CHAPTER 1

Release Notes CWM 2.1.1 SP

This section contains the following topics:

- CWM v2.1.1 SP Release Notes, on page 1

CWM v2.1.1 SP Release Notes

Intro

Crosswork Workflow Manager 2.1.1 SP is a software hardening release that delivers security updates resulting from an internal review by the Crosswork Workflow Manager engineering team. The review was conducted to identify and address potential security issues and forms part of Cisco's ongoing efforts to maintain product security and quality. For information about Cisco's approach to security vulnerability disclosure and software hardening releases, refer to Cisco's Transition to a Risk-Based Vulnerability Disclosure Model.

We recommend upgrading to this release to incorporate the latest security fixes and improvements into your Crosswork Workflow Manager environment. To review security advisories that apply to this release, refer to Cisco Crosswork Security Hardening Release: August 2026.

Version history

Release date	Version	Release notes
9/Jun/2023	Cisco Crosswork Workflow Manager 1.0	Cisco Crosswork Workflow Manager 1.0 Release Notes
29/Feb/2024	Cisco Crosswork Workflow Manager 1.1	Cisco Crosswork Workflow Manager 1.1 Release Notes
29/Jun/2024	Cisco Crosswork Workflow Manager 1.2	Cisco Crosswork Workflow Manager 1.2 Release Notes
26/May/2025	Cisco Crosswork Workflow Manager 2.0	Cisco Crosswork Workflow Manager 2.0 Release Notes
31/Jan/2026	Cisco Crosswork Workflow Manager 2.1	Cisco Crosswork Workflow Manager 2.1 Release Notes

Release date	Version	Release notes
20/Aug/2026	Cisco Crosswork Workflow Manager 2.1.1 SP	Current ones

What's new

Cisco Crosswork Workflow Manager 2.1.1 SP is the latest release in the 2.1 release family. This release includes the features and enhancements previously introduced in releases 2.1 and 2.1.1, in addition to the updates delivered with 2.1.1 SP. If you are currently running release 2.1 or 2.1.1, we recommend that you upgrade to 2.1.1 SP. For upgrade requirements and procedures, refer to the Cisco Crosswork Workflow Manager 2.1.x Installation Guide.The feature information in these Release Notes is cumulative. Features identified as introduced in 2.1 or 2.1.1 continue to be supported in 2.1.1 SP.

Bug fixes

This section describes the bugfixes introduced in releases 2.1.1. These features are also available in 2.1.1 SP. No new software features are introduced in 2.1.1 SP.

CDETS ID	Description
CSCwt42277	Addressed security vulnerabilities by upgrading the Go runtime to a supported version.
N/A	Fixed intermittent errors where event definitions could not be retrieved from the database.
N/A	Fixed an issue where workflows triggered by events could miss the initial event signal, causing workflow execution to time out.
N/A	Fixed an issue where workflows terminated unexpectedly when a parallel state branch failed with panic caused by nil pointer dereference, instead of failing gracefully.
N/A	Fixed an issue in the installation script where a hardcoded configuration file path caused failures when running outside the build environment.
N/A	Improved application stability by limiting retries for State Data Processor local activities.
N/A	Fixed an issue with secrets handling for HTTP events.

Recommended system requirements (for XLarge VM size)

Resource	Value	Unit
vCPUs	24	cores
CPU Reservation	3.2	GHz
Memory	128	GB
Storage	1	TB

Supported versions

Component	Supported Version(s)
Hypervisor	VMware vCenter Server 7.0 (U3p or later), ESXi 7.0 (U3p or later)
Browsers	Latest versions supported. Tested versions: Chrome 135 Safari 18.4 Edge 135 Firefox 137
NSO Adapter	Minimum supported NSO release: 6.2.2 (Validated with 6.4)
JSON	Version 7
Kafka	Version 3.3.2
CloudEvents	Version 1.0.2
OpenAPI	Version 2.0

Supported upgrade paths

Current release	Target release	Action
2.0.2	2.1.1 SP	Upgrade to 2.1.1 SP
2.1	2.1.1 SP	Upgrade to 2.1.1 SP
New deployment	2.1.1 SP	Perform a fresh installation
