

Compatibility Matrix

What's changing

We have transitioned compatibility information to a new Compatibility Matrix Tool.

Why the new tool

The tool is aimed at improving the way we manage, access, and update compatibility information. The tool delivers a more streamlined, user-friendly experience with real-time updates and better searchability.

What the tool offers

The Compatibility Matrix Tool provides up-to-date information on Cisco Catalyst SD-WAN Control Components and device compatibility, enabling users to quickly determine which devices are supported by specific control components.

For additional release information, see Cisco SD-WAN Release Notes.
