VINES-2-CONSISTENCY	2-Critical	Error [chars]	The VINES code ran into a situation that should not happen. For\n\ example an IPC port number needs to be allocated but all 65535 port\n\ numbers are currently in use. Another possible cause is that VINES \n\ attempted to add a cache entry but had no path associated with the \n\ destination address. This may cause temporary slow performance to \n\ only those stations that have experienced this inconsistency \n\ until complete cache entries are added. However connectivity\n\ should not be lost because all data traffic can still be routed \n\ vvia process-level switching.	vines	"Copy the message exactly as it appears and report it your technical\n\ support representative.
