What's New in Release 3, Sep 2022

In this release, the architecture of connector3 has been redesigned. The following are the salient features of connector3:

- Efficiently manages multiple services that connect to different network devices such as wireless controllers and switches; and these services also gather data from these devices.
- Add or remove services to the Cisco Spaces dashboard using the connector3 GUI.
- Enhanced capability to troubleshoot. You can now use Cisco Spaces dashboard to debug, upload logs, and restart services from the cloud.
- Detailed metrics for each service, including CPU status, memory consumption, connectivity, and the Up/Down status of each service.

Caveats

Cisco Spaces: Connector 3 release has no open or resolved caveats.
