Cisco Secure Firewall Threat Defense Release Notes, Version 7.2.x

First Published: 2022-06-06

Last Modified: 2026-09-16

Cisco Secure Firewall Threat Defense Release Notes

This document contains release information for:

- Cisco Secure Firewall Threat Defense
- Cisco Secure Firewall Management Center (on-prem)
- Cisco Secure Firewall Device Manager

For cloud deployments, see the Release Notes for Cloud-Delivered Firewall Management Center or *What's New for Security Cloud Control*.

Release Dates

Table 1: Version 7.2 Dates

Version	Build	Date	Platforms
7.2.12	90	2026-09-15	All
7.2.11	313	2026-02-17	All
7.2.10.2	2	2025-09-25	All
7.2.10.1	10	2025-09-4	Firewall Management Center
7.2.10	210	2025-05-22	All
7.2.9	44	2024-10-22	All
7.2.8.1	17	2024-08-26	All
7.2.8	25	2024-06-24	All
7.2.7	500	2024-04-29	All
7.2.6	168	2024-04-22	No longer available.
	167	2024-03-19	No longer available.
7.2.5.2	4	2024-05-06	All

Version	Build	Date	Platforms
7.2.5.1	29	2023-11-14	All
7.2.5	208	2023-07-27	All
7.2.4.1	43	2023-07-27	All
7.2.4	169	2023-05-10	Firewall Management Center
	165	2023-05-03	Devices
7.2.3.1	13	2023-04-18	Firewall Management Center
7.2.3	77	2023-02-27	All
7.2.2	54	2022-11-29	All
7.2.1	40	2022-10-03	All
7.2.0.1	12	2022-08-10	All
7.2.0	82	2022-06-06	All

Compatibility

Before you upgrade or reimage, make sure the target version is compatible with your deployment. If you cannot upgrade or reimage due to incompatibility, contact your Cisco representative or partner contact for refresh information. For compatibility, see *Cisco Secure Firewall Threat Defense Compatibility Guide*.

For compatibility, see:

- *Cisco Secure Firewall Management Center Compatibility Guide*
- *Cisco Secure Firewall Threat Defense Compatibility Guide*

Features

For features in earlier releases, see *Cisco Secure Firewall Management Center New Features by Release* and *Cisco Secure Firewall Device Manager New Features by Release*.

Upgrade Impact

A feature has upgrade impact if upgrading and deploying can cause the system to process traffic or otherwise act differently without any other action on your part. This is especially common with new threat detection and application identification capabilities. A feature can also have upgrade impact if upgrading requires that you take action before or after upgrade to avoid an undesirable outcome; for example, if you must change a configuration.

The feature descriptions here include upgrade impact where appropriate. For a more complete list of features with upgrade impact by version, see Upgrade Impact Features, on page 34.

Features in Maintenance Releases

Features, enhancements, and critical fixes included in maintenance releases (third-digit) and patches (fourth-digit) can skip future releases, depending on release date, release type (short term vs. long term), and other factors. Minimize upgrade and other impact by going directly to the latest maintenance release in your chosen version. See Choosing your upgrade target, on page 41.

If you are using the web interface in a language other than English, features introduced in maintenance releases and patches may not be translated until the next major release.

Snort Features

Snort 3 is the default inspection engine for Firewall Threat Defense. Snort 3 features for Firewall Management Center deployments also apply to Firewall Device Manager, even if they are not listed as new Firewall Device Manager features. However, keep in mind that the Firewall Management Center may offer more configurable options than Firewall Device Manager.

Important Snort 2 is deprecated in Version 7.7+, and prevents Firewall Threat Defense upgrade. If you are still using Snort 2 on older devices, switch to Snort 3 for improved detection and performance.

Intrusion Rules and Keywords

Upgrades can import and auto-enable new and updated intrusion rules and preprocessor rules, modified states for existing rules, and modified default intrusion policy settings. If a newer intrusion rule uses keywords that are not supported in your current version, that rule is not imported when you update the SRU/LSP. After you upgrade and those keywords become supported, the new intrusion rules are imported and, depending on your IPS configuration, can become auto-enabled and thus start generating events and affecting traffic flow.

For details on new keywords, see the Snort release notes: https://www.snort.org/downloads.

FlexConfig

Upgrades can add web interface or Smart CLI support for features that previously required FlexConfig. Although you cannot newly assign or create FlexConfig objects using deprecated commands, in most cases existing FlexConfigs continue to work and you can still deploy. However, sometimes, using deprecated commands can cause deployment issues. The upgrade does not convert FlexConfigs. After upgrade, configure the newly supported features in the web interface or Smart CLI. When you are satisfied with the new configuration, delete the deprecated FlexConfigs.

The feature descriptions here include information on deprecated FlexConfigs when appropriate. For a full list of deprecated FlexConfigs, see your configuration guide.

Integrations and Logging

These integrations and logging facilities may have new features associated with threat defense and management center releases:

- Syslog: *Cisco Secure Firewall Threat Defense Syslog Messages*
- Cisco Success Network: Cisco Success Network Telemetry Data Collected from Cisco Secure Firewall Management Center

- REST API: *Secure Firewall Management Center REST API Quick Start Guide* and *Cisco Secure Firewall Threat Defense REST API Guide*

Firewall Management Center Features in Version 7.2.12

There are no new features in this release. See Resolved Bugs in Version 7.2.12, on page 45.

Firewall Management Center Features in Version 7.2.11

There are no new features in this release. See Resolved Bugs in Version 7.2.11, on page 46.

Firewall Management Center Features in Version 7.2.10

Table 2: Firewall Management Center Features in Version 7.2.10

Feature	Minimum Management Center	Minimum Threat Defense	Details
Features from Earlier Maintenance Releases			
Features from earlier maintenance releases.	Feature dependent	Feature dependent	Version 7.2.10 also has: • New Cisco AMP cloud connection method. Upgrade impact. (7.0.7) • Deprecated Cisco AMP Cloud connection backups. (7.0.7) • Require the Message-Authenticator attribute in all RADIUS responses. Upgrade impact. (7.0.7) • Updated internet access requirements for Smart Licensing. Upgrade impact. (7.0.8)
Upgrade			
Firewall Threat Defense and chassis upgrade wizards optimized for lower resolution screens.	7.2.10 7.6.0	Any	We optimized the Firewall Threat Defense and chassis upgrade wizards for lower resolution screens (and smaller browser windows). Text appears smaller and certain screen elements are hidden. If you change your resolution or window size mid-session, you may need to refresh the page for the web interface to adjust. Note that the minimum screen resolution to use the Firewall Management Center is 1280 x 720. New/modified screens: • **Devices** > **Threat Defense Upgrade** • **Devices** > **Chassis Upgrade**
Performance			

Feature	Minimum Management Center	Minimum Threat Defense	Details
High-bandwidth encrypted application traffic bypasses unnecessary intrusion inspection.	7.2.10 7.6.1 7.7.0	7.2.10 with Snort 3 7.6.1 with Snort 3 7.7.0	Specific high-bandwidth encrypted application traffic now bypasses unncessary intrusion inspection even if the connection matches an Allow rule. Intrusion rule (LSP) and vulnerability database (VDB) updates can change the applications bypassed but right now they are: AnyConnect, IPsec, iCloud Private Relay, QUIC (including HTTP/3), Webex Media, Secure RTCP.

Firewall Management Center Features in Version 7.2.9

Table 3: Firewall Management Center Features in Version 7.2.9

Feature	Minimum Mnagement Center	Minimum Threat Defense	Details
Features from Earlier Maintenance Releases			
Features from earlier maintenance releases.	Feature dependent	Feature dependent	Version 7.2.9 also has: • Cisco Security Cloud regions: India and Australia. (7.0.7)
Public and Private Cloud			
VMware vSphere/VMware ESXi 8.0 support.	7.2.9 7.4.2 7.6.0	7.2.9 7.4.2 7.6.0	You can now deploy Secure Firewall Threat Defense Virtual and Firewall Management Center Virtual on VMware vSphere/VMware ESXi 8.0. See: Secure Firewall Threat Defense Virtual getting started guides
Access Control: Threat Detection and Application Identification			
Asymmetric traffic handling.	7.2.9 7.4.2 7.6.0	7.2.9 with Snort 3 7.4.2 with Snort 3 7.6.0 with Snort 3	**Upgrade impact. Qualifying connections are now inspected and handled.** In asymmetric routing deployments, Firewall Threat Defense now inspects the side of the connection it sees. No additional configurations are required.

Firewall Management Center Features in Version 7.2.8

Table 4: Firewall Management Center Features in Version 7.2.8

Feature	Minimum Management Center	Minimum Threat Defense	Details
Platform			
Firewall Threat Defense Virtual for Megaport.	7.2.8 7.3.0	7.2.8 7.3.0	We introduced Firewall Threat Defense Virtual for Megaport (Megaport Virtual Edge). High availability is supported. Clustering is not supported. Version restrictions: Initially, you may not be able to freshly deploy Versions 7.3.x or 7.4.x. Instead, deploy Version 7.2.8–7.2.x and upgrade. See: Secure Firewall Threat Defense Virtual getting started guides

Firewall Management Center Features in Version 7.2.7

There are no new features in this release. See Resolved Bugs in Version 7.2.7, on page 98.

Firewall Management Center Features in Version 7.2.6

Due to CSCwi63113, Version 7.2.6 was deferred on 2024-04-29 and is no longer available for download. If you downloaded it, do not use it. If you are running this version, upgrade. The features listed here are also available in Version 7.2.7.

Table 5: Firewall Management Center Features in Version 7.2.6

Feature	Minimum Management Center	Minimum Threat Defense	Details
Features from Earlier Maintenance Releases			
Features from earlier maintenance releases.	Feature dependent	Feature dependent	Version 7.2.6 also has: • Updated web analytics provider. Upgrade impact. (7.0.6)
Interfaces			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Configure DHCP relay trusted interfaces from the Firewall Management Center web interface.	7.2.6 7.4.1	Any	**Upgrade impact. Redo any related FlexConfigs after upgrade.** You can now use the Firewall Management Center web interface to configure interfaces as trusted interfaces to preserve DHCP Option 82. If you do this, these settings override any existing FlexConfigs, although you should remove them. DHCP Option 82 is used by downstream switches and routers for DHCP snooping and IP Source Guard. Normally, if the Firewall Threat Defense DHCP relay agent receives a DHCP packet with Option 82 already set, but the giaddr field (which specifies the DHCP relay agent address that is set by the relay agent before it forwards the packet to the server) is set to 0, then Firewall Threat Defense will drop that packet by default. You can preserve Option 82 and forward the packet by identifying an interface as a trusted interface. New/modified screens: **Devices** > **Device Management** > **Add/Edit Device** > **DHCP** > **DHCP Relay** See: Configure the DHCP Relay Agent
NAT			
Create network groups while editing NAT rules.	7.2.6 7.4.1	Any	You can now create network groups in addition to network objects while editing a NAT rule. See: Customizing NAT Rules for Multiple Devices
High Availability/Scalability: Threat Defense			
Reduced "false failovers" for Firewall Threat Defense high availability.	7.2.6 7.4.0	7.2.6 7.4.0	See: Heartbeat Module Redundancy
High Availability: Management Center			
Single backup file for high availability Firewall Management Centers.	7.2.6 7.4.1	Any	When performing a configuration-only backup of the active Firewall Management Center in a high availability pair, the system now creates a single backup file which you can use to restore either unit. See: Unified Backup of Management Centers in High Availability
Event Logging and Analysis			
Open the packet tracer from the unified event viewer.	7.2.6 7.4.1	Any	You can now open the packet tracer from the unified event view (**Analysis** > **Unified Events**). Click the ellipsis icon (**...**) next to the desired event and click **Open in Packet Tracer**. Version restrictions: In Version 7.2.x, use the Expand icon (>) icon instead of the ellipsis icon. See: Working with the Unified Event Viewer
Health Monitoring			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Health alerts for excessive disk space used by deployment history (rollback) files.	7.2.6 7.4.1	Any	The Disk Usage health module now alerts if deployment history (rollback) files are using excessive disk space on the Firewall Management Center. Deploy the Firewall Management Center health policy after upgrade. See: Disk Usage for Device Configuration History Files Health Alert
Health alerts for NTP sync issues.	7.2.6 7.4.1	Any	A new Time Server Status health module reports issues with NTP synchronization. Deploy the Firewall Management Center health policy after upgrade. See: Time Synchronization and Health Modules
Deployment and Policy Management			
View and generate reports on configuration changes since your last deployment.	7.2.6 7.4.1	Any	You can generate, view, and download the reports as a zip file on configuration changes since your last deployment: • A *policy changes* report for each device that previews the additions, changes, or deletions in the policy, or the objects that are to be deployed on the device. • A *consolidated* report that categorizes each device based on the status of policy changes report generation. This is especially useful after you upgrade either the Firewall Management Center or Firewall Threat Defense, so that you can see the changes made by the upgrade before you deploy. New/modified screens: **Deploy** > **Advanced Deploy**. See: Download Policy Changes Report for Multiple Devices
Set the number of deployment history files to retain for device rollback.	7.2.6 7.4.1	Any	You can now set the number of deployment history files to retain for device rollback, up to ten (the default). This can help you save disk space on the Firewall Management Center. New/modified screens: **Deploy** > **Deployment History** > **Deployment Setting** > **Configuration Version Setting** See: Set the Number of Configuration Versions
Upgrade			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Improved upgrade starting page and package management.	7.2.6 7.4.1	Any	A new upgrade page makes it easier to choose, download, manage, and apply upgrades to your entire deployment. This includes the Firewall Management Center, Firewall Threat Defense, and any older NGIPSv/ASA FirePOWER devices. The page lists all upgrade packages that apply to your current deployment, with suggested releases specially marked. You can easily choose and direct-download packages from Cisco, as well as manually upload and delete packages. Internet access is required to retrieve the list/direct download upgrade packages. Otherwise, you are limited to manual management. Patches are not listed unless you have at least one appliance at the appropriate maintenance release (or you manually uploaded the patch). You must manually upload hotfixes. New/modified screens: • **System**(⚙) > **Product Upgrades** is now where you upgrade the Firewall Management Center and all managed devices, as well as manage upgrade packages. • **System**(⚙) > **Content Updates** is now where you update intrusion rules, the VDB, and the GeoDB. • **Devices** > **Threat Defense Upgrade** takes you directly to the Firewall Threat Defense upgrade wizard. • **System**(⚙) > **Users** > **User Role** > **Create User Role** > **Menu-Based Permissions** allows you to grant access to **Content Updates** (VDB, GeoDB, intrusion rules) without allowing access to **Product Upgrades** (system software). Deprecated screens/options: • **System**(⚙) > **Updates** is deprecated. All Firewall Threat Defense upgrades now use the wizard. • The **Add Upgrade Package** button on the Firewall Threat Defense upgrade wizard has been replaced by a **Manage Upgrade Packages** link to the new upgrade page. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
Enable revert from the Firewall Threat Defense upgrade wizard.	7.2.6 7.4.1	Any, if upgrading to 7.1+	You can now enable revert from the Firewall Threat Defense upgrade wizard. Version restrictions: You must be upgrading Firewall Threat Defense to Version 7.1+. Not supported with Firewall Management Center Version 7.3.x or 7.4.0. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center

Feature	Minimum Management Center	Minimum Threat Defense	Details
Select devices to upgrade from the Firewall Threat Defense upgrade wizard.	7.2.6 7.3.0	Any	Use the wizard to select devices to upgrade. You can now use the Firewall Threat Defense upgrade wizard to select or refine the devices to upgrade. On the wizard, you can toggle the view between selected devices, remaining upgrade candidates, ineligible devices (with reasons why), devices that need the upgrade package, and so on. Previously, you could only use the Device Management page and the process was much less flexible. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
View detailed upgrade status from the Firewall Threat Defense upgrade wizard.	7.2.6 7.4.1	Any	The final page of the Firewall Threat Defense upgrade wizard now allows you to monitor upgrade progress. This is in addition to the existing monitoring capability on the Upgrade tab on the Device Management page, and on the Message Center. Note that as long as you have not started a new upgrade flow, **Devices** > **Threat Defense Upgrade** brings you back to this final wizard page, where you can view the detailed status for the current (or most recently complete) device upgrade. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
Unattended Firewall Threat Defense upgrades.	7.2.6 7.3.0	Any	The Firewall Threat Defense upgrade wizard now supports unattended upgrades, using a new **Unattended Mode** menu. You just need to select the target version and the devices you want to upgrade, specify a few upgrade options, and step away. You can even log out or close the browser. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
Simultaneous Firewall Threat Defense upgrade workflows by different users.	7.2.6 7.3.0	Any	We now allow simultaneous upgrade workflows by different users, as long as you are upgrading different devices. The system prevents you from upgrading devices already in someone else's workflow. Previously, only one upgrade workflow was allowed at a time across all users. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
Skip pre-upgrade troubleshoot generation for Firewall Threat Defense.	7.2.6 7.3.0	Any	You can now skip the automatic generating of troubleshooting files before major and maintenance upgrades by disabling the new **Generate troubleshooting files before upgrade begins** option. This saves time and disk space. To manually generate troubleshooting files for a Firewall Threat Defense device, choose **System**(⚙) > **Health** > **Monitor**, click the device in the left panel, then **View System & Troubleshoot Details**, then **Generate Troubleshooting Files**. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center

Feature	Minimum Management Center	Minimum Threat Defense	Details
Suggested release notifications.	7.2.6 7.4.1	Any	The Firewall Management Center now notifies you when a new suggested release is available. If you don't want to upgrade right now, you can have the system remind you later, or defer reminders until the next suggested release. The new upgrade page also indicates suggested releases. See: *Cisco Secure Firewall Management Center New Features by Release*
New upgrade wizard for the Firewall Management Center.	7.2.6 7.4.1	Any	A new upgrade starting page and wizard make it easier to perform Firewall Management Center upgrades. After you use **System**(⚙) > **Product Upgrades** to get the appropriate upgrade package onto the Firewall Management Center, click **Upgrade** to begin. Version restrictions: Only supported for Firewall Management Center upgrades from Version 7.2.6+/7.4.1+. Not supported for upgrades from Version 7.3.x or 7.4.0. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
Hotfix high availability Firewall Management Centers without pausing synchronization.	7.2.6 7.4.1	Any	Unless otherwise indicated by the hotfix release notes or Cisco TAC, you do not have to pause synchronization to install a hotfix on high availability Firewall Management Centers. See: Secure Firewall Threat Defense upgrade guides for Firewall Management Center
Administration			
Updated internet access requirements for direct-downloading software upgrades.	7.2.6 7.4.1	Any	**Upgrade impact. The system connects to new resources.** The Firewall Management Center has changed its direct-download location for software upgrade packages from sourcefire.com to amazonaws.com. See: Security, Internet Access, and Communication Ports
Usability, Performance, and Troubleshooting			
Enable/disable access control object optimization.	7.2.6 7.4.1	Any	You can now enable and disable access control object optimization from the Firewall Management Center web interface. New/modified screens: **System**(⚙) > **Configuration** > **Access Control Preferences** > **Object Optimization** Version restrictions: Access control object optimization is automatically enabled on all Firewall Management Centers upgraded or reimaged to Versions 7.2.4–7.2.5 and 7.4.0, and automatically disabled on all Firewall Management Centers upgraded or reimaged to Version 7.3.x. It is configurable and enabled by default for Firewall Management Centers reimaged to Version 7.2.6+/7.4.1+, but respects your current setting when you upgrade to those releases. See: Access Control Preferences and.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Cluster control link ping tool.	7.2.6 7.4.1	Any	You can check to make sure all the cluster nodes can reach each other over the cluster control link by performing a ping. One major cause for the failure of a node to join the cluster is an incorrect cluster control link configuration; for example, the cluster control link MTU may be set higher than the connecting switch MTUs. New/modified screens: **Devices** > **Device Management** > **More** > **Cluster Live Status.** See: Perform a Ping on the Cluster Control Link
Snort 3 restarts when it uses too much memory, which can trigger HA failover.	7.2.6 7.4.1	7.2.6 with Snort 3 7.4.1 with Snort 3	To improve continuity of operations, excessive memory use by Snort can now trigger high availability failover. This happens because Snort 3 now restarts if the process uses too much memory. Restarting the Snort process briefly interrupts traffic flow and inspection on the device, and in high availability deployments can trigger failover. (In a standalone deployment, interface configurations determine whether traffic drops or passes without inspection during the interruption.) This feature is enabled by default. You can use the CLI to disable it, or configure the memory threshold. Platform restrictions: Not supported with clustered devices. New/modified CLI commands: **configure snort3 memory-monitor**, **show snort3 memory-monitor-status** See: *Cisco Secure Firewall Threat Defense Command Reference*
Set the frequency of Snort 3 core dumps.	7.2.6 7.4.1	7.2.6 with Snort 3 7.4.1 with Snort 3	You can now set the frequency of Snort 3 core dumps. Instead of generating a core dump every time Snort crashes, you can generate one the next time Snort crashes only. Or, generate one if a crash has not occurred in the last day, or week. Snort 3 core dumps are disabled by default for standalone devices. For high availability and clustered devices, the default frequency is now once per day instead of every time. New/modified CLI commands: **configure coredump snort3**, **show coredump** See: *Cisco Secure Firewall Threat Defense Command Reference*
Capture dropped packets with the Secure Firewall 3100/4200.	7.2.6 7.4.1	7.2.6 (no 4200) 7.4.1	Packet losses resulting from MAC address table inconsistencies can impact your debugging capabilities. The Secure Firewall 3100/4200 can now capture these dropped packets. New/modified CLI commands: [**drop** { **disable** | **mac-filter** }] in the **capture** command. See: *Cisco Secure Firewall Threat Defense Command Reference*
Deprecated Features			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Deprecated: DHCP relay trusted interfaces with FlexConfig.	7.2.6 7.4.1	Any	**Upgrade impact. Redo any related FlexConfigs after upgrade.** You can now use the Firewall Management Center web interface to configure interfaces as trusted interfaces to preserve DHCP Option 82. If you do this, these settings override any existing FlexConfigs, although you should remove them. See: Configure the DHCP Relay Agent

Firewall Management Center Features in Version 7.2.5

Table 6: Firewall Management Center Features in Version 7.2.5

Feature	Minimum Management Center	Minimum Threat Defense	Details
Interfaces			
Management center detects interface sync errors.	7.2.5 7.4.1	Any	**Upgrade impact. You may need to sync interfaces after upgrade.** In some cases, the Firewall Management Center can be missing a configuration for an interface even though the interface is correctly configured and functioning on the device. If this happens, and your Firewall Management Center is running: • Version 7.2.5: Deploy is blocked until you edit the device and sync from the Interfaces page • Version 7.2.6+/7.4.1+: Deploy is allowed with a warning, but you cannot edit interface settings without syncing first. See: Sync Interface Changes with the Management Center

Firewall Management Center Features in Version 7.2.4

Table 7: Firewall Management Center Features in Version 7.2.4

Feature	Minimum Management Center	Minimum Threat Defense	Details
Features from Earlier Maintenance Releases			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Features from earlier maintenance releases.	Feature dependent	Feature dependent	Version 7.2.4 also has: • Automatically update CA bundles. Upgrade impact. (7.0.5) • Smaller VDB for lower memory Snort 2 devices. (7.0.6) • Deprecated: `high unmanaged disk usage` alerts. (7.0.6)
Interfaces			
Default Forward Error Correction (FEC) on Secure Firewall 3100 fixed ports changed to Clause 108 RS-FEC from Clause 74 FC-FEC for 25 GB+ SR, CSR, and LR transceivers.	7.2.4 7.3.0	Any	When you set the FEC to Auto on the Secure Firewall 3100 fixed ports, the default type is now set to Clause 108 RS-FEC instead of Clause 74 FC-FEC for 25 GB+ SR, CSR, and LR transceivers. See: Interface Overview.
Performance			
Access control performance improvements (object optimization).	7.2.4 7.4.0	Any	**Upgrade impact. First deployment after Firewall Management Center upgrade to 7.2.4–7.2.5 or 7.4.0 can take a long time and increase CPU use on managed devices.** Access control object optimization improves performance and consumes fewer device resources when you have access control rules with overlapping networks. The optimizations occur on the *managed device* on the first deploy after the feature is enabled on the Firewall Management Center (including if it is enabled by an upgrade). If you have a high number of rules, the system can take several minutes to an hour to evaluate your policies and perform object optimization. During this time, you may also see higher CPU use on your devices. A similar thing occurs on the first deploy after the feature is disabled (including if it is disabled by upgrade). After this feature is enabled or disabled, we recommend you deploy when it will have the least impact, such as a maintenance window or a low-traffic time. New/modified screens (requires Version 7.2.6): **System**(⚙) > **Configuration** > **Access Control Preferences** > **Object-group optimization**. See: Access Control Preferences

Firewall Management Center Features in Version 7.2.3

Table 8: Firewall Management Center Features in Version 7.2.3

Feature	Minimum Management Center	Minimum Threat Defense	Details
Firepower 1010E.	7.2.3.1 7.3.1.1 7.4.1	7.2.3 7.4.1	We introduced the Firepower 1010E, which does not support power over Ethernet (PoE). Do not use a Version 7.2.3 or Version 7.3.0 Firewall Management Center to manage the Firepower 1010E. Instead, use a Version 7.2.3.1+ or Version 7.3.1.1+ Firewall Management Center. See: Regular Firewall Interfaces

Firewall Management Center Features in Version 7.2.2

There are no new features in this release. See Resolved Bugs in Version 7.2.2, on page 164.

Firewall Management Center Features in Version 7.2.1

Table 9: Firewall Management Center Features in Version 7.2.1

Feature	Minimum Management Center	Minimum Threat Defense	Details
Hardware bypass ("fail-to-wire") network modules for the Secure Firewall 3100.	7.2.1 7.3.0	7.2.1	We introduced these hardware bypass network modules for the Secure Firewall 3100: • 6-port 1G SFP Hardware Bypass Network Module, SX (multimode) (FPR-X-NM-6X1SX-F) • 6-port 10G SFP Hardware Bypass Network Module, SR (multimode) (FPR-X-NM-6X10SR-F) • 6-port 10G SFP Hardware Bypass Network Module, LR (single mode) (FPR-X-NM-6X10LR-F) • 6-port 25G SFP Hardware Bypass Network Module, SR (multimode) (FPR-X-NM-X25SR-F) • 6-port 25G Hardware Bypass Network Module, LR (single mode) (FPR-X-NM-6X25LR-F) • 8-port 1G Copper Hardware Bypass Network Module, RJ45 (copper) (FPR-X-NM-8X1G-F) New/modified screens: **Devices > Device Management > Interfaces > Edit Physical Interface** For more information, see Inline Sets and Passive Interfaces.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Intel Ethernet Network Adapter E810-CQDA2 driver with Firewall Threat Defense Virtual for KVM.	7.2.1 7.3.0	7.2.1	We now support the Intel Ethernet Network Adapter E810-CQDA2 driver with Firewall Threat Defense Virtual for KVM. For more information, see Getting Started with Secure Firewall Threat Defense Virtual and KVM.

Firewall Management Center Features in Version 7.2.0

Table 10: Firewall Management Center Features in Version 7.2.0

Feature	Minimum Management Center	Minimum Threat Defense	Details
Features from Earlier Maintenance Releases			
Features from earlier maintenance releases.	Feature dependent	Feature dependent	Version 7.2.0 also has: • ISA 3000 support for shutting down. (7.0.2) • Improved SecureX integration, SecureX orchestration. Upgrade impact. (7.0.2) • Web interface changes: SecureX, threat intelligence, and other integrations. (7.0.2) • Threat defense support for Cloud-Delivered Firewall Management Center. (7.0.3)
Platform			
Management center virtual for Alibaba.	7.2.0	Any	We introduced Secure Firewall Management Center Virtual for Alibaba Cloud.
Threat defense virtual for Alibaba.	7.2.0	7.2.0	We introduced Secure Firewall Threat Defense for Alibaba Cloud. You must use Firewall Management Center; device manager is not supported. Note that due to underlying issues in the Alibaba infrastructure, the Firewall Threat Defense Virtual instance type ecs.g5ne.4xLarge has low performance, especially in terms of connections per second (CPS). We recommend the 2xlarge or 4xlarge.
Snapshots allow quick deploy of Firewall Threat Defense Virtual for AWS and Azure.	7.2.0	7.2.0	You can now take a snapshot of a Firewall Threat Defense Virtual for AWS or Azure instance, then use that snapshot to quickly deploy new instances. This feature also improves the performance of the autoscale solutions for AWS and Azure. For more information, see the Secure Firewall Threat Defense Virtual getting started guides.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Analytics mode for cloud-managed Firewall Threat Defense.	7.2.0	7.0.3 7.2.0	Concurrently with Version 7.2, we introduced the Cloud-Delivered Firewall Management Center, which uses the Security Cloud Control platform and unites management across multiple Cisco security solutions. We take care of feature updates. On-prem hardware and virtual Firewall Management Centers running Version 7.2+ can "co-manage" cloud-managed Firewall Threat Defense, but for event logging and analytics purposes only. You cannot deploy policy to these devices from an on-prem Firewall Management Center. New/modified screens: • When you add a cloud-managed device to an on-prem Firewall Management Center, use the new **CDO Managed Device** check box to specify that it is analytics-only. • View which devices are analytics-only on **Devices > Device Management**. New/modified CLI commands: **configure manager add**, **configure manager delete**, **configure manager edit**, **show managers** For more information, see *Cisco Security Cloud Control: Cloud-Delivered Firewall Management Center for Firewall Threat Defense*.
High Availability/Scalability: Threat Defense			
Clustering for Firewall Threat Defense Virtual in both public and private clouds.	7.2.0	7.2.0	You can now configure clustering for the following Firewall Threat Defense Virtual platforms: • Threat defense virtual for AWS: 16-node clusters • Threat defense virtual for GCP: 16-node clusters • Threat defense virtual for KVM: 4-node clusters • Threat defense virtual for VMware: 4-node clusters New/modified screens: • **Devices > Device Management > Add Cluster** • **Devices > Device Management > More** menu • **Devices > Device Management > Cluster** For more information, see Clustering for Threat Defense Virtual in a Public Cloud (AWS, GCP) or Clustering for Threat Defense Virtual in a Private Cloud (KVM, VMware).

Feature	Minimum Management Center	Minimum Threat Defense	Details
16-node clusters for the Firepower 4100/9300, and for Firewall Threat Defense Virtual for AWS and GCP.	7.2.0	7.2.0	You can now configure 16-node clusters for the Firepower 4100/9300, and for Firewall Threat Defense Virtual for AWS and GCP. Note that the Secure Firewall 3100 still only supports 8 nodes. For more information, see Clustering for the Firepower 4100/9300 or Clustering for Threat Defense Virtual in a Public Cloud.
High availability for Firewall Threat Defense Virtual for Nutanix.	7.2.0	7.2.0	We now support high availability for Firewall Threat Defense Virtual for Nutanix. For more information, see the Secure Firewall Threat Defense Virtual getting started guides.
Autoscale for Firewall Threat Defense Virtual for AWS gateway load balancers.	7.2.0	7.2.0	We now support autoscale for Firewall Threat Defense Virtual for AWS gateway load balancers, using a CloudFormation template. For more information, see the Secure Firewall Threat Defense Virtual getting started guides.
Autoscale for Firewall Threat Defense Virtual for GCP.	7.2.0	7.2.0	**Upgrade impact. Threat defense virtual for GCP cannot upgrade across Version 7.2.0.** We now support autoscale for Firewall Threat Defense Virtual for GCP, by positioning a Firewall Threat Defense Virtual instance group between a GCP internal load balancer (ILB) and a GCP external load balancer (ELB). Version restrictions: Due to interface changes required to support this feature, Firewall Threat Defense Virtual for GCP upgrades cannot cross Version 7.2.0. That is, you cannot upgrade to Version 7.2.0+ from Version 7.1.x and earlier. You must deploy a new instance and redo any device-specific configurations. For more information, see the Secure Firewall Threat Defense Virtual getting started guides.
Interfaces			
LLDP support for the Firepower 2100 and Secure Firewall 3100.	7.2.0	7.2.0	You can now enable Link Layer Discovery Protocol (LLDP) for Firepower 2100 and Secure Firewall 3100 series interfaces. New/modified screens: **Devices** > **Device Management** > **Interfaces >** > **Hardware Configuration** > **LLDP** New/modified commands: **show lldp status**, **show lldp neighbors**, **show lldp statistics** For more information, see Interface Overview.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Pause frames for flow control for the Secure Firewall 3100.	7.2.0	7.2.0	If you have a traffic burst, dropped packets can occur if the burst exceeds the buffering capacity of the FIFO buffer on the NIC and the receive ring buffers. Enabling pause frames for flow control can alleviate this issue. New/modified screens: **Devices > Device Management > Interfaces > Hardware Configuration > Network Connectivity** For more information, see Interface Overview.
Breakout ports for the Secure Firewall 3130 and 3140.	7.2.0	7.2.0	You can now configure four 10 GB breakout ports for each 40 GB interface on the Secure Firewall 3130 and 3140. New/modified screens: **Devices > Device Management > Chassis Operations** For more information, see Interface Overview.
Configure VXLAN from the Firewall Management Center web interface.	7.2.0	Any	**Upgrade impact. Redo FlexConfigs after upgrade.** You can now use the Firewall Management Center web interface to configure VXLAN interfaces. VXLANs act as Layer 2 virtual network over a Layer 3 physical network to stretch the Layer 2 network. If you configured VXLAN interfaces with FlexConfig in a previous version, they continue to work. In fact, FlexConfig takes precedence in this case—if you redo your VXLAN configurations in the web interface, remove the FlexConfig settings. New/modified screens: • Configure the VTEP source interface: **Devices** > **Device Management** > **VTEP** • Configure the VNI interface: **Devices** > **Device Management** > **Interfaces** > **Add VNI Interface** For more information, see Regular Firewall Interfaces.
NAT			
Enable, disable, or delete more than one NAT rule at a time.	7.2.0	Any	You can select multiple NAT rules and enable, disable, or delete them all at the same time. Enable and disable apply to manual NAT rules only, whereas delete applies to any NAT rule. For more information, see Network Address Translation.
VPN			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Certificate and SAML authentication for RA VPN connection profiles.	7.2.0	7.2.0	We now support certificate and SAML authentication for RA VPN connection profiles. You can authenticate a machine certificate or user certificate before a SAML authentication/authorization is initiated. This can be done using DAP certificate attributes along with user specific SAML DAP attributes. New/modified screens: You can now choose **Certificate & SAML** option when choosing the authentication method for the connection profile in an RA VPN policy. For more information, see Remote Access VPN.
Route-based site-to-site VPN with hub and spoke topology.	7.2.0	7.2.0	We added support for route-based site-to-site VPNs in a hub and spoke topology. Previously, that topology only supported policy-based (crypto map) VPNs. New/modified screens: When you add a new VPN topology and choose **Route Based (VTI)**, you can now also choose **Hub and Spoke**. For more information, see Site-to-Site VPNs.
IPsec flow offload for the Secure Firewall 3100.	7.2.0	7.2.0	On the Secure Firewall 3100, IPsec flows are offloaded by default. After the initial setup of an IPsec site-to-site VPN or remote access VPN security association (SA), IPsec connections are offloaded to the field-programmable gate array (FPGA) in the device, which should improve device performance. You can change the configuration using FlexConfig and the **flow-offload-ipsec** command. For more information, see Site-to-Site VPNs.
Routing			
Configure EIGRP from the Firewall Management Center web interface.	7.2.0	Any	**Upgrade impact. Redo FlexConfigs after upgrade.** You can now use the Firewall Management Center web interface to configure EIGRP. Note that you can only enable EIGRP on interfaces belonging to the device's Global virtual router. If you configured EIGRP with FlexConfig in a previous version, the system allows you to deploy post-upgrade, but also warns you to redo your EIGRP configurations in the web interface. When you are satisfied with the new configuration, you can delete the deprecated FlexConfig objects or commands. To help you with this process, we provide a command-line migration tool. New/modified screens: **Devices** > **Device Management** > **Routing** > **EIGRP** For more information, see EIGRP and Migrating FlexConfig policies.
Virtual router support for the Firepower 1010.	7.2.0	7.2.0	You can now configure up to five virtual routers on the Firepower 1010. For more information, see Virtual Routers.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Support for VTIs in user-defined virtual routers.	7.2.0	7.2.0	You can now assign virtual tunnel interfaces to user-defined virtual routers. Previously, you could only assign VTIs to Global virtual routers. New/modified screens: **Devices** > **Device Management** > **Routing** > **Virtual Router Properties** For more information, see Virtual Routers.
Policy-based routing with path monitoring.	7.2.0	7.2.0	You can now use path monitoring to collect the performance metrics (RTT, jitter, packet-lost, and MOS) of a device's egress interfaces. Then, you can use these metrics to determine the best path for policy based routing. New/modified screens: • Enable path monitoring and choose metrics to collect: **Devices** > **Device Management** > **Interfaces** > **Path Monitoring** • Use the new **Interface Ordering** option when you are adding a policy based route and specifying a forwarding action: **Devices** > **Device Management** > **Routing** > **Policy Based Routing** • Monitor path metrics in each device's health monitoring dashboard: **System**(⚙) > **Health** > **Monitor** > add dashboard > **Interface - Path Metrics**. New/modified CLI commands: **show policy route**, **show path-monitoring**, **clear path-monitoring** For more information, see Policy Based Routing.
Threat Intelligence			
DNS-based threat intelligence from Cisco Umbrella.	7.2.0	Any	We now support DNS-based Security Intelligence using regularly updated information from Cisco Umbrella. You can use both a local DNS policy and an Umbrella DNS policy, for two layers of protection. New/modified screens: • Configure connection to Umbrella: **Integration** > **Other Integrations** > **Cloud Services** > **Cisco Umbrella Connection** • Configure Umbrella DNS policy: **Policies** > **DNS** > **Add DNS Policy** > **Umbrella DNA Policy** • Associate Umbrella DNS policy with access control: **Policies** > **Access Control** > **Edit Policy** > **Security Intelligence** > **Umbrella DNS Policy** For more information, see DNS Policies.

Feature	Minimum Management Center	Minimum Threat Defense	Details
IP-based threat intelligence from Amazon GuardDuty.	7.2.0	Any	You can now handle traffic based on malicious IP addresses detected by Amazon GuardDuty, when integrated with management center virtual for AWS. The system consumes this threat intelligence via a custom Security Intelligence feed, or via a regularly updated network object group, which you can then use in your security policies. For more information, see the Secure Firewall Threat Defense Virtual getting started guides.
Access Control: Threat Detection and Application Identification			
Dynamic object management with: • Cloud-delivered Cisco Secure Dynamic Attributes Connector • On-prem Cisco Secure Dynamic Attributes Connector 2.0	7.2.0	Any	Concurrently with Version 7.2, we released the following updates to the Cisco Secure Dynamic Attributes Connector: • Cloud-delivered Cisco Secure Dynamic Attributes Connector (Security Cloud Control-managed service) Supported Firewall Management Centers: Version 7.1+ and the cloud-delivered Firewall Management Center. Supported virtual/cloud workloads: AWS, Azure, Azure service tags, Google Cloud Connector, GitHub, and Office 365. For more information: *Managing the Cisco Secure Dynamic Attributes Connector with Security Cloud Control* chapters in *Cisco Security Cloud Control: Cloud-Delivered Firewall Management Center for Firewall Threat Defense*. • On-prem Cisco Secure Dynamic Attributes Connector 2.0 Supported Firewall Management Centers: Version 7.0+ and the cloud-delivered Firewall Management Center. Supported virtual/cloud workloads: AWS, Azure, Azure service tags, Google Cloud Connector, GitHub, Office 365, and VMware. For more information: Cisco Secure Dynamic Attributes Connector Configuration Guide 2.0.
Bypass inspection or throttle elephant flows on Snort 3 devices.	7.2.0	7.2.0 with Snort 3	You can now detect and optionally bypass inspection or throttle elephant flows. By default, access control policies are set to generate an event when the system sees an unencrypted connection larger than 1 GB/10 sec; the rate limit is configurable. For the Firepower 2100 series, you can detect elephant flows but not bypass inspection or throttle. For devices running Snort 2 and for devices running Version 7.1 and earlier, continue to use Intelligent Application Bypass (IAB). New/modified screens: We added **Elephant Flow Settings** to the access control policy's Advanced tab. For more information, see Elephant Flow Detection.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Encrypted visibility engine enhancements.	7.2.0	7.2.0 with Snort 3	We made the following enhancements to the encrypted visibility engine (EVE): • EVE can detect the operating system used by the host, which is reported in events and the network map. • EVE can detect application traffic by assigning EVE processes that were identified with high confidence to applications, which you can then use in access control rules to control network traffic. (In Version 7.1, you could see EVE processes for connections, but you could not act on that knowledge.) To add additional assignments, create custom applications/custom application detectors. When adding a detection pattern to your custom detector, choose **Encrypted Visibility Engine** as the application. Then, specify the process name and confidence level. • EVE now works with QUIC traffic. The following connection event fields have changed along with these enhancements: TLS Fingerprint Process Name is now Encrypted Visibility Process Name TLS Fingerprint Process Confidence Score is now Encrypted Visibility Process Confidence Score TLS Fingerprint Malware Confidence is now Encrypted Visibility Threat Confidence TLS Fingerprint Malware Confidence Score is now Encrypted Visibility Threat Confidence Score Detection Type: TLS Fingerprint is now Detection Type: Encrypted Visibility This feature now requires a Threat license. For more information, see Access Control Policies and Application Detection.
TLS 1.3 inspection.	7.2.0	7.2.0 with Snort 3	We now support inspection of TLS 1.3 traffic. New/modified screens: We added the **Enable TLS 1.3 Decryption** option to the Advanced Settings tab in SSL policies. Note that this option is disabled by default. For more information, see SSL Policies.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Improved portscan detection.	7.2.0	7.2.0 with Snort 3	With an improved portscan detector, you can easily configure the system to detect or prevent portscans. You can refine the networks you want to protect, set the sensitivity, and so on. For devices running Snort 2 and for devices running Version 7.1 and earlier, continue to use the network analysis policy for portscan detection. New/modified screens: We added **Threat Detection** to the access control policy's Advanced tab. For more information, see Threat Detection.
VBA macro inspection.	7.2.0	7.2.0 with Snort 3	We now support inspection of VBA (Visual Basic for Applications) macros in Microsoft Office documents, which is done by decompressing the macros and matching rules against the decompressed content. By default, VBA macro decompression is disabled in all system-provided network analysis policies. To enable it use the decompress_vba setting in the imap, smtp, http_inspect, and pop Snort 3 inspectors. To configure custom intrusion rules to match against decompressed macros, use the vba_data option. For more information, see the *Snort 3 Inspector Reference* and the Cisco Secure Firewall Management Center Snort 3 Configuration Guide.
Improved JavaScript inspection.	7.2.0	7.2.0 with Snort 3	We improved JavaScript inspection, which is done by normalizing the JavaScript and matching rules against the normalized content. A new normalizer's enhancements include improved white-space normalization, semicolon insertions, cross-site script handling, identifier normalization and dealiasing, just-in-time (JIT) inspection, and the ability to inspect external scripts. By default, the new normalizer is enabled in all system-provided network analysis policies. To tweak performance or disable the feature in a custom network analysis policy, use the js_norm (improved normalizer) and normalize_javascript (legacy normalizer) settings in the https_inspect Snort 3 inspector. To configure custom intrusion rules to match against normalized JavaScript, use the js_data option, for example: `alert tcp any any -> any any (msg:"Script detected!"; js_data; content:"var var_0000=1;"; sid:1000001;)` For more information, see HTTP Inspect Inspector in the *Snort 3 Inspector Reference*, as well as the Cisco Secure Firewall Management Center Snort 3 Configuration Guide.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Improved SMB 3 inspection.	7.2.0	7.2.0 with Snort 3	We now support inspection of SMB 3 traffic in the following situations: • During file server node failover for clusters configured for SMB Transparent Failover. • In multiple file server nodes for clusters using SMB Scale-Out. • Through directory information changes due to SMB Directory Leasing. • Spread across multiple connections due to SMB Multichannel. For more information, see the *Snort 3 Inspector Reference* and the Cisco Secure Firewall Management Center Snort 3 Configuration Guide.
Event Logging and Analysis			
Log security events to multiple Secure Network Analytics on-prem data stores.	7.2.0	7.0.0	When you configure a Secure Network Analytics Data Store (multi-node) integration, you can now add multiple flow collectors for security events. You assign each flow collector to one or more Firewall Threat Defense devices running Version 7.0+. New/modified screens: • Setup: **Integration** > **Security Analytics & Logging** > **Secure Network Analytics Data Store** • Modify: **Integration** > **Security Analytics & Logging** > **Update Device Assignments** This feature requires Secure Network Analytics Version 7.1.4. For more information, see the *Cisco Security Analytics and Logging (On Premises): Firewall Event Integration Guide*.
Database access changes.	7.2.0	Any	We added ten new tables, deprecated one table, and prohibited joins in six tables. We also added fields to various tables for Snort 3 support and to provide timestamps and IP addresses in human-readable format. For more information, see the *What's New* topic in the Cisco Secure Firewall Management Center Database Access Guide, Version 7.2.
eStreamer changes.	7.2.0	Any	A new Python-based reference client has been added to the SDK. Also, you can now request fully qualified events. For more information, see the *What's New* topic in the Cisco Secure Firewall Management Center Event Streamer Integration Guide, Version 7.2.
Deployment and Policy Management			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Auto rollback of a deployment that causes a loss of management connectivity.	7.2.0	7.2.0	You can now enable auto rollback of the configuration if a deployment causes the management connection between the Firewall Management Center and Firewall Threat Defense to go down. Previously, you could only manually roll back a configuration using the **configure policy rollback** command. New/modified screens: • **Devices > Device Management > Device > Deployment Settings** • **Deploy > Advanced Deploy > Preview** • **Deploy > Deployment History > Preview** For more information, see Device Management.
Generate and email a report when you deploy configuration changes.	7.2.0	Any	You can now generate a report for any deploy task. The report contains details about the deployed configuration. New/modified pages: **Deploy** > **Deployment History** ( ) **icon > More** ( )**Generate Report** For more information, see Configuration Deployment.
Access control policy locking.	7.2.0	Any	You can now lock an access control policy to prevent other administrators from editing it. Locking the policy ensures that your changes will not be invalidated if another administrator edits the policy and saves changes before you save your changes. Any user who has permission to modify the access control policy has permission to lock it. We added an icon to lock or unlock a policy next to the policy name while editing the policy. In addition, there is a new permission to allow users to unlock policies locked by other administrators: Override Access Control Policy Lock. This permission is enabled by default in the Administrator, Access Admin, and Network Admin roles. For more information, see Access Control Policies.
Object group search is enabled by default.	7.2.0	Any	The **Object Group Search** setting is now enabled by default when you add a device to the Firewall Management Center. New/modified screens: **Devices** > **Device Management** > **Device** > **Advanced Settings** For more information, see Device Management.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Access control rule hit counts persist over reboot.	7.2.0	7.2.0	Rebooting a managed device no longer resets access control rule hit counts to zero. Hit counts are reset only if you actively clear the counters. In addition, counts are maintained by each unit in an HA pair or cluster separately. You can use the **show rule hits** command to see cumulative counters across the HA pair or cluster, or see the counts per node. New/modified CLI commands: **show rule hits** For more information, see the *Cisco Secure Firewall Threat Defense Command Reference*.
New user interface for the access control policy.	7.2.0	Any	There is a new experimental user interface available for the access control policy. You can continue to use the legacy user interface, or you can try out the new user interface. The new interface has both a table and a grid view for the rules list, the ability to show or hide columns, enhanced search, infinite scroll, a clearer view of the packet flow related to policies associated with the access control policy, and a simplified add/edit dialog box for creating rules. You can freely switch back and forth between the legacy and new user interfaces while editing an access control policy. **Note** The new interface does not have all the features available in the legacy interface, and may have performance issues when displaying a large number of rules. If you experience issues with the new UI, switch back to the legacy UI. Additionally, Cisco TAC welcomes your feedback. If your organization allows it, you can help us improve this feature by making sure web analytics is enabled: **System** (⚙) > **Configuration** > **Web Analytics**. For more information, see Access Control Policies.
Upgrade			

Feature	Minimum Management Center	Minimum Threat Defense	Details
Copy upgrade packages ("peer-to-peer sync") from device to device.	7.2.0	7.2.0	Instead of copying upgrade packages to each device from the Firewall Management Center or internal web server, you can use the Firewall Threat Defense CLI to copy upgrade packages between devices ("peer to peer sync"). This secure and reliable resource-sharing goes over the management network but does not rely on the Firewall Management Center. Each device can accommodate 5 package concurrent transfers. This feature is supported for Version 7.2.x–7.4.x standalone devices managed by the same Version 7.2.x–7.4.x standalone Firewall Management Center. It is not supported for: • Container instances. • Device high availability pairs and clusters. These devices get the package from each other as part of their normal sync process. Copying the upgrade package to one group member automatically syncs it to all group members. • Devices managed by high availability Firewall Management Centers. • Devices in different domains, or devices separated by a NAT gateway. • Devices upgrading from Version 7.1 or earlier, regardless of Firewall Management Center version. • Devices running Version 7.6+. New/modified CLI commands: **configure p2psync enable**, **configure p2psync disable**, **show peers**, **show peer details**, **sync-from-peer**, **show p2p-sync-status**
Auto-upgrade to Snort 3 after successful Firewall Threat Defense upgrade.	7.2.0	7.2.0	When you use a Version 7.2+ Firewall Management Center to upgrade Firewall Threat Defense to Version 7.2+, you can now choose whether to **Upgrade Snort 2 to Snort 3**. After the software upgrade, eligible devices upgrade from Snort 2 to Snort 3 when you deploy configurations. For devices that are ineligible because they use custom intrusion or network analysis policies, we strongly recommend you manually upgrade to Snort 3 for improved detection and performance. For help, see the *Custom Snort 3 Intrusion Policies for Access Control* for your version. Version restrictions: Not supported for Firewall Threat Defense upgrades to Version 7.0.x or 7.1.x.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Upgrade for single-node clusters.	7.2.0	Any	You can now use the device upgrade page (**Devices** > **Device Upgrade**) to upgrade clusters with only one active node. Any deactivated nodes are also upgraded. Previously, this type of upgrade would fail. This feature is not supported from the system updates page (**System** > **Updates**). Hitless upgrades are also not supported in this case. Interruptions to traffic flow and inspection depend on the interface configurations of the lone active unit, just as with standalone devices. Supported platforms: Firepower 4100/9300, Secure Firewall 3100
Administration			
Multiple DNS server groups for resolving DNS requests.	7.2.0	Any	You can configure multiple DNS groups for the resolution of DNS requests from client systems. You can use these DNS server groups to resolve requests for different DNS domains. For example, you could have a catch-all default group that uses public DNS servers, for use with connections to the Internet. You could then configure a separate group to use internal DNS servers for internal traffic, for example, any connection to a machine in the example.com domain. Thus, connections to an FQDN using your organization's domain name would be resolved using your internal DNS servers, whereas connections to public servers use external DNS servers. New/modified screens: **Platform Settings** > **DNS** For more information, see Platform Settings.
Configure certificate validation with Firewall Threat Defense by usage type.	7.2.0	7.2.0	You can now specify the usage types where validation is allowed with the trustpoint (the Firewall Threat Defense device): IPsec client connections, SSL client connections, and SSL server certificates. New/modified screens: We added a **Validation Usage** option to certificate enrollment objects: **Objects** > **Object Manager** > **PKI** > **Cert Enrollment**. For more information, see Object Management.
French language option for web interface.	7.2.0	Any	You can now switch the Firewall Management Center web interface to French. New/modified screens: **System** (⚙) > **Configuration** > **Language** For more information, see System Configuration.

Feature	Minimum Management Center	Minimum Threat Defense	Details
Web interface changes: deployment and user activity integrations.	7.2.0	Any	Version 7.2 changes these Firewall Management Center menu options in all cases. **Deploy > Deployment History** is now **Deploy > Deployment History** (🕘) (bottom right corner) **Deploy > Deployment** is now **Deploy > Advanced Deploy** **Analysis > Users > Active Sessions** is now **Integration > Users > Active Sessions** **Analysis > Users > Users** is now **Integration > Users > Users** **Analysis > Users > User Activity** is now **Integration > Users > User Activity**
Troubleshooting			
Dropped packet statistics for the Secure Firewall 3100.	7.2.0	7.2.0	The new **show packet-statistics** Firewall Threat Defense CLI command displays comprehensive information about non-policy related packet drops. Previously this information required using several commands. For more information, see the *Cisco Secure Firewall Threat Defense Command Reference*.
Deprecated Features			
Deprecated: EIGRP with FlexConfig.	7.2.0	Any	You can now configure EIGRP routing from the Firewall Management Center web interface. You no longer need these FlexConfig objects: Eigrp_Configure, Eigrp_Interface_Configure, Eigrp_Unconfigure, Eigrp_Unconfigure_all. And these associated text objects: eigrpAS, eigrpNetworks, eigrpDisableAutoSummary, eigrpRouterId, eigrpStubReceiveOnly, eigrpStubRedistributed, eigrpStubConnected, eigrpStubStatic, eigrpStubSummary, eigrpIntfList, eigrpAS, eigrpAuthKey, eigrpAuthKeyId, eigrpHelloInterval, eigrpHoldTime, eigrpDisableSplitHorizon. The system does allow you to deploy post-upgrade, but also warns you to redo your EIGRP configurations. To help you with this process, we provide a command-line migration tool. For details, see Migrating FlexConfig Policies .

Feature	Minimum Management Center	Minimum Threat Defense	Details
Deprecated: VXLAN with FlexConfig.	7.2.0	Any	You can now configure VXLAN interfaces from the Firewall Management Center web interface. You no longer need these FlexConfig objects: VxLAN_Clear_Nve, VxLAN_Clear_Nve_Only, VxLAN_Configure_Port_And_Nve, VxLAN_Make_Nve_Only, VxLAN_Make_Vni. And these associated text objects: vxlan_Port_And_Nve, vxlan_Nve_Only, vxlan_Vni. If you configured VXLAN interfaces with FlexConfig in a previous version, they continue to work. In fact, FlexConfig takes precedence in this case—if you redo your VXLAN configurations in the web interface, remove the FlexConfig settings.
Deprecated: Automatic pre-upgrade troubleshooting.	7.2.0	Any	To save time and disk space, the Firewall Management Center upgrade process no longer automatically generates troubleshooting files before the upgrade begins. Note that device upgrades are unaffected and continue to generate troubleshooting files. To manually generate troubleshooting files for the Firewall Management Center, choose **System**(⚙) > **Health** > **Monitor**, click **Firewall Management Center** in the left panel, then **View System & Troubleshoot Details**, then **Generate Troubleshooting Files**.
Deprecated: Geolocation details.	Any	Any	We no longer provide the geolocation IP package, which contained contextual data associated with routable IP addresses. This saves disk space and does not affect geolocation rules or traffic handling in any way. Any contextual data is now stale, and upgrading to most later versions deletes the IP package. Options to download the IP package or view contextual data have no effect, and are removed in later versions.

Firewall Device Manager Features in Version 7.2.x

Table 11: Firewall Device Manager Features in Version 7.2.x

Feature	Description
Platform Features	
Firepower 1010E.	We introduced the Firepower 1010E, which does not support power over Ethernet (PoE). Minimum threat defense: 7.2.3, 7.4.1
Threat defense virtual for VMware on VMware vSphere/VMware ESXi 8.0.	You can now deploy threat defense virtual for VMware on VMware vSphere/VMware ESXi 8.0. Minimum threat defense: Version 7.2.9, 7.4.2 See: Secure Firewall Threat Defense Virtual getting started guides

Feature	Description
Threat defense virtual for GCP.	You can now use device manager to configure threat defense virtual for GCP. See: Secure Firewall Threat Defense Virtual getting started guides
Threat defense virtual for Megaport.	You can now use device manager to configure threat defense virtual for Megaport (Megaport Virtual Edge). High availability is supported. Minimum threat defense: 7.2.8 Other version restrictions: Initially, you may not be able to freshly deploy Versions 7.3.x or 7.4.x. Instead, deploy Version 7.2.8–7.2.x and upgrade. See: Secure Firewall Threat Defense Virtual getting started guides
Network modules for the Secure Firewall 3100.	We introduced these network modules for the Secure Firewall 3100: • 6-port 1G SFP Network Module, SX (multimode) (FPR-X-NM-6X1SX-F) • 6-port 10G SFP Network Module, SR (multimode) (FPR-X-NM-6X10SR-F) • 6-port 10G SFP Network Module, LR (single mode) (FPR-X-NM-6X10LR-F) • 6-port 25G SFP Network Module, SR (multimode) (FPR-X-NM-X25SR-F) • 6-port 25G Network Module, LR (single mode) (FPR-X-NM-6X25LR-F) • 8-port 1G Copper Network Module, RJ45 (copper) (FPR-X-NM-8X1G-F) Minimum threat defense: 7.2.1
Intel Ethernet Network Adapter E810-CQDA2 driver with threat defense virtual for KVM.	We now support the Intel Ethernet Network Adapter E810-CQDA2 driver with threat defense virtual for KVM. Minimum threat defense: 7.2.1 See: Deploy the Threat Defense Virtual on KVM
ISA 3000 support for shutting down.	Support returns for shutting down the ISA 3000. This feature was introducted in Version 7.0.2 but was temporarily deprecated in Version 7.1.
Firewall and IPS Features	
Object-group search is enabled by default for access control.	The CLI configuration command **object-group-search access-control** is now enabled by default for new deployments. However, if you upgrade to 7.2, the setting remains enabled or disabled depending on your previous setting. If you are configuring the command using FlexConfig, you should evaluate whether that is still needed. If you need to disable the feature, use FlexConfig to implement the **no object-group-search access-control** command. See: *Cisco Secure Firewall ASA Series Command Reference*

Feature	Description
Rule hit counts persist over reboot.	Rebooting a device no longer resets access control rule hit counts to zero. Hit counts are reset only if you actively clear the counters. In addition, counts are maintained by each unit in an HA pair or cluster separately. You can use the **show rule hits** command to see cumulative counters across the HA pair or cluster, or see the counts per node. We modified the following Firewall Threat Defense CLI command: **show rule hits**. See: Examining Rule Hit Counts
VPN Features	
IPsec flow offload.	On the Secure Firewall 3100, IPsec flows are offloaded by default. After the initial setup of an IPsec site-to-site VPN or remote access VPN security association (SA), IPsec connections are offloaded to the field-programmable gate array (FPGA) in the device, which should improve device performance. You can change the configuration using FlexConfig and the **flow-offload-ipsec** command. See: IPSec Flow Offload
Interface Features	
Breakout port support for the Secure Firewall 3130 and 3140.	You can now configure four 10GB breakout ports for each 40GB interface on the Secure Firewall 3130 and 3140. New/modified screens: **Devices** > **Interfaces** See: Manage the Network Module for the Secure Firewall 3100
Enabling or disabling Cisco Trustsec on an interface.	You can enable or disable Cisco Trustsec on physical, subinterface, EtherChannel, VLAN, Management, or BVI interfaces, whether named or unnamed. By default, Cisco Trustsec is enabled automatically when you name an interface. We added the **Propagate Security Group Tag** attribute to the interface configuration dialog boxes, and the **ctsEnabled** attribute to the various interface APIs. See: Configure Advanced Options
Licensing Features	
Permanent License Reservation Support for ISA 3000.	ISA 3000 now supports Universal Permanent License Reservation for approved customers. See: Applying Permanent Licenses in Air-Gapped Networks
Administrative and Troubleshooting Features	
Ability to force full deployment.	When you deploy changes, the system normally deploys just the changes made since the last successful deployment. However, if you are experiencing problems, you can elect to force a full deployment, which completely refreshes the configuration on the device. We added the **Apply Full Deployment** option to the deployment dialog box. See: Deploying Your Changes

Feature	Description
Automatically update CA bundles.	**Upgrade impact. The system connects to Cisco for something new.** The local CA bundle contains certificates to access several Cisco services. The system now automatically queries Cisco for new CA certificates at a daily system-defined time. Previously, you had to upgrade the software to update CA certificates. You can use the CLI to disable this feature. New resources: https://cisco.com/security/pki/ New/modified CLI commands: **configure cert-update auto-update**, **configure cert-update run-now**, **configure cert-update test**, **show cert-update** Version restrictions: Requires Version 7.0.5, 7.1.0.3, or 7.2.4+. See: *Cisco Secure Firewall Threat Defense Command Reference*
Require the Message-Authenticator attribute in all RADIUS responses.	**Upgrade impact. For the Firepower 4100/9300, check FXOS compatibility before you upgrade Firewall Threat Defense. After Firewall Threat Defense upgrade, enable the option for existing servers.** You can now require the Message-Authenticator attribute in all RADIUS responses, ensuring that the Firewall Threat Defense VPN gateway securely verifies every response from the RADIUS server, whether for RA VPN or access to the device itself. The **Require Message-Authenticator for all RADIUS Responses** option is enabled by default for new RADIUS servers. We also recommend you enable it for existing servers. Disabling it may expose firewalls to potential attacks. New CLI commands: **message-authenticator-required** Version restrictions: Requires Version 7.0.7, 7.2.10, 7.4.3, 7.6.1, or 7.7+. For the Firepower 4100/9300, may require an FXOS upgrade; for minimum builds, see *Cisco Secure Firewall Threat Defense Compatibility Guide*.
Firewall Threat Defense REST API version 6.3 (v6).	The Firewall Threat Defense REST API for software version 7.2 is version 6.3. You can use v6 in the API URLs, or preferentially, use /latest/ to signify you are using the most recent API version that is supported on the device. Note that the URL version path element for 6.3 is the same as 6.0, 6.1, and 6.2: v6. Please re-evaluate all existing calls, as changes might have been mode to the resource models you are using. To open the API Explorer, where you can view the resources, log into Firewall Device Manager, then click the more options button (⋮) and choose **API Explorer**. See: *Cisco Secure Firewall Threat Defense REST API Guide*

Upgrade Impact Features

A feature has upgrade impact if upgrading and deploying can cause the system to process traffic or otherwise act differently without any other action on your part. This is especially common with new threat detection and application identification capabilities. A feature can also have upgrade impact if upgrading requires that you take action before or after upgrade to avoid an undesirable outcome; for example, if you must change a configuration.

Important Minimize upgrade and other impact by going directly to the latest maintenance release in your chosen version. See Choosing your upgrade target, on page 41.

Upgrade Impact Features for Firewall Management Center

This table lists and links to descriptions of features that may have upgrade impact for Firewall Management Center. The first column is for your current version and the link indicates when the feature was originally introduced.

Table 12: Upgrade Impact Features for Firewall Management Center

Current version	Features with upgrade impact
7.2.0–7.2.9 7.1.x 7.0.7 and earlier	• Updated internet access requirements for Smart Licensing. *(*7.0.8)
7.2.0–7.2.9 7.1.x 7.0.6 and earlier	• New Cisco AMP cloud connection method. *(*7.7.0)
7.2.5 and earlier	• Configure DHCP relay trusted interfaces from the Firewall Management Center web interface. *(*7.2.6) • Updated internet access requirements for direct-downloading software upgrades. *(*7.2.6)
7.2.0–7.2.5 7.1.x 7.0.5 and earlier	• Updated web analytics provider. *(*7.0.6)
7.2.4 and earlier	• Management center detects interface sync errors.*(*7.2.5)
7.2.3 and earlier	• Access control performance improvements (object optimization). *(*7.2.4)
7.2.0–7.2.3 7.1.x 7.0.5 and earlier	• Smaller VDB for lower memory Snort 2 devices. *(*7.0.6*)*
7.2.0–7.2.3 7.1.0–7.1.0.2 7.0.4 and earlier	• Automatically update CA bundles. *(*7.0.5)

Current version	Features with upgrade impact
7.1.x and earlier	• Configure VXLAN from the Firewall Management Center web interface. *(*7.2.0) • Configure EIGRP from the Firewall Management Center web interface. *(*7.2.0)
7.0.x and earlier	• Configure Equal-Cost-Multi-Path (ECMP) from the FMC web interface. *(*7.1.0) • Configure policy based routing from the FMC web interface. *(*7.1.0) • Send intrusion events and retrospective malware events to the Secure Network Analytics cloud from the FMC. *(*7.1.0) • Deprecated: Intrusion incidents and the intrusion event clipboard. *(*7.1.0) • Deprecated: Custom tables for intrusion events. *(*7.1.0)
6.7.x and earlier	• End of support: VMware vSphere/VMware ESXi 6.0. *(*7.0.0) • Deprecated: Port 32137 comms with AMP clouds. *(*7.0.0)
6.6.x and earlier	• Changes to PAT address allocation in clustering. *(*6.7.0) • pxGrid 2.0 with ISE/ISE-PIC. *(*6.7.0) • Improved preclassification of files for dynamic analysis. *(*6.7.0) • National Vulnerability Database (NVD) replaces Bugtraq. *(*6.7.0) • Pre-upgrade compatibility check. *(*6.7.0) • Upgrades postpone scheduled tasks. *(*6.7.0) • Upgrades remove PCAP files to save disk space. *(*6.7.0) • Deprecated: Cisco Firepower User Agent software and identity source. *(*6.7.0) • Deprecated: Cisco ISE Endpoint Protection Services (EPS) remediation. *(*6.7.0) • Deprecated: Less secure Diffie-Hellman groups, and encryption and hash algorithms. *(*6.7.0) • Deprecated: Appliance Configuration Resource Utilization heath module (temporary). *(*6.7.0)

Upgrade Impact Features for Firewall Threat Defense with Firewall Management Center

This table lists and links to descriptions of features that may have upgrade impact for Firewall Threat Defense with Firewall Management Center. The first column is for your current version and the link indicates when the feature was originally introduced.

Table 13: Upgrade Impact Features for Firewall Threat Defense with Firewall Management Center

Current version	Features with upgrade impact
7.2.0–7.2.9 7.1.x 7.0.6 and earlier	• Require the Message-Authenticator attribute in all RADIUS responses. (7.0.7)
7.2.9 and earlier	• Asymmetric traffic handling. (7.2.9)
7.2.0–7.2.3 7.1.0–7.1.0.2 7.0.4 and earlier	• Automatically update CA bundles. (7.0.5)
7.1.x and earlier	• Autoscale for Firewall Threat Defense Virtual for GCP. (7.2.0)
7.0.x and earlier	• Snort 3 support for inspection of DCE/RPC over SMB2. (7.1.0) • Snort 3 support for **ssl_version** and **ssl_state** keywords. (7.1.0)
6.7.x and earlier	• End of support: VMware vSphere/VMware ESXi 6.0. (7.0.0) • FTDv performance tiered Smart Licensing. (7.0.0) • Deprecated: RSA certificates with keys smaller than 2048 bits, or that use SHA-1 in their signature algorithm. (7.0.0) • Deprecated: MD5 authentication algorithm and DES encryption for SNMPv3 users. (7.0.0)
6.6.x and earlier	• Firepower 1100/2100 series SFP interfaces now support disabling auto-negotiation. (6.7.0) • ClientHello modification for Decrypt - Known Key TLS/SSL rules. (6.7.0) • Pre-upgrade compatibility check. (6.7.0) • Improved readiness checks. (6.7.0) • Improved FTD upgrade status reporting and cancel/retry options. (6.7.0) • Upgrades remove PCAP files to save disk space. (6.7.0)

Upgrade Impact Features for Firewall Threat Defense with Firewall Device Manager

Table 14: Upgrade Impact Features for Firewall Threat Defense with Firewall Device Manager

Target version	Features
7.2.10–7.2.x	• Require the Message-Authenticator attribute in all RADIUS responses.

Target version	Features
7.1.0+	• Dynamic Domain Name System (DDNS) support for updating fully-qualified domain name (FQDN) to IP address mappings for system interfaces. • Snort 3 support for inspection of DCE/RPC over SMB2. • Snort 3 support for **ssl_version** and **ssl_state** keywords.
7.0.0+	• End of support: VMware vSphere/VMware ESXi 6.0. • DHCP relay configuration using the Firewall Threat Defense API.
6.7.0+	• Support removed for less secure Diffie-Hellman groups, and encryption and hash algorithms. • EIGRP support using Smart CLI. • Firewall Threat Defense API support for SNMP configuration.

Upgrade Guidelines

These release notes contain upgrade warnings and guidelines that are specific to each release. You should also check for features and bugs with upgrade impact.

See the upgrade guide for general information on time and disk space requirements, and for details on system behavior during upgrade, which can include interruptions to traffic flow and inspection: For Assistance, on page 179.

Upgrade Guidelines for Firewall Management Center

Table 15: Upgrade Guidelines for Firewall Management Center

Current Version	Guideline	Details
7.2.8.x	Patch uninstall not supported: Version 7.2.8.x to Version 7.2.8.0.	Uninstall is not supported for the Version 7.2.8.1 Firewall Management Center patch. Because patches are cumulative, and because uninstalling returns you to the patch level you upgraded from, this means that uninstall is not supported from any Version 7.2.8.x patch back to Version 7.2.8 (the base version).
Any	Upgrade not recommended: Version 7.2.6.	Due to CSCwi63113, Version 7.2.6 was deferred on 2024-04-29 and is no longer available for download. If you downloaded it, do not use it. If you are running this version, upgrade.

Current Version	Guideline	Details
6.4.0–6.7.x	Reconnect with Threat Grid for high availabilityFirewall Management Center.	Version 7.0.0 fixes an issue with Firewall Management Center high availability and malware detection where, after failover, the system stopped submitting files for dynamic analysis (CSCvu35704). For the fix to take effect, you must reassociate with the Cisco Threat Grid public cloud after upgrading. After you upgrade the high availability pair to Version 7.0.0+, on the primary Firewall Management Center: 1. Choose **AMP** > **Dynamic Analysis Connections**. 2. Click **Associate** in the table row corresponding to the public cloud. A portal window opens. You do not have to sign in. The reassociation happens in the background, within a few minutes.

Upgrade Guidelines for Firewall Threat Defense with Firewall Management Center

Table 16: Upgrade Guidelines for Firewall Threat Defense

Current Version	Guideline	Details
7.0.9 and earlier 7.1.x 7.2.0–7.2.11 7.3.x 7.4.0–7.4.7 7.6.0–7.6.5 7.7.0–7.7.12 10.0.0–10.0.1	Enable IPsec encryption and set an encryption key in remote access VPN (RA VPN) load balancing groups before upgrade.	Certain releases require secure communications among RA VPN load balancing group members. To minimize disruption, follow these guidelines when upgrading *any* group member to one of those releases: • Before upgrade, enable IPsec encryption and set an encryption key in the RA VPN policy advanced settings. Deploy changes. If you do not set an encryption key, incoming connections are denied after the director upgrades. If you do not enable encryption, you will not be able to deploy to upgraded devices. • Upgrade the entire group. Mixed groups are not supported. Even with IPsec encryption and an encryption key, new connections can be load balanced only to devices on the same "side" as the director. That is, if the director is upgraded, connections can be load balanced only to other upgraded devices. If the director is not upgraded, connections can be load balanced only to non-upgraded devices. Plan your upgrade so the side with the director has the capacity to handle incoming connections throughout the upgrade. This requirement applies to: Version 7.0.10, 7.2.12, 7.4.8, 7.6.6, 7.7.13, 10.0.2, 10.1.0.
Any	Upgrade not recommended: Version 7.2.6.	Due to CSCwi63113, Version 7.2.6 was deferred on 2024-04-29 and is no longer available for download. If you downloaded it, do not use it. If you are running this version, upgrade.

Current Version	Guideline	Details
7.2.x	Upgrade any Version 7.2.x devices using .	ends support for Version 7.2.x Firewall Threat Defense devices on October 31, 2026. **Begin upgrading or replacing affected devices now.** Do not add any new Version 7.2.x devices. Before support ends, all devices must be running at least Version 7.3.x. If possible, we recommend the suggested release listed in the *Cisco Secure Firewall Threat Defense Compatibility Guide*. If you cannot upgrade due to incompatibility, contact your Cisco representative or partner immediately. For more information, see FAQ and Support.
7.1.x and earlier	Upgrade prohibited: Firewall Threat Defense Virtual for GCP to Version 7.2.0+ from earlier releases.	You cannot upgrade Firewall Threat Defense Virtual for GCP from Version 7.1.x and earlier to Version 7.2.0+. You must deploy a new instance.
7.1.x 6.6.0–7.0.2	Revert may require unregistering and reregistering.	If you revert from Version 7.2.0–7.2.6 to Version 6.6.0–7.0.2 or to Version 7.1.x, unregister and reregister devices after the revert completes (CSCwi31680).
6.6 and earlier	Upgrade prohibited: Firepower 1010 to Version 6.7+ with switch ports with VLAN ID 3968–4047.	For the Firepower 1010, Firewall Threat Defense upgrades to Version 6.7+ will fail if you configured switch ports with a VLAN ID in the 3968–4047 range. These IDs are for internal use only.

Upgrade Guidelines for Firewall Threat Defense with Firewall Device Manager

Table 17: Upgrade Guidelines for Firewall Threat Defense

Current Version	Guideline	Details
7.4.x and earlier	Do not upgrade the Firepower 1010 if a subinterface uses VLAN 1	For models with built-in switches, you cannot create a subinterface using VLAN 1. VLAN 1 is reserved for the logical VLAN interface for switch ports. If you upgrade the Firepower 1010 to Version 7.6+ later, and you have assigned VLAN 1 to a subinterface, you must first change the VLAN ID for your subinterface to a new VLAN. After upgrading, if present, VLAN 1 will be removed from the subinterface.
Any	Upgrade not recommended: Version 7.2.6.	Due to CSCwi63113, Version 7.2.6 was deferred on 2024-04-29 and is no longer available for download. If you downloaded it, do not use it. If you are running this version, upgrade.
6.6 and earlier	Upgrade failure: Firepower 1010 switch ports with invalid VLAN IDs.	For the Firepower 1010, Firewall Threat Defense upgrades to Version 6.7+ will fail if you configured switch ports with a VLAN ID in the 3968–4047 range. These IDs are for internal use only.

Upgrade Guidelines for the Firepower 4100/9300 Chassis

In most cases, we recommend you use the latest build for your FXOS major version.

For release-specific FXOS upgrade warnings and guidelines, as well as features and bugs with upgrade impact, check all release notes between your current and target version: http://www.cisco.com/go/firepower9300-rns.

For firmware upgrade guidelines (for upgrades to FXOS 2.13 and earlier), see the firmware upgrade guide: *Cisco Firepower 4100/9300 FXOS Firmware Upgrade Guide*.

Upgrade Path

Planning your upgrade path and order is especially important for large deployments, high availability/clustering, multi-hop upgrades, and situations where you need to coordinate chassis, hosting environment, or other upgrades. Those scenarios, as well as information on revert and uninstall, are covered in more detail in the upgrade guide: For Assistance, on page 179.

Choosing your upgrade target

Go **directly to the latest Version 7.2 release possible** to minimize upgrade and other impact. This is because features, enhancements, and critical fixes can skip "future" releases that are ahead by version, but not by release date. For example, if you are up-to-date within major Version A, upgrading to dot-zero Version B can deprecate features and fixes.

If you cannot go to the latest release, at least make sure your current version was released on a date before your target version. In the following table, confirm your current version is listed next to your target version. If it is not, choose a later target.

Table 18: Released before Version 7.2.x, by date

Target version		Current version: confirm yours is listed.				
		from 6.6	**from 6.7**	**from 7.0**	**from 7.1**	**from 7.2**
to 7.2.12	2026-09-15	6.6.0–6.6.7	6.7.0	7.0.0–7.0.10	7.1.0	7.2.0–7.2.11
to 7.2.11	2026-02-17	6.6.0–6.6.7	6.7.0	7.0.0–7.0.9	7.1.0	7.2.0–7.2.10
to 7.2.10	2025-05-22	6.6.0–6.6.7	6.7.0	7.0.0–7.0.7	7.1.0	7.2.0–7.2.9
to 7.2.9	2024-10-22	6.6.0–6.6.7	6.7.0	7.0.0–7.0.6	7.1.0	7.2.0–7.2.8
to 7.2.8	2024-06-24	6.6.0–6.6.7	6.7.0	7.0.0–7.0.6	7.1.0	7.2.0–7.2.7
to 7.2.7	2024-04-29	6.6.0–6.6.7	6.7.0	7.0.0–7.0.6	7.1.0	7.2.0–7.2.6
to 7.2.6 *	2024-03-19	—	—	—	—	—
to 7.2.5	2023-07-27	6.6.0–6.6.7	6.7.0	7.0.0–7.0.6	7.1.0	7.2.0–7.2.4
to 7.2.4	2023-05-03	6.6.0–6.6.7	6.7.0	7.0.0–7.0.5	7.1.0	7.2.0–7.2.3
to 7.2.3	2023-02-27	6.6.0–6.6.7	6.7.0	7.0.0–7.0.5	7.1.0	7.2.0–7.2.2
to 7.2.2	2022-11-29	6.6.0–6.6.7	6.7.0	7.0.0–7.0.5	7.1.0	7.2.0–7.2.1
to 7.2.1	2022-10-03	6.6.0–6.6.7	6.7.0	7.0.0–7.0.4	7.1.0	7.2.0
to 7.2.0	2022-06-06	6.6.0–6.6.5	6.7.0	7.0.0–7.0.2	7.1.0	—

* Version 7.2.6 is no longer available.

Upgrading a patched deployment

Critical fixes in patches/vulnerability (fourth-digit) releases can also skip future releases. If you depend on these critical fixes, verify that your target version contains them. For a full list of release dates, see *Cisco Secure Firewall Management Center New Features by Release* or *Cisco Secure Firewall Device Manager New Features by Release*.

Supported upgrades and downgrades

This section summarizes upgrade and downgrade capability. For help with:

- Choosing an upgrade target, see Choosing your upgrade target, on page 41.
- Upgrade and downgrade procedures, including general guidelines, best practices, and troubleshooting, see the upgrade guide for the version you are currently running: https://www.cisco.com/go/ftd-upgrade.

Supported upgrades

This table shows the supported direct upgrades for Firewall Management Center and Firewall Threat Defense software.

Note Patches can change the fourth digit only. You cannot upgrade directly to a patch from a previous major or maintenance release. Although a patched device can be managed with an unpatched Firewall Management Center, fully patched deployments undergo enhanced testing.

Table 19: Supported direct upgrades

Current version	Target software version							
	to 10.x	7.7	7.6	7.4	7.3	7.2	7.1	7.0
from 10.x	YES	—	—	—	—	—	—	—
from 7.7	YES	YES	—	—	—	—	—	—
from 7.6	YES	YES	YES	—	—	—	—	—
from 7.4	YES	YES	YES	YES	—	—	—	—
from 7.3	YES	YES	YES	YES	YES	—	—	—
from 7.2	—	YES	YES	YES	YES	YES	—	—
from 7.1	—	—	YES	YES	YES	YES	YES	—
from 7.0	—	—	—	YES	YES	YES	YES	YES
from 6.4	—	—	—	—	—	—	—	YES

Supported FXOS versions for Firepower 4100/9300 upgrades

For the Firepower 4100/9300, this table lists companion FXOS versions. If a chassis upgrade is required, Firewall Threat Defense upgrade is blocked. In most cases we recommend the latest build in each version; for minimum builds see the *Cisco Secure Firewall Threat Defense Compatibility Guide*.

Table 20: Supported FXOS versions for Firepower 4100/9300 upgrades

Target Firewall Threat Defense version	Minimum FXOS version
10.x	2.18.0
7.7	2.17.0
7.6	2.16.0
7.4.1–7.4.x	2.14.1
7.4.0	—
7.3	2.13.0
7.2	2.12.0
7.1	2.11.1
7.0	2.10.1
6.7	2.9.1
6.6	2.8.1
6.4	2.6.1

Supported downgrades

If an upgrade succeeds but the system does not function to your expectations, you may be able to return to a previous version. For general information, particularly on common scenarios where returning to a previous version is not supported or recommended, see the upgrade guide: https://cisco.com/go/ftd-upgrade.

Bugs

For bugs in earlier releases, see the release notes for those versions. For cloud deployments, see the Release Notes for Cloud-Delivered Firewall Management Center.

Important We do not list open bugs for maintenance releases or patches.

Important Bug lists are auto-generated once and may not be subsequently updated. If updated, the 'table last updated' date does not mean that the list was fully accurate on that date—only that some change was made. Depending on how and when a bug was categorized or updated in our system, it may not appear in the release notes. If you have a support contract, you can obtain up-to-date bug lists with the Cisco Bug Search Tool.

Open Bugs in Version 7.2.0

Table last updated: 2024-05-02

Table 21: Open Bugs in Version 7.2.0

Bug ID	Headline
CSCwb43433	Jumbo frame performance has degraded up to -45% on Firepower 2100 series
CSCwb78233	7.2.0 1984 Nutanix vFMC not accessible after upgrade from 7.1.0
CSCwb80789	TLS 1.3 connections to sites previously decrypted may fail
CSCwb87724	Evicted units re-joined existing Cluster but not listed on Control and other evicted vFTD Cluster
CSCwb88887	snp_fp_vxlan_encap_and_grp_send_common: failed to find adj. bp->l3_type = 8, inner_sip message
CSCwb89905	vFTD installed with JF but still FMC shows info about JF getting enabled and to reboot vFTD
CSCwb90105	Upgrade to 7.2 on FTDv for Nutanix is stuck after reboot
CSCwb96990	Early data may cause xtls to not wait for probe response
CSCwb97486	FPR3100: 25G optic may show link up on some 1/10G capable only fiber ports
CSCwb99960	onPremFMC with only CDO Managed devices registered, Malware Event pages shows license warning
CSCwd07838	User cannot filter by device in the new AC policy UI
CSCwd16602	Inconsistencies seen after switching from old UI to new UI without saving the policy
CSCwd47149	New AC Policy UI: ACP rule list takes a long time to load in case of large rule set
CSCwe14714	Search is slow and semantic based searches are not working in new ACP UI
CSCwe96560	Cannot copy rules from one policy to another policy using new AC policy UI
CSCwh15444	Fetching hit counts takes longer in NEW ACP UI when compared to the legacy ACP UI
CSCwi22693	ACP rule is deleted when discarding changes, post rule reposition.

Resolved Bugs in Version 7.2.12

Table last updated: 2026-09-16

Table 22: Resolved Security Bugs in Version 7.2.12

Bug ID	Headline
CSCwo83926	Cisco Secure Firewall Threat Defense Software TLS 1.3 Denial of Service Vulnerability
CSCwr31700	RADIUS external auth doing one request per interface when bad username/password attempted
CSCws43281	Cisco Secure Firewall Management Center and Secure Firewall Threat Defense Software sftunnel Memory Exhaustion Denial of Service Vulnerability
CSCwt01395	Traffic is not hitting the expected rule, instead hitting default deny rule.
CSCwt42671	Cisco Secure Firewall Adaptive Security Appliance and Secure Firewall Threat Defense Software IKEv2 Certificate Authentication Denial of Service Vulnerability
CSCwt50719	Clear the IPv4 rp_filter setting to allow FMC with dual management interfaces in same subnet
CSCwt54632	Snort crashes or a FATAL ERROR occurs after 255 reloads if ngfw.rules includes NCM(Non-contiguous netmask)
CSCwt61597	Continued Evolution of Persistence Mechanism Against Cisco Secure Firewall Adaptive Security Appliance and Secure Firewall Threat Defense
CSCwt81457	Cisco Secure Firewall Management Center Software Session Fixation Issue
CSCwt95974	Cisco Secure Firewall Management Center Software Authentication Bypass Vulnerability
CSCwt95997	Cisco Secure Firewall Management Center Software Static Credential Vulnerability
CSCwu03757	Cisco Secure Firewall Threat Defense Software Snort 2 SSL/TLS Denial of Service Vulnerability
CSCwu14285	Cisco Secure Firewall Adaptive Security Appliance and Secure Firewall Threat Defense Software TCP DNS Denial of Service Vulnerability
CSCwu14331	Cisco Secure Firewall Management Center Software sftunnel Root Arbitrary Code Execution Vulnerability
CSCwu16917	Cisco Secure Firewall Management Center and Secure Firewall Threat Defense Software sftunnel Unauthorized Authentication Bypass Vulnerability
CSCwu16938	Cisco Secure Firewall Management Center Software Java Deserialization Remote Code Execution Vulnerability
CSCwu16954	Cisco Secure Firewall Management Center Software sftunnel Deserialization Root Command Execution Vulnerability

Bug ID	Headline
CSCwu16965	Cisco Secure Firewall Management Center Software Single Sign-On Token Forgery of Administrator Account Vulnerability
CSCwu24501	Cisco Secure Firewall Management Center Software SQL Injection Vulnerability
CSCwu27275	Cisco Secure Firewall Management Center Software Deserialization Arbitrary Root Command Execution Vulnerability
CSCwu27279	Cisco Secure Firewall Management Center Software Impersonated sftunnel Connection Vulnerability
CSCwu42586	Cisco Secure Firewall Management Center Software Low Privileged Arbitrary File Download Vulnerability
CSCwv96220	Cisco Secure Firewall Adaptive Security Appliance and Secure Firewall Threat Defense Software Remote Access SSL VPN Denial of Service Vulnerability

Table last updated: 2026-09-15

Table 23: Resolved Functional Bugs in Version 7.2.12

Bug ID	Headline
CSCwt24048	FMC-created capture for FTD causes generation of excessive 'capture_*' files to FTD disk
CSCwt61398	Snort 3 crash in acquire_fqdn with FQDN access rules
CSCwt62980	Snort CPU does not showing in the FMC Health monitor
CSCwu95619	Lina core found on QW MI cluster
CSCwv28117	To be backout the CSCwt31105 commit changes

Resolved Bugs in Version 7.2.11

Table last updated: 2026-03-04

Table 24: Resolved Security Bugs in Version 7.2.11

Bug ID	Headline
CSCwm83088	Cisco FXOS and UCS Manager Software Stored Cross-Site Scripting Vulnerability
CSCwm83089	Cisco FXOS and UCS Manager Software Stored Cross-Site Scripting Vulnerability
CSCwm88115	In the Linux kernel, the following vulnerability has been resolved: e
CSCwm95187	Redis is an open source, in-memory database that persists on disk. Aut
CSCwm95189	Redis is an open source, in-memory database that persists on disk. An
CSCwn15505	Observing Lina Core for 2.17 in BS/QP with App Instance Stuck in 'Started' State

CSCwn63146	CVE-2024-50180: linux-kernel: In the Linux kernel, the following vuln...
CSCwn63163	CVE-2024-50195: linux-kernel: In the Linux kernel, the following vuln...
CSCwn72848	Lina interface fragment db queue size is incorrectly stuck at 4294967295 - ASA/FTD

Table last updated: 2025-05-22

Table 30: Resolved Functional Bugs in Version 7.2.10

Bug ID	Headline
CSCvj85665	ENH: Appliance hostname or ip address should be included in FX-OS syslogs
CSCvu22491	FMC fails to connect to SSM with error "Failed to send the message to the server"
CSCvx66624	Write cache is disabled on some FMC M5 appliances
CSCvz03407	IPTables.conf file is disappearing resulting in backup and restore failure.
CSCvz85153	show access-control-config doesn't show NAP/IPS policy name
CSCwb77894	Firepower 1000/2100 may boot to ROMMON mode
CSCwc28374	Search Feature of Large Access Control Policy Not Able to Find Searched-For Values

Bug ID	Headline
CSCwc38383	Snort3 core generated when enabling CBD logging for SSL debugs
CSCwc57500	Remove bootlogd package from FXOS to avoid ASA boot log problems
CSCwc70142	Deleting a routed mode Etherchannel interface changes member interfaces to switch port mode
CSCwd06592	deployment fails for bad config with error unable load so rules
CSCwd08448	FMC to provide health alert 60 days prior to cacert.pem certificate expiry
CSCwd49767	System popover is empty for Network Admin and Security Approver users
CSCwe42986	Classic and Unified Events should handle cases when SMC is unreachable
CSCwe60267	FXOS fault F0853 and F0855 seen despite keyring certificates reporting renewed
CSCwe63686	Upgrade readiness failed in WM FDM @009_check_snort_preproc.sh but upgrade to 7.3.1-19 passed
CSCwe79990	Cisco-Intelligence-Feed - Failed to download due to timeout
CSCwe88492	Banner login does not display when configured
CSCwe92324	FPR31xx - SNMP poll reports incorrect FanTray Status at Down while actually operational
CSCwe93925	Deployment fails to FTD when reusing/reassigning existing vlan id to diff interface
CSCwe98559	snort3 - missing necessary counters for RNA statistics
CSCwf04460	The fxos directory disappears after cancelling show tech fprm detail command with Ctr+c is executed.
CSCwf04983	3100 unit failed to join the cluster with error "configured object (sys/switch-A/slot-2) not found"
CSCwf17314	FMC deploy logs rotating faster because of /internal_rest_api/accesscontrol/rapplicationsavailable
CSCwf25454	Stale anyconnect entries causing issues with routing
CSCwf42097	PSEQ (Power-Sequencer) firmware may not be upgraded with bundled FXOS upgrade
CSCwf66818	FMC VPN Monitoring Dashboard incorrectly shows Standby FTD as VPN Session owner in HA pair
CSCwf78497	EIGRP flexconfig migration 7.2.0, no CLIs should not be migrated if they are not the default config
CSCwf80183	Snort3 core in navl seen during traffic flow
CSCwf84200	Snort core while running IP Flow Statistics

Bug ID	Headline
CSCwf92371	HA secondary unit disabled after reboot - Process Manager failed to secure LSP
CSCwh01312	ENH: FMC External Authentication doesn't work for SSH when configured with IPv6.
CSCwh11411	Snort blacklisting traffic during deployment
CSCwh13182	FTD fails upgrade from 7.2.4 to 7.4.1 and revert fails to take device out of maintenance mode
CSCwh15109	SRU installation gets stuck at 602_log_package.pl script, causing deployment failure
CSCwh17965	[Display]FXOS: PC member interface is shown as down & unassociated/unassigned after reload
CSCwh23124	Secondary/Standby node shows flapping between Ready & Failed when mgmt interface is shutdown
CSCwh25406	Snort3 core while running continuous traffic IMS 7.4.1-73
CSCwh29167	FMC FlexConfig re-orders objects after a single successful deployment
CSCwh36167	DAP: FMC adds &#13 characters in a LUA script
CSCwh36328	Test tool config params are shared by HTTP and HTTP/2 causing a race condition -regression test only
CSCwh37655	Snort2:Skip writing malware seed file duing process shutdown
CSCwh41126	FMC ACP report does not shows all the access control rules
CSCwh41606	Extensive logging for a problematic deployment caused logs to rollover important logs
CSCwh46732	Remote Desktop (RDP) traffic fails with TSID enabled
CSCwh49085	Avoid unnecessary DB operations when processing derived fingerprints
CSCwh58190	FMC Deployment failure in csm_snapshot_error
CSCwh61832	FDM: Allow turn on/off GSP mempool polling via Flexconfig
CSCwh63663	Cannot use .k12 domain on realm AD Primary Domain configuration
CSCwh66315	Regarding presence of health modules(PEP Status,Heartbeat Process monitor) in FMC
CSCwh70639	FTD: Update Install failed. hostname: RPC Denied:Permission denied (role=manager) for peer hostname
CSCwh75829	FMC Primary disk degraded error
CSCwh78064	FTD: The crucial upgrade script should not be bypassed by the Upgrade Retry
CSCwh83854	Cannot configure Correlation rule because there are no values for GID that exceed 2000

Bug ID	Headline
CSCwh85824	eStreamer JSON parse error and memory leak
CSCwh87058	FTD: Internal certificate generation results to certificate and private key mismatch
CSCwh92541	Random FTD snort3 traceback
CSCwh95003	Init process spikes to 100% CPU usage after a failed backup
CSCwh96088	High unmanaged disk usage on FMC /Volume due to large MonetDB files - FMC 7.2.4
CSCwi02039	FMC clean_revert_backup script fails silently without creating any logs
CSCwi05709	FTD reboot due to filesytem event
CSCwi08392	Configuring /32 makes PPoE address: "Invalid value of IPV4 address or subnet or network overlap"
CSCwi16571	Capture-traffic Clish command with snort3 not producing a proper resulting capture
CSCwi18663	FMC-4600: Pre-Filter policy is showing as none
CSCwi19485	Fail open snort-down is off in inline pairs despite it being enabled and deployed from FMC
CSCwi21909	FMC: Displaying "missing en-US:BGP" via Deployment Preview when BGP Changes have been Reverted
CSCwi27093	FMC error out Invalid IPv4 Network or Host literal from the group while Adding a network in the ACP
CSCwi28645	User assigned to a read only custom role is not able to view content of intrusion policy for snort2
CSCwi38708	FDM deployment failure
CSCwi40674	Umbrella Profile and others cleared incorrectly when editing group policy in the UI
CSCwi41666	MonetDB startup enhancement to clean up large files
CSCwi44007	FMC Validation failure for large object range and success for object network in NAT64
CSCwi45408	Monetdb having 14GB of unknown BAT data causing "High unmanaged disk usage on /Volume"
CSCwi46676	API:/operational/commands not working as swagger indicate
CSCwi49128	Update logs - SSP object serialization during HA
CSCwi51611	FTD 7.4.1 Snort shows 100% utilization even at a low traffic rate
CSCwi52623	Misleading Certificate Attribute Checking Under DAP Endpoint Criteria

Bug ID	Headline
CSCwi54926	In an FMC HA pair, "Health Monitor" may show incorrect roles when the Secondary unit is Active.
CSCwi55009	Error thrown if Security Analytics user tries to access Packet Capture page
CSCwi56733	Internal error when attempting to configure PBR in FMC
CSCwi58187	Incorrect NAT warnings threshold limit of 131838 IPs
CSCwi59453	Bootstrap after upgrade failed - Resume HA with reason deployment already exists
CSCwi67510	FMC: Packet-tracer showing a "Interface not supported" error for VLAN interfaces
CSCwi67638	FMC configured DAP rule with Azure IDP SAML attributes does not match
CSCwi69260	upgrade of FMC to 7.2.x removes FlexConfig-provided EIGRP authentication from interfaces on FTDs
CSCwi78941	FDM deployment fails with error "Some interfaces have been added to or removed from the device"
CSCwi82866	MonetDB Monitor triggers for restarting MonetDB based on WAL size are not effective
CSCwi92702	Run All function on FMC Health Monitoring page is greyed out after upgrade
CSCwi93186	Low touch provisioning fails at initialProvision step
CSCwi94356	Lina traceback and reload in Thread Name: cli_xml_request_process
CSCwi97667	FMC HA sync status shows failed during VDB/SRU installation on Active and standby FMC
CSCwi98147	Tomcat restarts in the middle of the LTP flow due to certificate update
CSCwj02259	Backup failures needs to be displayed with the correct state on GUI
CSCwj03112	pmtool restart of monetdb fails to bring up monetdb, too many files in monetdb Volume directory
CSCwj03285	FMC : Health Monitor Alert is not properly issued regarding disk usage
CSCwj03876	Deleting Snort 3 IPS Rule doesn't Generate Audit Log
CSCwj05464	FMC Server Certificate shows Only First 20 Objects
CSCwj08203	FMC: fireamp generating too many logs
CSCwj10923	FTD - sftunnel unstable connectivity issues when control and event are configured in same subnet
CSCwj14242	Applications are incorrectly identified as TOR and blocked by Snort3
CSCwj14589	FMC-SSE Cloud Configuration SSE Enrollment Failure alert due to empty connector.toml file on the FTD

Bug ID	Headline
CSCwj14798	TSS_Daemon process is exiting every minute
CSCwj16119	FP2110: When Leaving On-Box (FDM) Mode Platform API Fails
CSCwj17852	FMC - Inheritance Settings Select Base Policy Menu disappears while scrolling using Light or Dusk UI
CSCwj17969	rna_ip_os_map can grow very large that causes SFDataCorrelator to stop processing events
CSCwj23777	Missing Column(s) in eventdb table
CSCwj24517	LSP Deployment fails in multi instance FP 41xx / 93xx
CSCwj26204	restored FMC backup devices display as "normal" and "healthy" although without connection with FMC
CSCwj26595	FMC allows loading a binary certificate in the External Authentication Object
CSCwj30582	Geolocation updates page should throw an error in case support site in unreachable
CSCwj31904	After upgrade FDM deployment fails "Timeout waiting for snort detection engines to process traffic"
CSCwj33503	Snort3 event PCAPs contain only header data when decrypting HTTP/2
CSCwj34374	SecureX / Cisco Security Cloud registration fails if FMC is behind a proxy server
CSCwj39184	FDM /ngfw/var/sf/fwcfg/zones.conf is empty for 7.3.1
CSCwj39212	SFDataCorrelator memory growth when processing a huge number of expired user identities
CSCwj44464	ACP rule may not get applied post-deployment/Deployment failure due to FXOS-FTD timezone mismatch
CSCwj45075	Critical Processes show twice after upgrade to 7.0.6.x
CSCwj45351	Unable to add additional LDAP attribue maps on upgraded FMC
CSCwj45439	Internal Certificate Import Error : Failed to validate Cert Based EO: Unsupported Key Type
CSCwj48308	Stale Health Alerts seen on the UMS after model migration
CSCwj50557	Snort creating too many snort-unified log files when frequent policy deploys
CSCwj51115	FMC backup remote server copy to Solar Winds remote server failing after upgrading to 7.x versions.
CSCwj54042	Crypto ikev2 policy sequence order alters on interface/sub-interface config changes
CSCwj56668	False positive ISE bulk download alert error seen on FMC

Bug ID	Headline
CSCwj57435	Cleanup stale logrotate files
CSCwj58442	FTD HA status in ON Prem FMC is corrupted reporting Secondary as Primary
CSCwj61086	High CPU usage in svc_sam_dme process during deployment post breaking cluster or deleting inline-set
CSCwj62959	Deployment failure and rollback when changing parent of subinterface with failover MAC address
CSCwj63921	Snort3 traceback and reload due to memory corruption in file module
CSCwj65811	FMC gets flooded with"Unable to find SSL rule id for policy" if TLS server identity discovery is on
CSCwj69358	Provide messaging on FMC 7.2 & 7.3 that New ACP-UI in not meant for scaled/permanent use
CSCwj72013	PAT communication via using PAT pool fails for about 40 seconds when a device joins a cluster
CSCwj72721	Deployment failure and rollback when BGP communities added or removed in route-map match clause
CSCwj73171	Snort3: Smaller size packets exceeding the max segment limit cause Snort-block
CSCwj79736	eStreamer memory leak when the FMC receives events from CDO-managed FTDs
CSCwj85103	Unable to download group/user due to error in SQL syntax on rebuild indexes
CSCwj89228	FTD /mnt 100% disk utilization due to snort memory mapped files
CSCwj91420	Snort3 crashes while collecting flow-ip-profiling
CSCwj98451	FMC got deregistered from Smart License after upgrade
CSCwj98872	eth0 may not be properly initialized after reboot
CSCwk04216	Realm download task failing with ADI process is not currently available
CSCwk04893	FTD does not compact files that are used to communicate updates to the SGT/IP mappings
CSCwk04908	FTD Unable to register to FMC due to empty DNS Server configured.
CSCwk06216	Loss of interface mapping with security zones after deployment
CSCwk07250	Upgrade FMC fails while running script 120_check_legacy_private_cloud_for_ampkit.pl
CSCwk07563	Force deploy not re-generating export-cache in the device
CSCwk08064	ADI Session Processing Delays return after upgrade to 7.2.x

Bug ID	Headline
CSCwk09559	FMC - Custom User role VPN allows user to make changes to Site to Site VPN when Modify is unchecked.
CSCwk11254	"Rule Unavailable" for some local intrusion rules may be shown in intrusion event packet view
CSCwk11989	Accepting duplicate object/group-object into object-group from multiple ssh sessions
CSCwk12337	RC4 ciphers cannot be disabled on FMC/FTD for captive portal authentication with Kerberos
CSCwk21533	FMC Users page in sub domain does not load
CSCwk22814	FMC - Add warning message when configuring CCL MTU
CSCwk24380	No devices listed in Packet Tracer "Select Device" dropdown
CSCwk24440	Backups may fail on remote storage when the filebackup.tar contents are so huge
CSCwk25506	Multiple snort binaries are present (Patch or HF) at /var/sf/bin/ making tar command to fail
CSCwk28058	FTD memory depletion resulting in traceback and reload
CSCwk30049	ASA/FTD May traceback & reload citing Thread Name 'lina' as the faulting thread.
CSCwk30965	AppIdSessionData causes snort3 to crash 7.2.6
CSCwk33387	SNMP for mgmt0/diagnostic outgoing traffic is missing
CSCwk33516	MonetDB down due to a corrupt table (table missing columns)
CSCwk34905	ISE connection status health alerts on FMC with ise services down
CSCwk36860	IPv6 tunnel packets to DVTI Tunnel source on vrf loopback dropped (acl-drop)
CSCwk38440	if conn_meta null, dont send packet to snort
CSCwk38851	FMC should not take a policy backup during patch / Hotfix installations.
CSCwk40403	WebEx traffic not getting bypassed in snort3 (allow rules)
CSCwk41396	ASA to FTD migration via FMT causes improper configuration of interface groups in FMC backend config
CSCwk41806	Need to Protect LINA from getting killed by OOM
CSCwk42266	Zone Based AC rule has missing interface mapping
CSCwk42676	Virtual ASA/FTD may traceback and reload in thread PTHREAD
CSCwk46737	ASA on HA: alloc_ch() alloc from chunk mem Failed message on one context in Standby device

Bug ID	Headline
CSCwk48628	FTD/FxOS - Upgrade/erase configuration result in App-instance 'Operational State: Starting'
CSCwk54033	FMC can not connect to private AMP when proxy is enabled in management interface
CSCwk63586	App instance stuck in STOP_FAILED with error message
CSCwk67346	DAP policies not working with attribute TRUE/FALSE
CSCwk71227	FTD running on FPR 2k with LDAP skips backslash when updating ldap.conf
CSCwk78075	FTD does not mark stuck ongoing deployments as failed leading to subsequent deployment failures
CSCwk78242	Empty user attributes in LDAP causes partial user/group download
CSCwk78393	Improve logging for LDAPS SSL errors
CSCwk86563	Source Port and Destination Port are swapped during the evaluation of SID
CSCwk88913	Keep a FMC backup locally until we copy the file to remote server successfully
CSCwk89127	Backup_info table is not being pruned, causing DB queries to slow down
CSCwk94697	FMC allows uploading a binary certificate in Identity Certificate import
CSCwk97058	FMC - Predeploy validation should error and block deployment if VPN Certificate is in failed state.
CSCwm03227	FTD upgrade failure due to multiple DB folders in /ngfw/var/cisco/deploy/tmp_bundle/db/ path
CSCwm05196	When using time based object in ACP event doesn't show up in FMC
CSCwm05221	Snort3 file detection fails with asymmetric traffic in IDS passive mode
CSCwm06393	Changes in port-channel membership or member status may cause periodic OSPF/EIGRP adjacency flaps
CSCwm27588	fix to remove space characters in auth object names during FMC upgrade may cause upgrade failure
CSCwm28007	Browser redirects to blank page when the user clicks the WebVPN bookmark
CSCwm29768	Connection been logged for rules with no logging enabled
CSCwm29929	QoS policy editor on FMC GUI lacks functional pagination when QoS policy has more than 50 rules
CSCwm30731	The ASA's OSPF routing table is not properly synchronized with the neighbors
CSCwm33529	FXOS MTU Handling for Front Panel and Uplink Ports on Firepower devices require improvement

Bug ID	Headline
CSCwm33613	Default Group Policy is applied when receiving multiple Group Policies in SAML assertion attributes
CSCwm33619	FTD Vault process exits every 1 minute: "Process vaultApp (23597) exited normally: 256"
CSCwm35051	hostname/IP Address field does not accept domains ending in a number
CSCwm35251	FMC4700 displays premature fan speed alerts
CSCwm35730	LINA may traceback in Thread Name: Datapath with NAT config
CSCwm35751	FPR3100: Interface may go to half duplex speed is hardcoded to 100mbps
CSCwm36631	FTD Secondary Unit got stuck in Bulk sync state.
CSCwm37043	Crash handler notification for snort3 failure not being sent in MI setup.
CSCwm37455	ASA/FTD will allow local IP pool with invalid netmask
CSCwm37690	NAT Rules Before deleted when policy is saved on FMC
CSCwm38635	TACACS+ traffic is dropped by TLS Server Identity in XTLS module
CSCwm40278	S2S VPN config removed unexpectedly after deployment
CSCwm41381	File Download fails intermittently with malware & file policy configured
CSCwm41847	Serviceability to capture PDTS writing/reading block to help root cause CSCwm36314
CSCwm42000	FTD/ASA may traceback and reload in DATAPATH thread
CSCwm44412	FTD inline-set ignore reverse flag for inject/rewrite
CSCwm47775	FMC Deployment Failure When Modifying NAT Policy with Block Allocation and Round-Robin Enabled
CSCwm49154	FXOS fault F1738 seen in deploymet with Error: CSP_OP_ERROR. CSP signature verification error
CSCwm49721	ASA Traceback and Reload due to MEMORY CORRUPTION WAS DETECTED
CSCwm49782	enhance sma 2nd cruz heartbeat logging
CSCwm50591	ASA/FTD: Inbound IPsec packets are dropped when IPsec offload is enabled with VTI and sub-interface
CSCwm51747	SSH access with public key authentication fails after FXOS upgrade
CSCwm51874	FXOS: messages rotates every 40 minutes due to Notification Daemon messages' being spammed
CSCwm51923	Deployment transcript showing "Enable management access: false"

Bug ID	Headline
CSCwm52264	Not able to remove or clear Fault "The password encryption key has not been set."
CSCwm52931	ASA/FTD may traceback and reload in Thread Name "fover_parse"
CSCwm56864	show run access-list command returns warning
CSCwm57511	Issues with extdb Omniquery execution
CSCwm58260	Snort3 crash on TLS cert have same issuer and common name,but sign algo and public key are different
CSCwm58772	snort2 instances restart unexpectedly with OOM during policy deployment
CSCwm60536	SQLNet traffic getting dropped intermittently in Clustering data unit.
CSCwm61282	ASA/FTD: RA VPN tunnel causing memory leak leading to traceback & Reload
CSCwm63868	FTD - Missing routes on BGP advertised-routes after FTD HA failover event
CSCwm65693	Snort 3 rules display discrepancy in the GUI of FMC.
CSCwm65773	Refresh of Inventory shows incorrect message "Device is not reachable" with sftuunel is UP
CSCwm66731	In RAVPN policy edit action getting stuck, when editing LDAP attribute maps
CSCwm67414	Unable to edit/delete client module in the RAVPN group policy
CSCwm68211	ASA traceback and reload on thread snmp_inspect
CSCwm69907	FMC not sending/synchronizing the RADIUS config file to the FTDs
CSCwm70835	ASA traceback and reload due to stack overflow while using APCF file
CSCwm71265	ASA traceback and reload on thread DATAPATH when processing gtpv1 end marker msg for PDP
CSCwm72757	Snort3 blocking ESMTP traffic intermittently and trigger IPS signatures 124:3:2 and 124:1:2
CSCwm74289	NAT traps have to be rate-limited
CSCwm77673	Policy Deployment Hung at 5/8% Deployment - Collecting policies and objects
CSCwm78351	Potential High CPU usage in Multi-Context Cluster setup with unconditional execution of capture code
CSCwm79920	External auth (Radius) User unable to login to FTD due to mismatched cases during initial login
CSCwm82683	Registration Cleanup Should NOT Run if the peers Directory Cannot Be Opened
CSCwm85228	ASA/FTD may traceback and reload in Thread Name "IKEv2 Daemon" while joining failover

Bug ID	Headline
CSCwm86416	ENH: FMC API: Threat Defense Upgrade Options skip automatic generating of troubleshooting files
CSCwm89523	'no capture /all' failed to disable capture completely in the backend, causing high datapath CPU
CSCwm90905	GTP inspection drops packet with error ERROR-DROP:MsgType:32
CSCwm92397	LINA core observed pointing to "IP RIB Update" thread
CSCwm93119	FMCv is incompatible with certain KVM hypervisor software versions
CSCwm95116	ADI crashes on FTD due to both FMC ADIs going unmuted
CSCwm95328	Copy/Paste for a rule on any UI page other than page 1 results in policy UI loading back to page 1.
CSCwm96280	FTD device stuck in rommon mode after pressing reset button
CSCwm96652	Cluster assigning wrong nat for unit, traffic not being forwarded properly back to unit
CSCwm97054	ASA/FTD traceback and reload with high rate of SIP connections
CSCwm98278	TCP Conn not being flagged as Half-Closed after receiving the ACK for the FIN.
CSCwn00475	Memory Blocks 80 and 9344 leak due to priority-queue
CSCwn01281	GTP inspection not allowing GTP data packets if session create response has cause type 18
CSCwn03446	When capture enabled on cluster interface, it always includes CCL IP along with the configured rule
CSCwn03796	Unity style enrollment after registering to the AMPkit portal
CSCwn03835	ASA/FTD may traceback and reload in Thread Name 'SSH Ctxt Thread'
CSCwn05183	FTD HA active node interfaces went down after failed policy deploy
CSCwn10538	ADI on FTD does not stop after a crash
CSCwn13187	ASA upgrade failing from 9.20.2.21 to the target version 9.20.3.4
CSCwn14130	FTD cluster to traceback and reload after extended PAT is enabled
CSCwn14447	ASA/FTD may traceback and reload in Thread Name 'ldap_client_thread'
CSCwn15104	FTD reload with traceback on swapcontext function
CSCwn15589	Need unified package/fix for pseq and associated rommon fix for pseq upgrade failure
CSCwn17121	ASA/FTD may traceback and reload in Thread Name 'cli_xml_request_process'.
CSCwn19498	Unable to add Data nodes to Existing Cluster setup during cluster app-sync phase

Bug ID	Headline
CSCwn19706	Admin users are prompted to change local password when authenticating to external server
CSCwn19739	HA would bring data interfaces up while moving from cold standby to failed state
CSCwn20024	ASA may traceback and reload in Thread Name 'ssh'
CSCwn22036	FTD: Management0/0 status went down, line protocol is up after upgrade
CSCwn22456	GTPv2 IE-type 157 (Signaling Priority Indication) is dropped with reason as unknown IE type
CSCwn23992	Push messages including UMS are broken when the FMC is reached on port 443
CSCwn24577	ASA booting process may freeze when including 'no pim' or 'no igmp' config
CSCwn26165	FTD/ASA May Traceback and Reload - During Deployment / Radius changes - Due to Radius Packets
CSCwn27819	Jumbo frame packets are being fragmented
CSCwn31653	FTD may traceback and reload in Thread Name "FPRLI_FPR4K-SM-32"
CSCwn34259	Monitored interfaces may go in waiting state after upgrade to 9.20.3.7
CSCwn34659	Firewall not initiating TCP request even after receiving the TC bit set in DNS response
CSCwn34707	Multiple Unicorn Admin Handler processes consume all the control plane CPU.
CSCwn35470	Serviceability : FQDN Packet based debug and capture trace support
CSCwn39780	FTD Deployment Resilience: Skip non-critical / non-existing commands to avoid deployment failures.
CSCwn39826	HA should prevent honouring failover requests while copy/config-sync/rollback is in progress
CSCwn40572	MI: Vlan info is not applied at FXOS level when Virtual MAC is configured
CSCwn42949	Implementing forwarder flow on non-owner units handling distributed secondary flow connections
CSCwn44335	FXOS - Download command generates an extra "/" over HTTP and HTTPS GET requests
CSCwn45510	S2S VPN tunnel Child SA unsuccessful renegotiation
CSCwn46855	LINA may observe random traceback with Netflow configured
CSCwn47308	Critical health alerts 'user configuration(FSM.sam.dme.AaaUserEpUpdateUserEp)' on FPR 1100/2100/3100
CSCwn54561	Modify memory allocation for policy deployment subgroup

Bug ID	Headline
CSCwn54966	Snort3: TCP Midstream Traffic on ACK Normalized by snort and blocked by the Stream Preprocessor
CSCwn63839	Traceback in thread name Lina on configuring arp permit-nonconnected with BVI
CSCwn65415	ASA: floating-conn not closing UDP conns if conn was created without ARP entry for next hop
CSCwn73318	FMC Health Monitor (HM) graph shows incorrect number of Snort and System CPU cores
CSCwn73351	Asia/Bangkok timezone option not listed in ASA running on firepower1k
CSCwn75667	Banner motd does not display when configured
CSCwn75744	After upgrading FMC, deployment fails because of high SI Objects
CSCwn76079	SSH works in admin context but doesn't work in any user context after changing ssh key-exchange
CSCwn78846	Snort3 traceback and reload during user identity reload
CSCwn79553	Unreachable LDAP/AD referrals may cause delays or timeouts in external authentication on FTD
CSCwn80400	Slow download speeds with AnyConnect over TLS on networks with high latency
CSCwn80765	ISA3000 with ASA Refuses SSH Access If CiscoSSH is Enabled
CSCwn84557	Lina traceback and reload due to "spin_lock_fair_mode_enqueue"
CSCwn86002	core corruption still seen with switching to quick core feature
CSCwn90900	High ASA/FTD memory usage due to polling of RA VPN related SNMP OIDs
CSCwn92894	Occasionally, 'show chunkstat top-usage' output does not show all entries
CSCwn93319	ASA/FTD may traceback and reload in Thread Name "DATAPATH"
CSCwo01557	ASA traceback and reload on DATAPATH thread due to memory corruption
CSCwo06959	Malware block not happening due to malware cloud lookup timeout
CSCwo08042	ASAv reloaded unexpectedly with traceback on Unicorn Proxy Thread
CSCwo09060	SSL trustpoint with 4096 bit RSA keys not allowed by ASA if renewed via CLI
CSCwo09618	Enabling debugs with EEM fails
CSCwo13863	Snort3 crashed because don't fragment bit was set and it did not treat ipv4 fragments as fragments
CSCwo16016	Users from legacy radius server can login to Standby FMC domain when MA is enabled

CSCwe37453	Gateway is not reachable from standby unit in admin and user context with shared mgmt intf
CSCwe38029	Multiple traceback seen on standby unit.
CSCwe39546	FMC: Backup to an unavailable remote host results in the inability to restart the appliance.
CSCwe42061	Deleting a BVI in FTD interfaces is causing packet drops in other BVIs
CSCwe44571	FMC: GEOLOCATION size is causing upgrade failures
CSCwe47671	High memory usage on monetDB, FMC does not show connection events
CSCwe51443	ASA Evaluation of OpenSSL vulnerability CVE-2022-4450
CSCwe55298	Umbrella DNS Policy Doesn't honor Multiple URLs entered into the Bypass Domain Field
CSCwe74089	ASA/FTD may traceback and reload in Thread Name DATAPATH-1-1656
CSCwe79051	Deployment for eigrp / bgp change may cause temporary outage during policy apply
CSCwe82704	PortChannel sub-interfaces configured as data/data-sharing, in multi-instance HA go into "waiting"
CSCwe83255	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwe90609	Cisco ASA Software and FTD Software SNMP Denial of Service Vulnerability
CSCwe90720	ASA Traceback and reload in parse thread due ha_msg corruption
CSCwe92905	ngfwManager process continuously restarting leading to ZMQ Out of Memory traceback
CSCwe93176	Snort2 rule assignments missing from ngfw.rules (assignment_data table) after FMC upgrade.
CSCwe99550	Add knob to pause/resume file specific logging in asa log infra.
CSCwf04870	ASA: "Ping <ifc_name> x.x.x.x" is not working as expected starting 9.18.x
CSCwf05295	FTD running on FP1000 series might drop packets on TLS flows after the "Client Hello" message.
CSCwf10910	FTD : Traceback in ZMQ running 7.3.0

Bug ID	Headline
CSCwf12005	ASA sends OCSP request without user-agent and host
CSCwf12985	FTDv: Traffic failure in VMware Deployments due to dpdk pool exhuastion and rx_buff_alloc_failure
CSCwf14126	ASA Traceback and reload citing process name 'lina'
CSCwf15858	LDAP authentication over SSL not working for users that send large authorisation profiles
CSCwf15902	ASAv in Hyper-V drops packets on management interface
CSCwf16559	getReadinessStatusTaskList pjb request is very frequent when user in Upgrade sensor list page
CSCwf17042	ASDM replaces custom policy-map with default map on class inspect options at backup restore.
CSCwf17406	Failure to remove snort stat files older than 70 days
CSCwf20338	ASA may traceback and reload in Thread Name 'DHCPv6 Relay'
CSCwf23262	Cisco ASA and FTD AnyConnect Access Control List Bypass Vulnerability
CSCwf26407	FP2130- Unable to disassociate member from port channel, deployment fails, member is lost on FTD/FMC
CSCwf26534	ASA/FTD: Connection information in SIP-SDP header remains untranslated with destination static Any
CSCwf30716	ASA in multi context shows standby device in failed stated even after MIO HB recovery.
CSCwf31701	ASA traceback and reload with the Thread name: **CP Crypto Result Processing**
CSCwf34152	FMC Fails to deploy or register new FTDs due to SFTunnel Establishment Failure.
CSCwf34500	FTD: GRE traffic is not being load balanced between CPU cores
CSCwf35207	ASA: Traceback and reload while updating ACLs on ASA
CSCwf35233	Cisco Adaptive Security Appliance Software and Firepower Threat Defense DoS
CSCwf35573	Traffic may be impacted if TLS Server Identity probe timeout is too long
CSCwf36563	The interface configuration is missing after the FTD upgrade
CSCwf37160	AnyConnect Ikev2 Login Failed With certificate-group-map Configured
CSCwf42144	ASA/FTD may traceback and reload citing process name "lina"
CSCwf43288	Traceback in Thread Name: ssh/client in a clustered setup
CSCwf43537	Lina crash in thread name: cli_xml_request_process during FTD cluster upgrade

Bug ID	Headline
CSCwf44537	99.20.1.16 lina crash on nat_remove_policy_from_np
CSCwf47227	Remove Priority-queue command from FTD|| Priority-queue command causes silent egress packet drops
CSCwf48599	VPN load-balancing cluster encryption using deprecated ciphers
CSCwf49486	store_*list_history.pl task is created every 5min without getting closed causing FMC slowness.
CSCwf49573	ASA/FTD: Traceback and reload when issuing 'show memory webvpn all objects'
CSCwf50497	DNS cache entry exhaustion leads to traceback
CSCwf54510	ASA traceback and reload on Thread Name: DHCPRA Monitor
CSCwf56386	vFTD runs out of memory and goes to failed state
CSCwf56811	ASA Traceback & reload on process name lina due to memory header validation
CSCwf58876	KP2140-HA, reloaded primary unit not able to detect the peer unit
CSCwf60311	ASA generating traceback with thread-name: DATAPATH-53-18309 after upgrade to 9.16.4.19
CSCwf60590	"show route all summary" executed on transparent mode FTD is causing CLISH to become Sluggish.
CSCwf62729	Cisco ASA/FTD Firepower 2100 SSL/TLS Denial of Service Vulnerability
CSCwf62820	Failover: standby unit traceback and reload during modifying access-lists
CSCwf69901	FTD: Traceback and reload during OSPF redistribution process execution
CSCwf71812	FTD Lina engine may traceback, due to assertion, in datapath
CSCwf72434	Add meaningful logs when the maximums system limit rules are hit
CSCwf77191	ASA appliance mode - 'connect fxos [admin]' will get ERROR: failed to open connection.
CSCwf78321	ASA: Checkheaps traceback and reload due to Clientless WebVPN
CSCwf81058	FTD: Firepower 3100 Dynamic Flow Offload showing as Enabled
CSCwf82247	Policy deployment fails when a route same prefix/metric is configured in a separate VRF.
CSCwf82742	FTD: SNMP not working on management interface
CSCwf82970	Snort2 engine is crashing after enabling TLS Server Identity Discovery feature
CSCwf92135	ASA: Traceback and reload on Tread name "fover_FSM_thread" and ha_ntfy_prog_process_timer

Bug ID	Headline
CSCwf92182	Cisco Firepower Management Center Software SQL Injection Vulnerability
CSCwf92646	ECDSA Self-signed certificate using SHA384 for EC521
CSCwf92726	Some Vault secrets including LDAP missing files after upgrade if the Vault token is corrupted
CSCwf95147	OSPFv3 Traffic is Centralized in Transparent Mode
CSCwf96938	FMC: ACP Rule with UDP port 6081 is getting removed after subsequent deployment
CSCwh01673	FTD /ngfw disk space full from Snort3 url db files
CSCwh02457	Radius authentication stopped working after ASAv on AWS upgrade to any higher version than 9.18.2
CSCwh04231	FMC needs to properly maintain Redis data directory to prevent unbounded disk usage
CSCwh04365	ASA Traceback & reload on process name lina due to memory header validation - webvpn side fix
CSCwh04395	ASDM application randomly exits/terminates with an alert message on multi-context setup
CSCwh11764	ASA/FTD may traceback and reload in Thread Name "RAND_DRBG_bytes" and CTM function on n5 platforms
CSCwh12987	Large SMB servers result in timeouts returning verdicts between FMC and FTD devices
CSCwh14467	File sizes larger than 100MB for AnyConnect/Secure Client images cannot be uploaded on FMC
CSCwh14584	Traceback seen on FTD running on Firepower 2100 series
CSCwh14597	ASA/FTD residual free
CSCwh15223	Lina crash in snp_fp_tcp_normalizer() when DAQ/Snort sends malformed L3 header
CSCwh21141	The FMC preview deployment shows a wrong information.
CSCwh23100	Cisco ASA and FTD Software Remote Access VPN Unauthorized Access Vulnerability
CSCwh23567	PAC Key file missing on standby on reload
CSCwh26526	SQL packets involved in large query is drop by SNORT3 with reason snort-block
CSCwh27230	Connections are not cleared after idle timeout when the interfaces are in inline mode.
CSCwh28144	Specific OID 1.3.6.1.2.1.25 should not be responding
CSCwh30891	ASA/FTD may traceback and reload in Thread Name 'ssh' when adding SNMPV3 config

Bug ID	Headline
CSCwh32118	ASDM management-sessions quota reached due to HTTP sessions stuck in CLOSE_WAIT
CSCwh36005	Policy deployment failed due to "1 errors seen during populateGlobalSnapshot"
CSCwh37733	FTD responding to UDP500 packet with a Mac Address of 0000.000.000
CSCwh40968	Large file download failed due to hitting the max segment limit
CSCwh41127	ASA/FTD: NAT64 error "overlaps with inside standby interface address" for Standalone ASA
CSCwh45108	Cisco ASA and FTD Software Remote Access VPN Unauthorized Access Vulnerability
CSCwh49483	ASA/FTD may traceback and reload while running show inventory
CSCwh52420	AMP Cloud look up timeout frequently.
CSCwh56945	SFDataCorrelator crashing repeatedly in RNA_DB_InsertServiceInfo
CSCwh58999	Devices with classic licenses are failed to register with FMC running version 7.2.X
CSCwh64508	Fixing the regression caused while handling web UI is not getting FTDv Variable
CSCwh69209	Prefilter cannot add Tunnel Endpoints in Tunnel Rule on FMC
CSCwh69815	FTDvs through put got changed to 100Kbps after upgrade
CSCwi82368	Classic licenses needs to be manually added after registering to license during migration/RMA
CSCwi90040	Cisco ASA and FTD Software Command Injection Vulnerability
CSCwi98284	Cisco ASA and FTD Software Persistent Local Code Execution Vulnerability
CSCwj10955	Cisco ASA and FTD Software Web Services Denial of Service Vulnerability
CSCwj42876	DOC | Unable to add SLR license over FMC HA.
CSCwj56796	DOC: Add Resolved bugs section for patch 7.2.5.1
CSCwk25371	LOM is supported on CIMC port in FMC4600 but some documents says it is only available on eth0

Resolved Bugs in Version 7.2.5

Table last updated: 2024-05-22

Table 39: Resolved Bugs in Version 7.2.5

Bug ID	Headline
CSCvo60131	Audit log records does not appear in the correct order

Bug ID	Headline
CSCwb08189	Microsoft update traffic blocked with Snort version 3 Malware inspection
CSCwb95453	ASA: The timestamp for all logs generated by Admin context are the same
CSCwb95784	cache and dump last 20 rmu request response packets in case failures/delays while reading registers
CSCwd14732	FTD Unable to bind to port 8305 after management IP change
CSCwd16850	More information is required on Syslog 202010 messages for troubleshooting
CSCwd34288	FP1000 - During boot process in LINA mode, broadcasts leaked between interfaces resulting in storm
CSCwd41224	FMC HA webUI is not getting FTDv Variable tier assigned FTDv - Variable
CSCwd67101	FPR1150 : Exec format error seen and the device hung until reload when erase secure all is executed
CSCwd94183	Blade not coming up after FXOS update support on multi-instance due to ssp_ntp.log log rotation prob
CSCwe03529	FTD traceback and reload while deploying PAT POOL
CSCwe06562	FPR1K/FPR2K: Increase in failover time in Transparent Mode with high number of Sub-Interfaces
CSCwe07722	Cluster data unit drops non-VPN traffic with ASP reason "VPN reclassify failure
CSCwe21187	ASA/FTD may drop multicast packets due to no-mcast-intrf ASP drop reason until UDP timeout expires
CSCwe21280	Multicast connection built or teardown syslog messages may not always be generated
CSCwe23801	FPR2100: Mulitple snort3 & snort2 cores got generated and sensor goes down in KP platform
CSCwe29529	FTD MI does not adjust PVID on vlans attached to BVI
CSCwe30867	Workaround to set hwclock from ntp logs on low end platforms
CSCwe44672	Syslog ASA-6-611101 is generated twice for a single ssh connection
CSCwe45569	FTD upgrade from 7.0 to 7.2.x and beyond crashes due to management-access enabled
CSCwe45653	ENH: FXOS need to track Security Module for Disk quota exceeded related issue
CSCwe50993	SNMP on SFR module goes down and won't come back up
CSCwe51286	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwe52120	SSL decrypted conns fails when tx chksum-offload is enabled with the egress interface a pppoe.

Bug ID	Headline
CSCwe54529	FTD on FPR2140 - Lina traceback and reload by TCP normalization
CSCwe54567	Manager gets unregistered on its own from the FTD, show manager shows 'No managers configured'
CSCwe58881	After FMC upgrade, SecureX ribbon redirects to US cloud region regardless of the set cloud region
CSCwe59737	ASA/FTD reboots due to traceback pointing to watchdog timeout on p3_tree_lookup
CSCwe61928	PIM register packets are not sent to RP after a reload if FTD uses a default gateway to reach the RP
CSCwe61969	ASA Multicontext 'management-only' interface attribute not synced during creation
CSCwe62703	New context subcommands are not replicated on HA standby when multiple sessions are opened.
CSCwe63067	ASA/FTD may traceback and reload in Thread Name 'lina' due to due to tcp intercept stat
CSCwe63316	Pri-Active FMC NOT triggering registration TASK for FTD to configure standby manager
CSCwe64043	Cisco ASA and FTD ACLs Not Installed upon Reload
CSCwe65634	ASA - Standby device may traceback and reload during synchronization of ACL DAP
CSCwe67751	Last fragment from SIP IPv6 packets has MF equal to 1, flagging that more packets are expected
CSCwe67816	ASA / FTD Traceback and reload when removing isakmp capture
CSCwe68159	Failover fover_trace.log file is flooding and gets overwritten quickly
CSCwe68917	Snort3 fails to match SMTPS traffic to ACP rules
CSCwe70202	Multiple times the failover may be disabled by wrongly seeing a different "Mate operational mode".
CSCwe74916	Interface remains DOWN in an Inline-set with propagate link state
CSCwe76722	ASA/FTD: From-the-box ping fails when using a custom VRF
CSCwe78977	ASA/FTD may traceback and reload in Thread Name 'pix_flash_config_thread'
CSCwe79072	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwe81684	ASA: Standby failure on parsing of "management-only" not reported to parser/failover subsystem
CSCwe85432	ASA/FTD traceback and reload on thread DATAPATH-14-11344 when SIP inspection is enabled

Bug ID	Headline
CSCwe88772	ASA traceback and reload with process name: cli_xml_request_process
CSCwe90202	ASA: Standby failure on parsing of "management-only" for dynamic configuraiton changes
CSCwe90334	Missing Instance ID in unified_events-2.log
CSCwe93532	ASA/FTD may traceback and reload in Thread Name 'lina'.
CSCwe93537	Threat-detection does not allow to clear individual IPv6 entries
CSCwe94287	FTD DHCP Relay drops NACK if multiple DHCP Servers are configured
CSCwe95729	Cisco ASA & FTD SAML Authentication Bypass Vulnerability
CSCwe95757	ASA/FTD may traceback and reload in Thread Name 'lina'
CSCwe96023	ASa/FTD: SNMP related traceback and reload immediately after upgrade from 6.6.5 to 7.0.1
CSCwe96068	ASA: Configurable CLU for Large amount of under/overruns on CLU RX/TX queues
CSCwe99040	traceback and reload thread datapath on process tcpmod_proxy_continue_bp
CSCwf00417	FTD: Unable to process a TLS1.2 website with TLS Server Identity with client generating SSL Errors
CSCwf00865	FTD/ASA Hub and spoke (U-turn) VPN fails when one spoke is IPSec flow offloaded and the other isn't
CSCwf01064	TCP ping is completely broken starting in 9.18.2
CSCwf02363	Snort3 Crash in SslServiceDetector after call from nss_passwd_lookup
CSCwf03490	portmanager.sh outputing continuous bash warnings to log files
CSCwf04831	ASA/FTD may traceback and reload in Thread Name 'ci/console'
CSCwf07791	ASA running out of SNMP PDU and SNMP VAR chunks
CSCwf08043	Lina traceback and reload due to fragmented packets
CSCwf08515	FPR3100: ASA/FTD High traffic impact on all data interfaces with high counter of "demux drops"
CSCwf10486	ISE Integration Network filter not accepting multiple comma separated networks
CSCwf12408	ASA: After upgrade to 9.16.4 all type-8 passwords are lost on first reboot
CSCwf14735	traceback and reload in Process Name: lina related to Nat/Pat
CSCwf14811	TCP normalizer needs stats that show actions like packet drops
CSCwf17814	ASA/FTD may traceback and reload in Thread Name '19', free block checksum failure

Bug ID	Headline
CSCwf21106	ASA/FTD: Traceback on thread name: snmp_master_callback_thread during SNMP and interface changes
CSCwf22045	MYSQL, or any TCP high traffic, getting blocked by snort3, with snort-block as Drop-reason
CSCwf23564	Unable to establish BGP when using MD5 authentication over GRE TUNNEL and FTD as passthrough device
CSCwf24124	SFDataCorrelator process crashing very frequently on the FMC.
CSCwf24773	crashhandler running with test mode snort
CSCwf26939	FTD may fail to create a NAT rule with error: "IPv4 dst real obj address range is huge"
CSCwf28488	Inconsistent log messages seen when emblem is configured and buffer logging is set to debug
CSCwf28592	In some specific scenarios, object optimizer can cause incorrect rules to be deployed to the device
CSCwf30727	ASA integration with umbrella does not work without validation-usage ssl-server.
CSCwf31820	Firewall may drop packets when routing between global or user VRFs
CSCwf33574	ASA access-list entries have the same hash after upgrade
CSCwf34450	Snort3 crash after the consequent snort restart if duplicate custom apps are present
CSCwf35510	Possible segfault in snort3 when appid tries to delete the app info table
CSCwf51933	FTD username with dot fails AAA-RADIUS external authentication login after upgrade
CSCwf54418	Reduce time taken to clear stale IKEv2 SAs formed after Duplicate Detection
CSCwf60584	Health Monitoring to NOT collect route stats for transparent mode FTD
CSCwf62885	FTDv Single-Arm Proxy behind AWS GWLB drops due to geneve-invalid-udp-checksum.
CSCwf71606	Cisco ASA and FTD ACLs Not Installed upon Reload
CSCwf73189	FTD is dropping GRE traffic from WSA due to NAT failure
CSCwf76945	Packet data is still dropped after upgrade
CSCwf85307	[Snort 3] IPS Policy Overrides not working on Chained Intrusion Policies
CSCwf88552	ASA/FTD: Traceback and reload due to NAT L7 inspection rewrite
CSCwf99173	DOC:When using an SLR, it does not properly documented what happens if one of the licenses expires.

CSCvz42065	IPS policy should be imported when its referred in Access Control policy
CSCvz71596	"Number of interfaces on Active and Standby are not consistent" should trigger warning syslog
CSCvz77213	FTD: show ntp shows managing DC even though NTP sync is done via FXOS
CSCvz94841	Grammatical errors in failover operating mode mismatch error message
CSCwa04262	Cisco ASA Software SSL VPN Client-Side Request Smuggling Vulnerability via "/"URI
CSCwa16626	Syslog over TLS accepting wildcard in middle of FQDN
CSCwa36535	Standby unit failed to join failover due to large config size.
CSCwa59907	LINA observed traceback on thread name "snmp_client_callback_thread"
CSCwa72481	API key corrupted for FMC with multiple interfaces
CSCwa72929	SNMPv3 polling may fail using privacy algorithms AES192/AES256
CSCwa74063	Disable NLP rules installation workaround after mgmt-access into NLP is enabled
CSCwa82850	ASA Failover does not detect context mismatch before declaring joining node as "Standby ready"
CSCwa83133	FMC showing "INVALID ID" under "Traffic by User" Widget but error not seen on Connection Events
CSCwa89116	Clean up session index handling in IKEv2/SNMP/Session-mgr for MIB usage
CSCwa92822	TLS client in the sftunnel TLS tunnel offers curves in CC mode that are not allowed by CC
CSCwa94440	syncd process exits due to invalid GID and database synchronization issue
CSCwa96920	ASA/FTD may traceback and reload in process Lina
CSCwa97917	ISA3000 in boot loop after powercycle
CSCwb00749	FMC upgrade failure: 114_DB_table_data_integrity_check.pl failed
CSCwb00871	ENH: Reduce latency in log_handler_file to reduce watchdog under scale or stress
CSCwb02955	Modify /800_post/1027_ldap_external_auth_fix.pl to not fail FMC upgrade when objects are corrupt
CSCwb03704	ASA/FTD datapath threads may run into deadlock and generate traceback
CSCwb04000	ASA/FTD: DF bit is being set on packets routed into VTI
CSCwb04975	FTD Snort3 traceback in daq-pdts while handling FQDN based traffic
CSCwb05291	Cisco ASDM and ASA Software Client-side Arbitrary Code Execution Vulnerability

Bug ID	Headline
CSCwb09606	FP2100: ASA/FTD high availability is not resilient to unexpected lacp process termination
CSCwb17362	Losing ssh connection while copying huge file to device though device has enough space.
CSCwb20206	FTD: Logs and Debugs for SSL/TLS traffic drop due to NAP in Detection Mode
CSCwb24306	duplicate log entry for /mnt/disk0/log/asa_snmp.log
CSCwb31551	When inbound packet contains SGT header, FPR2100 cannot distribute properly per 5 tuple
CSCwb32107	FMC shows limited interfaces in policy-based routing config (egress interface selection)
CSCwb38961	Bootstrap After Upgrade failed due to Duplicate Key of Network Object
CSCwb42031	Cisco FTD Software and FMC Software Code Injection Vulnerability
CSCwb43433	Jumbo frame performance has degraded up to -45% on Firepower 2100 series
CSCwb44048	Event Rate on FMC Health Monitoring Dashboard shows extremely high values
CSCwb44848	ASA/FTD Traceback and reload in Process Name: lina
CSCwb57213	FTD - Unable to resolve DNS when only diagnostic interface is used for DNS lookups
CSCwb57524	FTD upgrade fails - not enough disk space from old FXOS bundles in distributables partition
CSCwb58007	CVE-2022-28199: Evaluation for FTDv and ASAv
CSCwb58554	Resumed SSL sessions with uncached tickets may fail to complete
CSCwb58817	FMC Deploying negative and positive form of BGP password command across deployments
CSCwb60993	FDM Need to block the deployment when a Security zone object is not associated with an interface
CSCwb66382	ASAv - 9344 Block not created automatically after enabling JumboFrames, breaks OSPF MD5
CSCwb68993	FTD/FDM: SSL connections to sites using RSA certs with 3072 bit keys may fail
CSCwb78323	Update diskmanager to monitor cisco_uridb files in /ngfw/var/sf/cloud_download folder.
CSCwb80108	FP2100/FP1000: Built-in RJ45 ports randomly not coming up after portmanager restart events
CSCwb84901	CIAM: heimdal 1.0.1
CSCwb86171	Breaking FMCv HA in AWS gives VTEP CONFIGURATION IS NOT SUPPORTED FOR CURRENT PERFORMANCE TIER alert
CSCwb88406	FMC-HA upgrade failure due to presence of this file "update.status"
CSCwb88729	FTD - %FTD-3-199015: port-manager: Error: DOM Block Read failure, port X, st = X log false/positive

Bug ID	Headline
CSCwb89963	ASA Traceback & reload in thread name: Datapath
CSCwb91598	copying FMC backup to remote storage will fail if FMC has never connected via SSH/SCP to remote host
CSCwb92937	Error 403: Forbidden when expanding in view group objects
CSCwb99375	Config sync fails for command "quit"
CSCwb99960	onPremFMC with only CDO Managed devices registered, Malware Event pages shows license warning
CSCwc00115	FTD registration fails on on-prem FMC
CSCwc02488	ASA/FTD may traceback and reload in Thread Name 'None'
CSCwc03069	Interface internal data0/0 is up/up from cli but up/down from SNMP polling
CSCwc03332	FTD on FP2100 can take over as HA active unit during reboot process
CSCwc03393	Lina traceback and core file size is beyond 40G and compression fails on FTD
CSCwc03507	No-buffer drops on Internal Data interfaces despite little evidence of CPU hog
CSCwc04959	Disk usage is 100% on secondary FMC .dmp files created utilized all the disk space
CSCwc05375	AnyConnect SAML - Client Certificate Prompt incorrectly appears within External Browser
CSCwc05434	FMC shows 'File Not Stored' after download a file
CSCwc06833	Deployment failure with ERROR Process Manager failed to verify LSP ICDB
CSCwc07262	Standby ASA goes to booting loop during configuration replication after upgrade to 9.16(3).
CSCwc08374	Azure ASA NIC MAC address for Gigeth 0/1 and 0/2 become out of order when adding interfaces
CSCwc08646	User without password prompted to change password when logged in from SSH Client
CSCwc08683	The interface's LED remains green blinking when the SFP cable is unplugged on FPR1150
CSCwc10145	FTDv Cluster unit not re-joining cluster with error msg "Failed to open NLP SSL listening socket"
CSCwc10241	Temporary HA split-brain following upgrade or device reboot
CSCwc10483	ASA/FTD - Traceback in Thread Name: appAgent_subscribe_nd_thread
CSCwc11511	FTD: SNMP failures after upgrade to 7.0.2
CSCwc11597	ASA tracebacks after SFR was upgraded to 6.7.0.3
CSCwc13017	FTD/ASA traceback and reload at at ../inspect/proxy.h:439
CSCwc18285	Conn data-rate command can be enabled or disabled in unprivileged user EXEC mode
CSCwc18524	ASA/FTD Voltage information is missing in the command "show environment"

Bug ID	Headline
CSCwc18668	Failed user login on FMC does not record entry in audit log when using external authentication
CSCwc19124	FMC Deployment does not start for cluster devices
CSCwc20153	IPv6 ICMP configuration is added and removed during policy deployment
CSCwc20635	Cisco Firepower Threat Defense ICMPv6 with Snort 2 Denial of Service Vulnerability
CSCwc22170	Issue with snort perfstat parsing / Hmdeamon not starting after disk full reported
CSCwc23113	LTP feature not working on KP ASA with 9.18
CSCwc23844	ASAv high CPU and stack memory allocation errors despite over 30% free memory
CSCwc24582	Update diskmanager to monitor deploy directories in /ngfw/var/cisco/deploy/db
CSCwc24906	ASA/FTD traceback and reload on Thread id: 1637
CSCwc25683	JOBS_TABLE not getting purged if deployReports not available
CSCwc26406	FMC: Slowness in Device management page
CSCwc26538	With scaled EFD throttle connections, de-throttle using clear efd-throttle command traceback lina
CSCwc26648	ASA/FTD Traceback and Reload in Thread name Lina or Datatath
CSCwc27236	FMC Health Monitoring JSON error
CSCwc27424	Unable to removed not used SAL On-Premise FMC configuration
CSCwc27846	Traceback and Reload while HA sync after upgrading and reloading.
CSCwc28334	Cisco ASA and FTD Software RSA Private Key Leak Vulnerability
CSCwc28532	9344 Block leak due to fragmented GRE traffic over inline-set interface inner-flow processing
CSCwc28684	MI hangs and not repsonding when FTD container instance is reloaded
CSCwc28806	ASA Traceback and Reload on process name Lina
CSCwc28928	ASA: SLA debugs not showing up on VTY sessions
CSCwc31163	FPR1010 upgrade failed - Error running script 200_pre/100_get_snort_from_dc.pl
CSCwc31457	ASA process with cleartext token when not able to encrypt it
CSCwc32245	FMC: Validation check to prevent exponential expansion of NAT rules
CSCwc32246	NAT64 translates all IPv6 Address to 0.0.0.0/0 when object subnet 0.0.0.0 0.0.0.0 is used
CSCwc33036	Observed Logs at syslog server side as more than configured message limit per/sec.
CSCwc33076	JOBS_TABLE not getting purged due to foreign Key constraint violation in policy_diff_main
CSCwc33323	FMC 7.0 - Receiving alert "health monitor process: no events received yet" for multiple devices

Bug ID	Headline
CSCwc34818	The device is unregistered when Rest API calls script.
CSCwc35181	OSPF template adds "default-information-originate" to area <area-id> nssa statement on hitting OK.
CSCwc35583	Snort leaking file descriptors with each u2 file created
CSCwc35969	cannot add IP from event to global lists (block or do-not-block) if similar IP is already on list
CSCwc36905	ASA traceback and reload due to "Heap memory corrupted at slib_malloc.c
CSCwc37061	SNMP: FMC doesn't reply to OID 1.3.6.1.2.1.25.3.3.1.2
CSCwc37256	SSL AnyConnect access blocked after upgrade
CSCwc37695	In addition to the c_rehash shell command injection identified in CVE-2022-1292
CSCwc38500	FMC: Extended ACL object should support mixed protocols on different entries
CSCwc38567	ASA/FTD may traceback and reload while executing SCH code
CSCwc40352	Lina Netflow sending permited events to Stealthwatch but they are block by snort afterwards
CSCwc40381	ASA : HTTPS traffic authentication issue with Cut-through Proxy enabled

For Assistance

Upgrade Guides

In Firewall Management Center deployments, the Firewall Management Center must run the same or newer maintenance (third-digit) release as its managed devices. Upgrade the Firewall Management Center first, then devices. Use the upgrade guide for the version you are *currently* running—not your target version.

Table 48: Upgrade Guides

Platform	Upgrade Guide	Link
Firewall Management Center	Firewall Management Center version you are *currently* running.	https://cisco.com/go/fmc-upgrade
Firewall Threat Defense with Firewall Management Center	Firewall Management Center version you are *currently* running.	https://cisco.com/go/ftd-fmc-upgrade
Firewall Threat Defense with device manager	Firewall Threat Defense version you are *currently* running.	https://cisco.com/go/ftd-fdm-upgrade
Firewall Threat Defense with Cloud-Delivered Firewall Management Center	Cloud-Delivered Firewall Management Center.	https://cisco.com/go/ftd-cdfmc-upgrade

Install Guides

If you cannot or do not want to upgrade, you can freshly install major and maintenance releases. This is also called *reimaging*. You cannot reimage to a patch. Install the appropriate major or maintenance release, then apply the patch. If you are reimaging to an earlier Firewall Threat Defense version on an FXOS device, perform a full reimage—even for devices where the operating system and software are bundled.

Table 49: Install Guides

Platform	Install Guide	Link
Firewall Management Center hardware	Getting started guide for your Firewall Management Center hardware model.	https://cisco.com/go/fmc-install

Platform	Install Guide	Link
