Whats New in Release 3, Jan 2023

This release supports all connector 3 upgrades and service upgrades from Cisco Spaces dashboard.

Attention An AMI package is now available for this release!

This release includes the following enhancements:

- The connector 3 GUI now features network troubleshooting tools that allow you to troubleshoot the connectivity of connector to the Cisco Spaces dashboard. See the chapter Connectivity Issues Between Connector and Cisco Spaces in the Cisco Spaces: Connector3 Configuration Guide.
- The connector 3 CLI features network troubleshooting tools that allow you to troubleshoot the connectivity of the connector to the Cisco Spaces dashboard. See the command **connectorctl troubleshooting connectivity** in the Cisco Spaces: Connector 3 Command Reference Guide.
- connector 3 CLI includes commands for importing a Certification Authority (CA) chain into the connector 3 trust bundle.
- Upgrade 2 includes latest OS-level security updates.
- connector 3 package upgrade is now easier with the CLI. You need not manually download a package to install the package. You can instead issue a set of commands that automatically downloads and installs a package. See the chapter Upgrading the Connector in the Cisco Spaces: Connector3 Configuration Guide

Warning However, any future security upgrades will be released as a new AMI. You must deploy the new AMI to address future security updates. This limitation will be addressed in the future.

Caveats

Caveats describe unexpected behavior in the Cisco Spaces: Connector.
