

Lookups

The following topics explain how to look up information about entities that may or may not be known to the system:

- Lookups in Firewall Management Center, on page 1
- Lookup IP address details using Whois, on page 1

Lookups in Firewall Management Center

Lookup IP address details using Whois

Use Whois lookups to investigate the ownership and registration details of an IP address for security and network analysis.

Procedure

Step 1 Choose **Analysis** > **Advanced** > **Whois**.

Step 2 Enter an IP address you want to investigate and click **Search**.
