

New Features in Cisco IOS XE 17.8.1

This chapter contains the following sections:

- Support 5G Sub-6 GHz Pluggable Interface Module, on page 1

Support 5G Sub-6 GHz Pluggable Interface Module

The 5G Sub-6 GHz Pluggable Interface Module offers 5G capability to the IoT Industrial Router family. The product ID for the pluggable module is P-5GS6-GL. The IR8340 router supports P-5GS6-GL from Cisco IOS XE Release 17.8.1. On the IR8340, the cellular modems are accessible via Cellular 0/4/0, 0/4/1, 0/5/0, 0/5/1.

For more information on P-5GS6-GL module, see the 5G Sub-6 GHz Pluggable Interface Module chapter of *Cisco Catalyst IR1800 Rugged Series Router Hardware Installation Guide*.
