

About this Guide

Note The documentation set for this product strives to use bias-free language. For purposes of this documentation set, bias-free is defined as language that does not imply discrimination based on age, disability, gender, racial identity, ethnic identity, sexual orientation, socioeconomic status, and intersectionality. Exceptions may be present in the documentation due to language that is hardcoded in the user interfaces of the product software, language used based on RFP documentation, or language that is used by a referenced third-party product.

This preface describes the *ePDG Administration Guide*, how it is organized, and its document conventions.

The guide describes the ePDG (Evolved Packet Data Gateway) and includes network deployments and interfaces, feature descriptions, session flows, configuration instructions, and CLI commands for monitoring and troubleshooting the system. It also contains a sample ePDG configuration file and ePDG engineering rules.
