

Cisco Spaces: Detect and Locate App

This chapter describes the Cisco Spaces: Detect and Locate app.

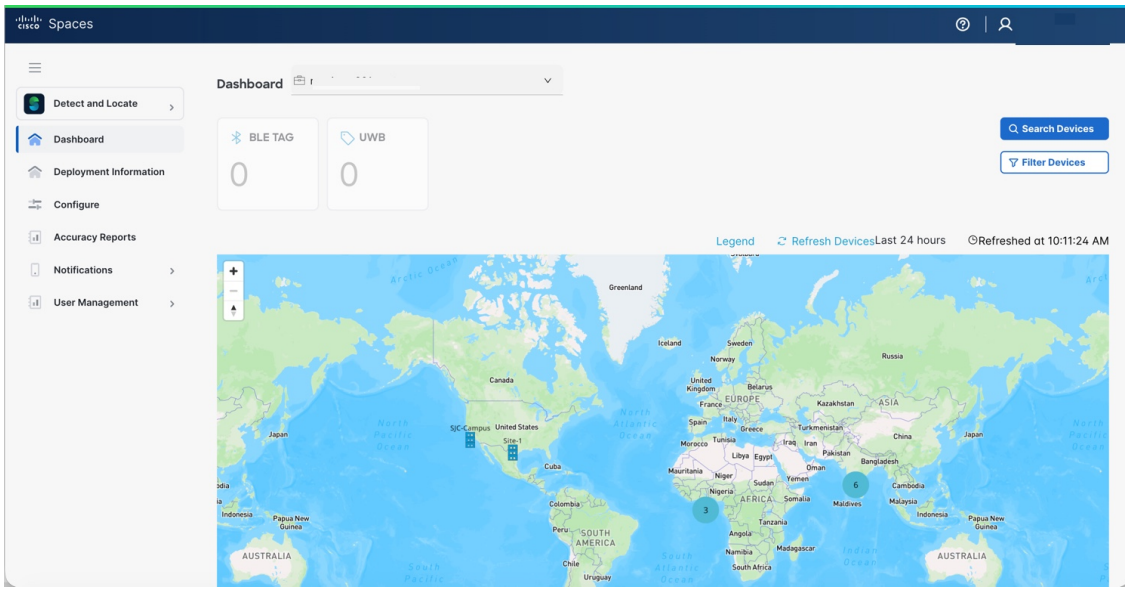

- Overview of Cisco Spaces: Detect and Locate App, on page 1

Overview of Cisco Spaces: Detect and Locate App

Cisco Spaces: Detect and Locate app enables you to view the current and historic location of Wi-Fi devices in your deployment.

Using **Detect and Locate**, you can view the fixed physical layout of the buildings in your network and the Wi-Fi access points (APs) deployed in the building. You can see other fixed components such as GPS markers and Exclusion or Inclusion Zone for location calculation. **Cisco Spaces: Detect and Locate** also allows you to see the dynamic nature of the Wi-Fi devices in your network.

Figure 1: Detect and Locate App

For more information on the **Detect and Locate** app, see Cisco Spaces Detect and Locate Configuration Guide.
