE	2-Critical	[chars]	This is an important High Availability System notice logging the state of a system cutover of the standby system to the active system. Messages of this type indicate that the active system reliquished system control and that the standby system is taking over as active.	-	"If the message is due to a failure condition copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance. If the message is not due to a failure condition no action is required."
HA-2-INIT_ERROR	2-Critical	[chars]	This is a critical error message about a High Availability System initilization status or condition. A message of this type indicates that a failure occured during high availability system initialization.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-2-IPC_ERROR	2-Critical	[chars] [chars]	This is a critical error message about a High Availability System interprocess communication status or condition. A message of this type indicates that an interprocess communication failure occurred between the active system and the standby system.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
HA-2-MAX_NO_QUIESCE	2-Critical	[dec] linecards not quiesced exceeds limit of [dec] all slots will be reloaded.	-	-	"If you OIR removed the active RSP or have legacy IPs installed in the system this message is normal. Otherwise copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-2-NO_QUIESCE	2-Critical	Slot [dec] did not quiesce it will be disabled and then reloaded.	This is a cutover notice about a High Availability System linecard error condition. The linecard did not quiesce properly.	-	"This message is normal if the slot contains a legacy IP. Otherwise copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-3-ERROR	3-Error	[chars]	This is a error message about a High Availability System status or condition.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-3-RF_EVENT_FAILED	3-Error	RF event not processed till [dec] milliseconds. Code = [dec]	The event sent to the redundancy facility was not processed till the specific time delay.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
HA-3-SYNC_ERROR	3-Error	[chars]	This is a error message about a High Availability System state syncronization error status or condition.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-4-CHKPT	4-Warning	Platform CF - [chars]	Failure in some UNIX checkpointing activity.	UNIX_RP_DDTS_COMPONENT	LOG_STD_SH_TECH_ACTION
HA-4-CHKPTSEND	4-Warning	[chars] rc [dec] event [chars]	Failure to send UNIX checkpointing data.	UNIX_RP_DDTS_COMPONENT	LOG_STD_SH_TECH_ACTION
HA-4-CONFIG_NOT_LOCKED	4-Warning	Unable to lock the configuration session.	This is a warning message indicating that the configuration session could not be locked. Simultaneous configuration sessions can corrupt the configuration.	-	"Copy the message exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-4-NOPROCESS	4-Warning	Creation of [chars] process failed	Creation of a platform high availability process failed.	UNIX_RP_DDTS_COMPONENT	LOG_STD_SH_TECH_ACTION
HA-4-SYNC	4-Warning	[chars]	An error was encountered in a data sync operation	UNIX_RP_DDTS_COMPONENT	LOG_STD_SH_TECH_ACTION
HA-4-WARNING	4-Warning	[chars]	This is a warning message about a High Availability System status condition or event.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
HA-5-HA_IOS_VERSION	5-Notice	Active IOS version differs from standby IOS version	This is a notice about High Availablility System version mismatch between the active and standby systems.	-	"No action required."
HA-5-HA_VERSION	5-Notice	Active HA version [node][node]differs from standby HA version [node][node]	This is a notice about High Availablility System version mismatch between the active and standby systems.	-	"No action required."
HA-5-HW_MOD_MG_NOTICE	5-Notice	[chars] hw-module slot [dec] image [chars] : [chars]	This is a notice message about a High Availability System hardware module configuration status condition or event.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-5-MODE	5-Notice	Operating mode is [chars] [chars]mode is [chars].	This is a notice about the High Availablility System mode.	-	"Make sure that both the active system and standby systems are correctly configured and operational."
HA-5-NOTICE	5-Notice	[chars]	This is a notice message about a High Availability System status condition or event.	-	"No action required."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
HA-5-RF_RELOAD_NOTICE	5-Notice	Unable to reload the standby. [chars]	The active RSP was unable to reload the standby because of the reason indicated in the message. This may be because the slave is in unplugged state or because there is a redundancy forced switchover process in progress or because the reload function is incorrectly called from the standby to the active.	-	-
HA-5-SYNC_NOTICE	5-Notice	[chars]	This is a notice message about a High Availability System syncronization status condition or event.	-	"No action required."
HA-5-SYNC_RETRY	5-Notice	Reloading standby and retrying sync operation retry [dec].	This is a notice message about a High Availability System syncronization status condition or event. The syncronization operation will be retried.	-	"No action required."
HA-5-SYNC_RETRY_FAIL	5-Notice	Maximum sync retries exceeded. Reloading standby and cancelling sync.	This is a notice message about a High Availability System syncronization status condition or event. The syncronization operation failed.	-	"Copy the notice exactly as it appears. Check both the active system and standby system for messages. Call your technical support representative for assistance."
HA-6-FALLBACK	6-Information	[chars] - configured mode[chars] fallback mode[chars]	This RP redundancy mode fell back to the indicated mode	UNKNOWN_COMPONENT	LOG_STD_NO_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action

IDS-IDCP-SENDMAIL-BAD-IOS-SIG	4-Warning	Sig:3101:Sendmail Invalid Recipient - from [node]to %i	-	ids	"For security reasons users should not be allowed to execute\n\programs via e-mail servers. This is a very serious indication that your\n\network may be under attack and the source should be shunned immediately."
IDS-IDCP-SENDMAIL-BOUNCE-SIG	4-Warning	Sig:3100:Smail Attack - from [node]to %i	Triggers on the very common "smail" attack against e-mail\n\ servers. This attack attempts to cause e-mail servers to\n\ execute programs on the attacker's behalf.	ids	"For security reasons users should not be allowed to execute\n\programs via e-mail servers. This is a very serious indication that your\n\network may be under attack and the source should be shunned immediately. "
IDS-IDCP-SENDMAIL-DECODE	4-Warning	Sig:3105:Sendmail Decode Alias - from [node]to %i	Triggers on any mail message with ": decode@" in the header.\n\ The decode alias is used to uudecode files and is primarily\n\ implemented as a convenience for system administration.	ids	"The decode alias is used to uudecode files and is primarily\n\implemented as a convenience for system administration. For security\n\purposes this should not be allowed and the service should be disabled. If\n\allowed users that mail to the alias will trigger this signature. Recommend\n\shunning of hosts that attempt to mail to this alias especially if they are\n\outside of your network."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IDS4_TCP_SENDMAIL_INVALID_COMMAND	4-Warning	Invalid SMTP command - from [node]to %i	Triggers on an invalid SMTP command in the \n\ SMTP connection. This message indicates that a suspicious violation \n\ was detetected that may be an attack to the mail server system.	ids	"This is unusual traffic and may warrant investigation."
IDS4_TCP_SENDMAIL_OLD_SIG	4-Warning	Sig:3104:Archaic Sendmail Attacks - from [node]to %i	Triggers when "wiz" or "debug" commands are sent to the SMTP port.	ids	"There is no reason for this type of traffic to be seen on\n\modern networks. There is little chance that there will be any adverse\n\effects from someone attempting these "old" hacks. Prudent security\n\practices would suggest that the source of this attempt be shunned."
IDS4_TCP_SENDMAIL_SPAM_SIG	4-Warning	Sig:3106:Excessive Rcpt to: SPAM - from [node]to %i	Parse for RCPT TO: in header. Alarm on threshold.	ids	"Some mailing list software may trigger this signature."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IDS4IDPS-SENDMAIL_VRFY_SG	4-Warning	Sig:3103:Sendmail Reconnaissance - from [node]to %i	Triggers when "expn" or "vrfy" commands are issued to\n\ the SMTP port.	ids	"These commands are commonly used to verify that a user mail\n\account exists on the server or to expand an alias to determine who the\n\actual recipients of a message may be. Users that use the EXPN and VRFY\n\functions for legitimate purposes will trigger this signature. The\n\information that can be obtained is useful but not dangerous on its own.\n\Monitoring of future traffic for patterns of misuse is recommended."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IDS-4-TCP_SYN_ATTACK_SIG	4-Warning	Sig:3050:Half-Open Syn Flood - from [node]to %i	Triggers when the number of half-open TCP connections\n\ exceeds the high-water mark or the one minute high rate mark	ids	"There are no known sources that would legitimately generate\n\this traffic pattern. This may be indicative of some type of network problem\n\and should be investigated. To avoid depletion of your network resources it\n\is recommended that the source be shunned during the course of the\n\investigation. If no network problems are discovered prudent security\n\practices would suggest that the source be shunned permanently."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IDS-4-TCP_SYN_FIN_SIG	4-Warning	Sig:3041:TCP - SYN and FIN bits set - from [node]to %i	Triggers when a TCP packet is received with both the SYN\n\ and FIN bits set in the flags field.	ids	"There is no legitimate use for malformed TCP datagrams. This is \n\unusual traffic and warrants investigation. Hacker tools will generate\n\TCP packets with the SYN and FIN bits set in the flags field in an \n\attempt to elude\n\intrusion dection. When non-specific network traffic of this\n\type is encountered the most prudent action from a security perspective\n\is to shun or disallow it. If the source of this traffic is legitimate\n\the user will then identify him or herself."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IDS-4-UDP_BOMB_SIG	4-Warning	Sig:4050:UDP Bomb - from [node]to %i	Triggers when the UDP length specified is less than the IP\n\ length specified. This malformed packet type is associated\n\ with a denial of service attempt.	ids	"There is no legitimate use for malformed datagrams. This\n\may be indicative of systems that are experiencing problems with their\n\kernel or NIC cards. This is unusual traffic and warrants investigation.\n\When non-specific network traffic of this type is encountered the most\n\prudent action from a security perspective is to shun or disallow it. If the\n\source of this traffic is legitimate the user will then identify him or\n\herself."
IDS-4-UDP_TFTP_PASSWD_SIG	4-Warning	Sig:4100:Tftp Passwd File - from [node]to %i	Triggered when someone tries to tftp a password file.	ids	"System administrators might use this service to update\n\system files. It is a high security risk if this is normal practice and\n\should be avoided. No other benign triggers exist for this signature. If\n\after investigation the alarm was not generated by a system administrator\n\prudent security practices would suggest that the source be shunned."

PLATFORM_HOST_ISSU-3-TRANSFORM_FAIL	3-Error	IP Host ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars]	The IP Host ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the IP Host state between the active device and the standby device is not identical.	-	"show issu session <client_id> and " "show issu negotiated version <session_id>"
PORT_SECURITY-4-INVALIDPACKET	4-Warning	Detected and dropped illegal traffic on port [chars] and vlan [dec] the non-cumulative packet dropped count is [node].	IP Port Security only permits traffic with the correct source IP to MAC\n\ binding on the port or VLAN. There may be a malicious host trying to\n\ carry out a denial of service attack using another host's source address.\n\ The illegal traffic is dropped by the IP Port Security feature.	ipsg	"Identify the source of the illegal traffic " "and stop it."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IP_SNMP-3-SOCKET	3-Error	can't open UDP socket	The SNMP server was unable to open a port for receiving or\n\ transmitting SNMP requests. This usually happens when the SNMP\n\ server is started using the snmp-server community configuration\n\ command on a router or communication server with an interface that\n\ has no IP address configured. Another possible cause is low memory.	-	"Configure at least one interface with an IP address or specify the no\n\ snmp-server command to remove the SNMP server process. Call your\n\ technical support representative if problems persist or if it becomes\n\ necessary to add memory."
IP_SNMP-4-NOTRAPIP	4-Warning	SNMP trap source [chars] has no ip address	The user entered an snmp-server trap-source command. The interface\n\ requested for use as the source address has no ipv4 address\n\ associated with it. The SNMP trap is being sent anyway but\n\ without the source address that the user intended.	-	"There are two possible solutions. Either enter a no snmp-server\n\ trap-source command to disable the request for a specific source IP\n\ address or add an IP address to the interface referenced in the\n\ snmp-server trap-source configuration command."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IP_SNMP-4-NOTRAPIPV6	4-Warning	SNMP trap source [chars] has no ipv6 address	The user entered an snmp-server trap-source command. The\n\ interface requested for use as the source address has no ipv6\n\ address associated with it. The SNMP trap is being sent\n\ anyway but without the source address that the user intended.	-	"There are two possible solutions. Either enter a no snmp-server\n\ trap-source command to disable the request for a specific source\n\ IP address or add an IPV6 address to the interface referenced\n\ in the snmp-server trap-source configuration command."
IP_SNMP-4-TOOBIG	4-Warning	Oversize message from [node]datagram size [node]udp length %u	An incoming SNMP packet had a length field so large that\n\ the system had to assume it was in error. This system made a\n\ correct reaction to bad external data.\n\ Since SNMP packets should originate from systems under the\n\ same administration this may indicate that the network host\n\ used to originate the SNMP request had a problem in its\n\ networking layer.\n\ Alternatively if the SNMP packet originated from outside\n\ the local administrative domain it could indicate an\n\ failed attempt at security penetration and that site should\n\ be watched more closely.	-	"If the origin is local no action is required.\n\ If the origin is determined to be malicious either contact the\n\ administrator of the originating site or install filters to\n\ prevent access by that site as circumstances warrant."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPSG-4-IPSG_INVALID_PACKET	4-Warning	Detected and dropped illegal traffic on port [chars] and vlan [dec] the non-cumulative packet dropped count is [node].	IP Source Guard only permits traffic with the correct source IP to MAC\n\ binding on the port or VLAN. There may be a malicious host trying to\n\ carry out a denial of service attack using another host's source address.\n\ The illegal traffic is dropped by the IP Source Guard feature.	ipsg	"Identify the source of the illegal traffic " "and stop it."

IPNAT_HA_SSO_ISSU_SEND_FAILED	3-Error	IPNAT HA SSO ISSU client failed to send a negotiation message error [dec]	IPNAT HA SSO ISSU client could not send a session negotiation\n\ message to the peer. When there is a problem in the\n\ negotiation the standby unit can not be brought up.	nat	"show logging and show " "checkpoint client"
IPNAT_HA_SSO_ISSU_SESSION	3-Error	IPNAT HA SSO ISSU client [chars]	IPNAT HA SSO ISSU client observed an error during a session\n\ negotiation with the peer unit. When there is a problem\n\ with the session the standby unit can not be brought up.	nat	"show issu capability entries <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated capability <session_id>"
IPNAT_HA_SSO_ISSU_UNREGISTRY	3-Error	IPNAT HA SSO ISSU client failed to unregister session information. Error: [dec] [chars]	The IPNAT HA SSO ISSU client failed to unregister session information.	nat	"show issu session <client_id> " "and " "show issu negotiated " "capability <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA_SSO_ISSU_TRANSFORM	3-Error	IPNAT HA SSO ISSU client [chars] transform failed error [chars]	IPNAT HA SSO ISSU client could not transform the message.\n\ If the transmit transformation failed it means that the\n\ checkpoint message can not be sent to the standby unit.\n\ If the receive transformation failed it means that the\n\ checkpoint message can not be applied on the standby\n\ unit. In both cases the IPNAT HA SSO state will not\n\ be indentical with the active unit.	nat	"show issu session <client_id> and\n\ show issu negotiated version <session_id>"
IPNAT_HA-3-ATTRIBUTE	3-Error	Bulk sync of [chars] via [chars] [chars] is invalid for [chars]	An attempt to bulk sync an address pool or a dynamic/static\n\ translation has detected that the entity which is to be sent to the\n\ standby RP when acting in a stateful redundant mode contains an\n\ invalid owner property and hence cannot be synchronized. The detection\n\ of this case will result in a failure of the bulk sync.	nat	LOG_STD_ACTION
IPNAT_HA-3-BULK_SYNC	3-Error	Failed to send [chars] information to peer	-	nat	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA-3-CLIENT	3-Error	Failed to register with [chars] [chars]	The NAT High Availability has failed to register with the specified\n\ component during initialization. This is an internal error which\n\ indicates that the NAT HA services will be unavailable.	nat	LOG_STD_ACTION
IPNAT_HA-3-DECODE	3-Error	Decode via [chars] of [chars] failed	A message of the transport and type described failed in its attempt\n\ to be decoded on the standby. The resultant action taken by the\n\ standby route processor is an attempt to resynchronize.	nat	LOG_STD_ACTION
IPNAT_HA-3-DYN_DEFERQ	3-Error	[chars] failed to defer[chars]	The incremental synchronization of the NAT dynamic state to the standby\n\ RP has failed to add the information to the deferral queue for later\n\ processing during the time where the standby RP is progressing to it's\n\ hot standby redundant state. This implies that the runtime state\n\ between the active and standby RP would be inconsistent once the\n\ standby has been fully initialized.	nat	"show ip nat ha"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA-3-DYN_SYNC	3-Error	Failed to process [chars] dynamic state	The incremental synchronization of the NAT configuration to the standby\n\ RP has failed to complete successfully. This implies that the\n\ configuration state between the active and standby RP is\n\ inconsistent.	nat	"show ip nat ha"
IPNAT_HA-3-INTERFACE_TYPE	3-Error	[chars] type/slot [node] unit [node] num [node] channel [node] value %u	An attempt to sync a dynamic translation or address change has\n\ detected that the interface which was encoded on the active RP\n\ has a different type the standby RP. The detection of this\n\ case will result in a failure of the bulk or LBL sync.	nat	LOG_STD_ACTION
IPNAT_HA-3-MISMATCH	3-Error	[chars] [chars] mismatch with id %u	The specified synchronization operation has failed to complete on the\n\ standby route processor due to an inconsistency in the internal id\n\ which would have resulted in an inconsistent configuration between\n\ active and standby. The resultant action taken by the standby route\n\ processor is an attempt to resynchronize.	nat	LOG_STD_ACTION
IPNAT_HA-3-PURGE	3-Error	Failed to purge [chars] information	-	nat	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA-3-RECEIVE	3-Error	Message via [chars] is [chars]	An ISSU registration for the set of initial capabilities and sessions\n\ failed due to the reason specified. This will have the effect of the\n\ NAT ISSU support being unavailable between peers.	nat	LOG_STD_ACTION
IPNAT_HA-3-TRANSFORM	3-Error	[chars] of [chars] via [chars] failed [chars]	An attempt to either encode or decode a versioned synchronization\n\ message has failed due to an internal error encountered by the ISSU\n\ component.	nat	LOG_STD_ACTION
IPNAT_HA6ADDR_CHANGE	6-Information	[chars] unable to encode data descriptor for interface [chars]	An attempt to sync an address change to the standby RP has\n\ detected that the interface which was to be encoded on the\n\ active RP is no longer present or does not support encoding. \n\ The interface may have been removed from the configuration or \n\ may not support encoding.	-	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA-6-INTERFACE	6-Information	[chars] type/slot [node] uint [node] num [node] channel [node]	An attempt to sync a dynamic translation or address change has\n\ detected that the interface which was encoded on the active RP\n\ is not present on the standby RP. The detection of this case\n\ may result in a failure of the bulk or LBL sync.	nat	LOG_STD_ACTION
IPNAT_HA-6-MAPPING_COMPARE	6-Information	[chars] [chars] [chars] mapping id [node]comparing [chars] [chars] [chars] mapping id %u	The specified synchronization operation on the standby route processor\n\ has detected an internal condition with respect to the properities of\n\ dynamic mappings. This is informational.	nat	LOG_STD_ACTION
IPNAT_HA-6-MAPPING_EXISTS	6-Information	[chars] [chars] [chars] mapping id %u	The specified synchronization operation on the standby route processor\n\ has detected the presence of an existing matching mapping. This may\n\ be associated with any observed PRC failures on the standby.	nat	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA-6-READY	6-Information	[chars] peer not ready discarding [chars]	The synchronization attempt for the message has determined that the\n\ transport has lost communication with its peer. This is a normal\n\ situation which indicates that the standby route-processor is currently\n\ out of service implying a simplex redundancy mode.	-	-
IPNAT_HA-6-RELOAD	6-Information	[chars] reloading [chars]	A synchronization attempt between the active and standby RP peers has\n\ failed with the reason indicated. The standby peer is reloaded in an\n\ attempt to resynchronize when operating in a stateful redundant\n\ mode.	nat	LOG_STD_ACTION
IPNAT_HA-6-RELOAD_DISABLED	6-Information	Standby reload has been disabled NAT RP state is out of sync and the standby should be reloaded manually	The active and standby RPs are out of sync and the standby RP would have been reloaded but this reload was suppressed based on the configured environment.	nat	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
IPNAT_HA-6-TIMEOUT	6-Information	Bulk sync is flow controlled by [chars]	The bulk synchronization of the NAT configuration to the standby RP\n\ has encountered a flow control condition which has effected a timeout\n\ awaiting the condition to clear. This will result in a reload of the\n\ standby RP to allow the bulk synchronization to restart.	nat	LOG_STD_ACTION
IPNAT-3-BADMAPPINGTYPE	3-Error	NAT mapping type [dec] for mapping statistics from platform is \n\ invalid	The mapping type for passing mapping statistics from platform is \n\ not for static nor dynamic mapping type which is invalid. This \n\ condition can cause the statistic counters for NAT mapping to be\n\ inaccurate on the RP	nat	LOG_STD_ACTION
IPNAT-3-CENTRAL_POLICY	3-Error	Central policy setting failed: [chars]	Central policy setting can not be changed due to incompatible configuration.	nat	"Remove existing NAT routes and mappings."
IPNAT-3-CONFIG	3-Error	Unable to [chars] the configuration of dynamic mappings	An internal operation relating to the configuration of the\n\ dynamic mappings has failed. This may imply that the mapping\n\ has not been installed.	nat	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
[illegible]	4-Warning	The LISP database-mapping platform limit of [dec] has been reached. Current count is [dec].	This message is a warning that the local database size has hit the platform limit. The limit may be reached during normal operation if a xTR discovers a large number of dynamic hosts in the EID-prefix ranges enabled for dynamic learning. If the dynamic local database size limit is reached new hosts will not be discovered. It is worth noting that it is normal for the local database to have a limit for dynamic entries for example to set an upper limit on the amount of memory required. To diagnose this issue it may be helpful to inspect the local database using show ip[v6] lisp [eid-table <vrf>] database. The entries can also be cleared with clear lisp[eid-table <vrf>] dynamic-eid.	-	"If this warning persists and traffic drops are " "experienced please contact TAC."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action

LUA_VM-2-INITIALIZATION	2-Critical	iosxe-shellmgr	Cannot initialize the Lua Virtual Machine	The Lua Virtual Machine is a critical component of the shell-manager process. It is used to render responses to user commands. If this component cannot be initialized then the shell-manager will be unable to process any commands directed at the IOS-XE daemons.	The shell-manager process could not be started. Check the trace log files for more details as to why the virtual machine failed to initialize correctly. This may be an out of memory condition so rebooting the chassis may resolve the problem.

MDR_SM-4-UNBLOCK_RF	4-Warning	MDR SM aborted continuing RF Progression [dec]	The MDR State Machine aborts due to a bug in the MDR State Machine or one of its clients. The RF progression was blocked it will be unblocked to allow the standby to boot	mdr-sm	MDR_SM_LOG_SID_ACTION
MDR_SM-4-UNBLOCK_RF	4-Warning	MDR SM aborted continuing RF Progression [dec]	The MDR State Machine aborts due to a bug in the MDR State Machine or one of its clients. The RF progression was blocked it will be unblocked to allow the standby to boot	mdr-sm	MDR_SM_LOG_SID_ACTION
MDR_SM-4-UNBLOCK_RF	4-Warning	MDR SM aborted continuing RF Progression [dec]	The MDR State Machine aborts due to a bug in the MDR State Machine or one of its clients. The RF progression was blocked it will be unblocked to allow the standby to boot	mdr-sm	MDR_SM_LOG_SID_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
MDR-3-NO_ACTIVE_ESP	3-Error	iosxe-binos-utils	No active ESP was found when initiating Minimal Disruptive Restart	"An unexpected error has occured where no active ESP was found to continue forwarinding traffic during the Minimal Disruptive Restart. All requested linecards and or modules were reset as normal."	"Review the IOSd
MDR-3-NO_SPAS_IN_SIP	3-Error	iosxe-binos-utils	No Minimal Disruptive Restart compatible SPAs found in[chars]	"An unexpected error has occured where the specified linecard that was to undergo Minimal Disruptive Restart did not contain any compatible SPAs. This linecard was reset as normal."	"Review the IOSd
MDR-3-NODE_ISSU_SP_WAIT	3-Error	iosxe-binos-utils	Could not wait for[chars] to complete Minimal Disruptive Restart	"An unexpected error has occured where the specified linecard was performing a Minimal Disruptive Restart using node ISSU	-
MDR-3-NODE_ISSU_SPA_WAIT	3-Error	iosxe-binos-utils	Could not wait for[chars] in[chars] to complete Minimal Disruptive Restart	"An unexpected error has occured where the specified module was performing a Minimal Disruptive Restart using node ISSU	-
MDR-3-READ_COMPAT_INFO	3-Error	iosxe-binos-utils	Failed to read valid Minimal Disruptive Restart compatibility information for[chars]	"An unexpected error has occured where either modules in or the specified linecard itself	-

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
MDR-3-READ_SIP_RESET	3-Error	iosxe-binos-utils	Failed to read a valid Minimal Disruptive Restart reset value for[chars]	"An unexpected error has occured where either modules in or the specified linecard itself	-
MDR-3-RESTART_FAILED	3-Error	iosxe-binos-utils	Failed to perform Minimal Disruptive Restart on[chars]	"An unexpected error has occured where the specified linecard or module failed to undergo a Minimal Disruptive Restart. This linecard or module was reset as normal."	"Review the IOSd
MDR-3-SIP_OFFLINE	3-Error	iosxe-binos-utils	%s is not online to perform Minimal Disruptive Restart	"An unexpected error has occured where the specified linecard was to undergo Minimal Disruptive Restart however the linecard was not found to be online. The linecard was reset as normal."	"Review the IOSd
MDR-3-SOFTWARE_TRANSFER	3-Error	iosxe-binos-utils	Failed to receive upgrade software for[chars]	"An unexpected error has occured where the specified linecard was to undergo Minimal Disruptive Restart however the linecard was not able to receive the upgrade software prior to commencing Minimal Disruptive Restart. The linecard was reset as normal."	"Review the IOSd

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
MDR-3-SPA_BAY_INVALID	3-Error	iosxe-binos-utils	Could not perform Minimal Disruptive Restart on invalid[chars] in[chars]	"An unexpected error has occured where the specified module was to undergo Minimal Disruptive Restart however the module was invalid."	"Review the IOSd
MDR-3-SPA_IS_NOT_READY	3-Error	iosxe-binos-utils	%s in[chars] is not ready to perform Minimal Disruptive Restart	"An unexpected error has occured where the specified module was to undergo Minimal Disruptive Restart however the module was not found to be ready. The module was reset as normal."	"Review the IOSd
MDR-3-SPA_NOT_FOUND	3-Error	iosxe-binos-utils	%s in[chars] could not be found to perform Minimal Disruptive Restart	"An unexpected error has occured where the specified module was to undergo Minimal Disruptive Restart however the module was not found. The module was reset as normal."	"Review the IOSd
MDR-3-SPA_OFFLINE	3-Error	iosxe-binos-utils	%s in[chars] is not online to perform Minimal Disruptive Restart	"An unexpected error has occured where the specified module was to undergo Minimal Disruptive Restart however the module was not found to be online. The module was reset as normal."	"Review the IOSd

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
MDR-3-SPA_TYPE_MISMATCH	3-Error	iosxe-binos-utils	Could not perform Minimal Disruptive Restart on[chars] in[chars] due to a SPA type mismatch	"An unexpected error has occured where the specified module was to undergo Minimal Disruptive Restart however the module's SPA type was found to be different to what was expected. The module was reset as normal."	"Review the IOSd
MDR-3-SPA_WAS_NOT_READY	3-Error	iosxe-binos-utils	%s in[chars] was not ready to perform Minimal Disruptive Restart	"An unexpected error has occured where the specified module was to undergo Minimal Disruptive Restart however the module was not found to be ready at the time it was checked. The module was reset was normal."	"Review the IOSd
MDR-5-CARD_RESTART	5-Notice	iosxe-binos-utils	Minimal Disruptive Restart[chars] to acquire provisioned software	"The FRU specified was not running the currently provisioned software	-
MDR-5-SIP_UNSUPORTED	5-Notice	iosxe-binos-utils	%s does not support Minimal Disruptive Restart	"The linecard specified was restarted during an Minimal Disruptive Restart	-
MDR-5-SPA_UNSUPORTED	5-Notice	iosxe-binos-utils	%s does not support Minimal Disruptive Restart	"The module specified was restarted during an Minimal Disruptive Restart	-
MDS-2-INIT	2-Critical	Error initializing MDS structures	An error has occurred when the system tried to initialize MDS structures	-	LOG_STD_SH_TECH_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended-Action
MDS-2-LC_FAILED_IPC_ACK	2-Critical	RP failed in getting Ack for IPC message of size [dec] to LC in slot [dec] with sequence [dec] error = [chars]	The Route Processor has failed in getting IPC acknowledgement	-	LOG_STD_SH_TECH_ACTION
MDS-2-LC_FAILED_IPC_OPEN	2-Critical	LC in slot [dec] failed to open IPC port to RP error = [chars]	The linecard has failed to open IPC port towards the Route Processor	-	LOG_STD_SH_TECH_ACTION
MDS-2-LC_FAILED_SEND_LC_READY	2-Critical	LC in slot [dec] failed to send LC ready to RP error = [chars]	The linecard has failed to send Ready message to the Route Processor	-	LOG_STD_SH_TECH_ACTION
MDS-2-LC_INIT	2-Critical	Error initializing linecard	System resources could not be allocated on the linecard	-	LOG_STD_SH_TECH_ACTION
MDS-2-LC_INVALID_HWIDB_INDEX	2-Critical	Invalid if_index for HWIDB [chars]	Invalid if_index for HWIDB	-	LOG_STD_SH_TECH_ACTION
MDS-2-LC_INVALID_HWIDB_QSIZE	2-Critical	Invalid Q count value	Invalid Q count value	-	LOG_STD_SH_TECH_ACTION
